

1993 IEEE INTERNATIONAL CONFERENCE ON NEURAL NETWORKS

San Francisco Hilton Hotel, San Francisco, California

March 28–April 1, 1993

Table Of Contents VOLUME I

Message from Dr. Russell C. Eberhart	iii
Greeting from Dr. Enrique H. Ruspini	v
Message from Co-chairs	vii
Committee Listings	viii

Monday, March 29, 1993, 8:30–10:00 AM

Joint FUZZ-IEEE '93 and ICNN '93 Plenary Session

Chairman: Enrique H. Ruspini, SRI International

Learning algorithms for adaptive processing and control — <i>B. Widrow, M. Lehr, F. Beaufays, E. Wan, and M. Bileillo</i>	1
---	---

Monday, March 29, 1993, 11:00 AM–12:30 PM

NEW LEARNING ARCHITECTURES I

Multiple networks for function learning — <i>E. Alpaydin</i>	9
A universal structure for artificial neural networks — <i>F. Rauf and H. M. Ahmed</i>	15
Back-propagation algorithm with controlled oscillation of weights — <i>Y. M. Pires and D. Sarkar</i>	21
Parallel consensual neural networks — <i>J. A. Benediktsson, J. R. Sveinsson, O. K. Ersoy, and P. H. Swain</i>	27

RECURRENT NEURAL NETWORKS I

Self-clustering recurrent networks — <i>Z. Zeng, R. M. Goodman, and P. Smyth</i>	33
Hopf bifurcation and hopf hopping in recurrent nets — <i>F.-S. Tsung and G. W. Cottrell</i>	39
On design and evaluation of tapped-delay neural network architectures — <i>C. Svarer, L. K. Hansen, and J. Larsen</i>	46
A hybrid technique to enhance the performance of recurrent neural networks for time series prediction — <i>S. S. Rao and V. Ramamurti</i> ..	52

SENSORIMOTOR, BIOLOGICAL AND CEREBELLUM MODELS I

Synaptic coding of periodically modulated spike trains — <i>J. P. Segundo, J.-F. Vibert, M. Stiber, and S. Hanne-ton</i>	58
Temporal competition as an optimal parallel processing of the cerebrohypothalamic system — <i>K. Nakamura</i>	64
A spatio-temporal neural network model of saccade generation — <i>K. Arai, E. L. Keller, and J. A. Edelman</i>	70
Dynamics of synaptic transfer <i>in living</i> and simulated neurons — <i>M. Stiber and J. P. Segundo</i>	75

OTHER APPLICATIONS OF NEURAL NETWORKS I

Solving search problems with subgoals using an artificial neural network — <i>P. Liang and K. Jin</i>	81
Solving the serializability problem by a connectionist machine — <i>M. Sungur and U. Halici</i>	87
Classification of Parkinson rating-scale-data using a selforganising neural net — <i>T. Fritsch, P. H. Kraus, H. Pnuntek, and P. Tran-Gia</i>	93
Solving inverse problems in non-linear PDEs by recurrent neural networks — <i>T. Vchiyama and N. Sonehara</i> ..	99

HARDWARE IMPLEMENTATIONS I

Force directed self-organizing map and its application to VLSI cell placement — <i>R.-I. Chang and P.-Y. Hsiao</i>	103
The effects of analog hardware properties on backpropagation networks with on-chip learning — <i>B. K. Dolenko and H. C. Card</i> ..	110

An analog VLSI model of central pattern generation in the medicinal leech-M. S. Siegel	116
Analog neural networks solve ambiguity problems in medium PRF radar systems — C.-J. Wang and C.-H. Wu	120

APPLICATIONS TO IMAGE PROCESSING I

Stereo correspondence through multiple constraint neural network -J.-E. Hu and P. Siy	126
A neural network based edge detector — K. Etemad and R. Chelappa	132
A cortical structure for real world image processing — J. Kopecz	138
Classifying fingerprint images using neural network: Deriving the classification state — M. Kamijo	1932

LATE ARRIVAL

MONDAY, MARCH 29, 1993, 2:00-3:30 PM

NEURO-CONTROL I

A distributed adaptive control system for a quadruped mobile robot — B. Digney and M. M. Gupta	144
Sensorimotor coordination and sensor fusion by neural networks — G.-Q. Wei, G. Hirzinger, and B. Brunner	150
Motion controls using complex-valued neural networks with feedback loops — A. Hirose	156
On self consistent sensory-motor learning algorithm — S. Hu, P. Yan, and Y. Li	162

INVITED SESSION:

REINFORCEMENT LEARNING

Chairman and Organizer: Charles Anderson, Colorado State University

Efficient learning and planning within the dyna framework — J. Peng and R. J. Williams	168
Exploration and model building in mobile robot domains — S. B. Thrun	172
Hierarchical learning of robot skills by reinforcement-L.-J. Lin	187
Monaural localization using combination of TD (λ) with backpropagation — L. Wang and P. N. Denbigh	18

GENETIC ALGORITHMS I

Performance improvement of machine learning via automatic discovery of facilitating functions as applied to a problem of symbolic system identification — J. Koza, M. A. Keane, and J. P. Rice	19
Design architectures and training of neural networks with a distributed genetic algorithm — S. Olikar, M. Furst, and O. Maimon	19
Use of genetic algorithms with back propagation in training of feed-forward neural networks -M. McInerney and A. P. Dhawan	20
Coordinative behavior in evolutionary multi-agent system by genetic algorithm — T. Shibata and T. Fukuda	20

SUPERVISED LEARNING I

Sensitivity analysis for input vector in multilayer feedforward neural networks — L. Fu and T. Chen	2
Minimum entropy methods in neural networks: Competition and selective responses by entropy minimization — R. Kamimura	2
A dynamic neural network architecture by sequential partitioning of the input space — R. S. Shadafan and M. Niranjan	2
A parallel Newton's method for the efficient training of artificial neural networks — M. D. Zhao	

HYBRID (EXPERT AND NN) SYSTEMS I

Geometric error correction using hierarchical/hybrid artificial neural systems -J. C. Koo and B. Fernández	2
A rule based prototype system for automatic classification in industrial quality control — S. K. Halgamuge, W. Poehmueller, and M. Glesner	
Learning strategies for an adaptive information retrieval system using neural networks — F. Crestani	
pruning and rule extraction using class entropy — S. Ridella, G. Speroni, P. Trebino, and R. Zunirw	

OPTIMIZATION

Annealing networks and fractal landscapes — R. Lister	
--	--

A quick algorithm of neural combinatorial optimization to data association problem of multimaneuvering target tracking — <i>J. Zhongliang, Z. Guawei, and Z. Hongren</i>	263
Improved kick out learning algorithm with delta-bar-delta-bar rule — <i>K. Ochiai and S. Usui</i>	269
Solving the scheduling problem in high level synthesis using a normalizaed mean field neural network — <i>M. K. Unaltuna, M. E. Dalkilic, and V. Pitchumani</i>	275

MONDAY, MARCH 29, 1993, 4:30–6:00 PM

NEW LEARNING ARCHITECTURES II

Meaning-based handling of don't care attributes in artificial neural networks - <i>N. Tschichold-Gürman and V. G. Dabija</i>	281
Hierarchical ensemble of neural networks - <i>P. Poddar and P. V. S. Rac</i>	287
Optimal brain surgeon and general network pruning — <i>B. Hassibi, D. G. Stork, and G. J. Wolff</i>	293
Discriminant analysis neural networks — <i>J. Mao and A. K. Jain</i>	300

NEURO-FUZZY SYSTEMS I

Nemo-fuzzy optimal control of backing up a trailer truck- <i>H. Ichihashi and M. Tokunaga</i>	306
PUN: Optimization of fuzzy rule based systems using neural networks- <i>S. M. Sulzberger, N. Tschichold-Gürman, and S. J. Vestli</i> ..	312
Implementation of fuzzy systems using multilayered neural network — <i>H. Narazaki and A. L. Ralescu</i>	317
Supervised fuzzy ART: Training of a neural network for pattern classification via combining supervised and unsupervised learning — <i>H.-M. Lee and C.-S. Lai</i>	323

CHAOS, TIME SERIES PREDICTION

Perspective reversal caused by chaotic switching in PDP schema mdoel — <i>K. Sakai, T. Katayama, S. Wada, and K. Oiwa</i>	1938
A ClusNet architecture for prediction — <i>W. Hsu, L. S. Hsu, and M. F. Tenorio</i>	329
A chaotic neural unit — <i>A. A. Dingle, J. H. Andreae, and R. D. Jones</i>	335

ASSOCIATIVE MEMORIES I

A Bayesian interpretation for the Hopfield network- <i>E. R. Hancock and J. Kittler</i>	341
Hybrid location-content addressable memory — <i>B. H. Wang, S. B. Koh, and S. K. Ahn</i>	347
Retrieval process of an associative memory with non-monotonic input-output function — <i>H. Nishimori and I. Opris</i>	353
A temporal memory network with state-dependent thresholds — <i>J. Ghosh and S. Wang</i>	359

NEURAL NETWORKS THEORY I

Calculus relations in spatial summation and determination of macro connection in neuronal networks — <i>C. N. Zhang, M. Wang, and G. Z. Yao</i>	365
Some notes on perceptron learning - <i>M. Budinich</i>	371
Extension of approximation capability of three layered neural networks to derivatives — <i>Y. Ito</i>	377
Noninvertibility in neural networks - <i>R. Rico-Martinez, I. G. Kevrekidis, and R. A. Adomaitis</i>	382

APPLICATIONS TO PATTERN RECOGNITION I

A neural network isolated word recognition system for moderate sized databases - <i>A. Kuh and J. Huang</i>	387
Identification of human faces through texture-based feature recognition and neural network technology - <i>M. F. Augusteijn and T. L. Skufca</i>	392
Extended backpropagation for invariant pattern recognition neural networks — <i>P. J. Zufiria and J. Muñoz</i>	*
Inverse recall neural network model and feedback pattern recognition — <i>K. Yamada</i>	399

POSTER PAPERS

MONDAY, MARCH 29, 1993

NEWLEARNINGTECHNIQUES

An efficient training algorithm for multilayer neural networks by homotopy continuation method — *M. Zhao and X. Wang* *

A neural network that embeds its own meta-levels — *J. Schmidhuber* 407

A neural network model for real-time adaptive clustering — *L. Fu* 413

The self-organizing reduced kernel density estimator — *L. Holmström and A. Härmäläinen* 417

Bayesian case-based reasoning with neural networks -*P. Myllymäki and H. Tirri* 422

Construction of neural networks for piecewise approximation of continuous functions — *C.-H. Choi and J. Y. Choi* 428

Identification of unknown categories with probabilistic neural networks — *T. P. Washburne, D. F. Specht, and R. M. Drake* 434

Unknown parameter identification of parameterized system using multi-layered neural network -*S.-W. Kim and J.-J. Lee* 438

Scalability in neural network design: An add-on scheme — *H. C. Tseng and J. G. Liu* 444

Incremental grid growing: Encoding high-dimensional structure into a two-dimensional feature map — *J. Blackmore and R. Miikkulainen* 450

Knowledge in nonlinear local model representation -*B. Foss and T. A. Johansen* *

A connectionist approach for default inference and conflict resolution — *H. Zarazaki and A. L. Ralescu* 456

Recursive neural networks with high capacity — *C.-J. Chen and J. Y. Cheung* 462

A quickly trained ANN with single hidden layer Gaussian units — *G. Chakraborty, N. Shiratori, and S. Noguchi* 466

Non-monotonic **firing** rate of a coupled **FitzHugh–Nagumo** model — *Y. Horikawa* 473

Design of adaptive and incremental feed-forward neural networks — *H.-W. Chen and V.-W. Soo* 479

A theory of over-learning in the presence of noise — *K. Yamasaki and H. Ogawa* 485

Sigma-delta modulation neural networks — *K. F. Cheung and P. Y. H. Tang* 489

Training of neural network classifier by **combining** hyperplane with exemplar approach-*H.-M. Lee and W.-T. Wang* 494

Using spectral techniques for improved performance in artificial neural networks — *B. E. Segee* 500

Performance measures for neural nets using Johnson distributions — *W. C. Torrez, J. T. Durham, and R. D. Trueblood* 506

Experimental analysis of input weight freezing in constructive neural networks — *T.-Y. Kwok and D.-Y. Yeung* 511

Use of fractional powers to moderate **neuronal** contributions — *D. L. Hudson and M. E. Cohen* 527

Gaussian network variants: A preliminary study — *S. J. Koffman and P. H. Mechl* 523

MRAC of nonlinear systems using neural networks with recursive least squares adaptation -*K. F. Fong and A. P. Loh* 529

CONTROL AND ROBOTS

A rule-based neural controller for inverted pendulum system-*J. Hao, S. Tan, and J. Vandewalle* 534

Neural network-based robot trajectory generation -*D. Simon* 540

Time optimal control using Pi-sigma networks — *K. Iwata, J. Ghosh, and Y. Shin* 546

Neruomorphic self-tuning PID controller — *S. Akhyar and S. Omatu* 552

Dynamic neural controller with somatic adaptation-*D. H. Rao and M. M. Gupta* 558

Neurocontroller design via a performance specifier, a robot manipulator control application -*A. Kuan and B. Bavarian* *

Identification of a nonlinear multivariable dynamic process using feed-forward networks — *C. Isik and A. M. Çakmakci* 564

A supervisor for tuning controller parameters based on neural networks — *T. Yoneyama, L. F. A. Pereira, L. F. Faina, and E. Cardozo* *

Identification of a PUMA-560 two-link robot using a stable neural network — *C. M. Jubien and N. J. Dimopoulos* 568

Extended Kalman filter state estimation and enhanced gradient-descent learning algorithms for dynamic neural networks — *D. R. Seidl and R. D. Lorenz* *

SUPERVISED LEARNING

An improved learning law for backpropagation networks — *S. Zhou, D. Popovic, and G. Schulz-Ekloff* 573

Acceleration of back propagation through initial weight **pre-training** with delta rule — *G. Li, H. Alnuweiri, Y. Wu, and H. Li* 580

A direct adaptive method for faster backpropagation learning: The RPROP algorithm — *M. Riedmiller and H. Braun* 580

Backpropagation using generalized least squares — *A. P. Loh and K. F. Fong* 59:

A comparative study of some supervised neural networks — *A. I. El-Dessouki, G. A. Auda, and A. M. Darwish* 59:

Initializations, back-propagation and generalization of feed-forward classifiers — *W. F. Schmidt, S. Raudys, M. A. Kraaijveld, M. Skurikhina, and R. P. W. Duin* 59

Kohonen feature maps as a supervised learning machine — <i>H. Tamaki, M. Tsujimura, and M. Nakagawa</i>	174
Supervised learning for feed-forward neural networks: A new minimax approach for fast convergence — <i>A. Chella, A. Gentile, F. Sorbello, and A. Tarantino</i>	605

VOLUME II

TUESDAY, MARCH 30, 1993, 8:30–10:00 AM

PLENARY SESSION

Fuzzy logic controllers: From development to deployment — <i>P. P. Bonissone</i>	610
Temporal difference learning — <i>R. Sutton</i>	*

TUESDAY, MARCH 30, 1993, 11:00 AM–12:30 PM

NEW LEARNING ARCHITECTURES III

Simple addition to back-propagation learning for dynamic weight pruning, sparse network extraction and faster learning — <i>M. Heywood and P. Noakes</i>	620
Adaptive K-means algorithm with error-weighted deviation measure — <i>C. Chinrungrueng and C. H. Sequin</i>	626
Classification with missing and uncertain inputs — <i>S. Ahmad and V. Tresp</i>	1949
A multi-template learning method based on LVQ — <i>A. Sato, K. Yamada, and J. Tsukumo</i>	632

INVITED SESSION:

FROM NEUROBIOLOGY TO ARTIFICIAL NEURAL NETWORKS

Chairman and Organizer: Andras Pellionisz. NASA Ames Research Center

Object separation in dynamic neural networks — <i>H. J. Reitboeck, M. Stoecker, and C. Hahn</i>	638
Neuroanatomy of neural networks of the vestibular system: Vestibular maculas as prototypic neuronal networks — <i>M. D. Ros</i>	642
Computational and experimental analysis of learning in primate eye movements — <i>S. Lisberger</i>	*
Artificial cerebellum ACE: Tensor network transformer enabling virtual movement in virtual environment; facilitating teleoperation in telepresence — <i>A. J. Pellionisz, D. L. Tomko, and C. C. Jorgensen</i>	648

SENSATION AND PERCEPTION

A sensory information processing system using neural networks — <i>D. Masumoto, T. Kimoto, and S. Nagata</i>	655
preserving visual perception by learning natural clustering — <i>W. Chang, H. S. Soliman, and A. H. Sung</i>	661
Bimodal sensor integration on the example of ‘speechreading’ — <i>C. Bregler, S. Manke, H. Hild, and A. Waibel</i>	667
Sensory fusion: Integrating visual and auditory information for recognizing speech — <i>G. J. Wolff</i>	672

OTHER APPLICATIONS OF NEURAL NETWORKS II

A neural network approach to the consistent labeling problem — <i>J. Feng, W. Tao, and H. Burkhardt</i>	678
Visualizing weight dynamics in <i>the N-2-N</i> encoder — <i>R. Lister</i>	684
On-line sensing of drill wear using neural network approach — <i>T. I. Liu and K. S. Anantharaman</i>	690
Performance of a neural net scheduler used in packet switching interconnection networks — <i>M. Mittler and P. Tran-Gia</i>	695

HARDWARE IMPLEMENTATIONS II

Analog CMOS implementations of backward error propagation — <i>Y. Wang</i>	701
Modular neural network hardware implementation of analog-digital mixed operation — <i>I.-S. Han</i>	707
Stochastic arithmetic implementations of neural networks with in situ learning — <i>J. A. Dickson, R. D. McLeod, and H. C. Card</i>	711
A novel counter circuit using a multi-level neuron with a self-feedback weight — <i>J.-d. Yuh and R. W. Newcomb</i>	717

APPLICATIONS TO IMAGE PROCESSING II

A two-stage neural net for segmentation of range images — <i>S. Ghosal and R. Mehrotra</i>	721
Image compression using topological maps and MLP — <i>G. Burel and J.-Y. Catros</i>	727
A neural network for perceptual grouping, based on architecture of the primary visual cortex, efficient for texture segregation in complex natural images — <i>J.-L. Anton, P. Marchal, and Y. Burnod</i>	732
Adaptive retina-like preprocessing for imaging detector arrays — <i>D. A. Scribner, K. A. Sarkady, M. R. Krueer, J. T. Caulfield, J. D. Hunt, M. Colbert, and M. Descour</i>	195*

TUESDAY, MARCH 30, 1993, 2:00-3:30 PM

NEURO-CONTROL II

Three applications of artificial neural networks for control — <i>J. A. Franklin</i>	73
Dynamic neural unit and function approximation — <i>D. H. Rao and M. M. Gupta</i>	74
A neural controller for the tracking control of flexible arms — <i>W. Cheng and J. T. Wen</i>	74
Neural plant inverse control approach to color error reduction for scanner and printer — <i>G.-W. Chang and P.-R. Chang</i>	19'

SENSORIMOTOR, BIOLOGICAL, AND CEREBELLUM MODELS II

A neural network architectural model of visual cortical cells for texture segregation — <i>G. M. Bisio, D. D. Caviglia, G. Indiveri, L. Raffo, and S. P. Sabatini</i>	7
An algorithm of eye movement in selective fixation — <i>T. Yagi, K. Gouhara, and Y. Uchikawa</i>	7
A high level Petri net model of olfactory bulb — <i>K. Venkatesh and O. Masory</i>	7
Low level modeling of the development of directionally selective microcircuits in cat striate <i>cortex</i> — <i>A. H. Fagg and J. Fiser</i>	7

SUPERVISED LEARNING II

A fast supervised-learning algorithm for large, multilayered neural networks — <i>D. L. Prados</i>	
An adaptive structure neural network using an improved back-propagation learning algorithm — <i>H. F. Yin and K. Khorasani</i>	
Robustness of feedforward neural networks — <i>C.-T. Chiu, K. Mehrotra, C. K. Mohan, and S. Ranka</i>	
A fast supervised learning scheme for recurrent neural networks with application to associative memory design — <i>H. C. Tseng, V. H. Hwang, and L. Lu</i>	

HYBRID (NEURAL NETWORK AND EXPERT) SYSTEMS II

Task decomposition and competing expert system-artificial neural net objects for reliable and real <i>time</i> inference — <i>R. Khosla and T. S. Dillon</i>	
Rule refinement with recurrent neural networks — <i>C. L. Giles and C. W. Omlin</i>	
A neural production system and its application in visual-guided mobile robot navigation — <i>M. Meng</i>	
A neural network solution for the correspondence problem — <i>J. H. van Deemter and H. A. K. Mastebroek</i>	

ROBOTICS AND AUTOMATION

A neural network with Hebbian-like adaptation rules learning visuomotor coordination of a PUMA robot — <i>T. Martinetz and K. Schulten</i>	
An integrated approach to cellular mobile communication planning using traffic data prestructured by a self-organizing feature map — <i>T. Fritsch and S. Hanshans</i>	
Synthesis of mechanical linkages using artificial neural networks and optimization — <i>J. C. Hoskins and G. A. Kramer</i>	
Autonomous trajectory generation of a biped locomotive robot using neuro oscillator — <i>Y. Kurematsu, T. Maeda, and S. Kitamura</i>	

TUESDAY, MARCH 30, 1993, 4:30-6:00 PM

NEW LEARNING ARCHITECTURES IV

NNP: A neural net classifier using prototypes — <i>C. Decaestecker</i>	
A fault tolerant optimal interpolative net — <i>D. Simon and H. El-Shef</i>	

RECURRENT NEURAL NETWORKS II

Recurrent neural networks for temporal learning of time *series* — V. *Sterzing and B. Schürmann*..... 843
 Gradient computation in time delayed recurrent neural network with memory for static input-output mapping under stability
 constraint — V. *Chandrasekaran, M. Palaniswami, and T. M. Caelli*..... 851
 A cascaded recurrent neural network for real-time nonlinear adaptive filtering -L. *Li and S. Haykin*.....,..... 857

GENETIC ALGORITHMS II

Evolving neural network connectivity -J. R. *McDonnell and D. Waagen*..... 863
 A method for the design of evolutionary multilayer neural networks -S.-K. *Sin and R. J. P. deFigueiredo*..... 869
 Using evolutionary programming to create neural networks that are capable of playing *tic-tac-toe* — D. B. *Fogel*..... 875
 Evolving a sort: Lessons in genetic programming — K. E. *Kinrear, Jr.*..... 881

ASSOCIATIVE! MEMORIES II

Associative storage and retrieval of highly correlated natural pattern sets in diluted **Hopfield** networks-K.-R. *Müller, T. Stiefvater*,
and H. Janben..... 889
 The hybrid Hopfield-clique memory with perfect storage-J. *Ueberla and A. Jagota*..... 895
 Multi-layer associative neural networks (M.A.N.N.): Storage capacity vs. noise-free recall-H. *Kang*..... 901
 Large scale simulations of a spin glass image associative memory -B. E. *Rosen and J. M. Goodwin*..... 908

NEURAL NETWORKS THEORY II

Partitions of unity improve neural function approximators — H. W. *Werntges*..... 914
 On the speed of training networks with correlated features — R. R.N. *Bakker, M. A. Kraai'eld, R. P. W. Duin, and W. F. Schmidt* . 919
 A neural network model based on differential-algebraic equations for nonlinear programming — M. *Xiong, J. Arnold, and H. J.*
Chen..... 923
 On the convergence of feed forward neural networks incorporating terminal attractors — C. R. *Jones and C. P. Tsang*..... 929

APPLICATIONS TO PATTERN RECOGNITION II

An efficient algorithm for the binary classification of patterns using MLP-networks — S. *Fanelli, M. Di Martino, and M. Protasi* . 936
 On-line handwritten symbol recognition, using an ART based neural network hierarchy — Y. A. *Dimitriadis, J. L. Coronado, C. G.*
Moreno, and J. M. C. Izquierdo..... 944
 Power curves for pattern classification networks -J. M. *Twomey and A. E. Smith*..... 950
 Networks that approximate vector-valued mappings — F. A. *Mussa-Ivaldi and F. Gandolfo*..... **LATE ARRIVAL** 1973

POSTER PAPERS

TUESDAY, MARCH 30, 1993

NEURAL NETWORK THEORY

Towards an event-space self-configurable neural network -D. K. Y. *Chiu*..... 956
 A serial complexity measure of neural networks — M. *Sipper*..... 962
 Use of Kohonen's self-organizing network as a pre-quantizer — S. A. *Khaparde and H. Gandhi*..... 967
 Approximation and radial-basis-function networks -J. *Park and I. W. Sandberg*..... *
 Asymptotic properties of **Oja's** learning equation in subspace networks — W.-Y. *Yan, U. Helmke, and J. B. Moore*..... *
 An asynchronous neural network model for shortest path problem — S. *Zhao and T. S. Dillon*..... 972
 Single minimum method for combinatorial optimizatin problems and an efficient algorithm of TSP problem — D. *Xu and I.*
Kumau nva..... 977

On the learning and convergence of the radial basis networks — <i>F.-C. Chen and M.-H. Lin</i>	983
Polynomial and standard higher order neural network— <i>C.-H. Chang, J.-L. Lin, and J. Y. Cheung</i>	989
Improved convergence for output scaling of a feedforward network with linear output nodes - <i>D. I. Soloway</i>	995

NEURO-FUZZY SYSTEMS, HYBRID SYSTEMS

Implementation of $O(n)$ complexity max/min circuits for fuzzy and connectionist computing — <i>M. H. Hassoun and A. M. Nabha</i> ..	998
Robotic modeling and control using a fuzzy neural network — <i>H. Y. Xu and G. Vukovich</i>	1004
A neuro-fuzzy approach with pairwise comparisons — <i>H. Ichihashi and I. B. Turksen</i>	1010
Fuzzified RBF network-based learning control: Structure and self-construction - <i>D. A. Linkens and J. Nie</i>	1016
A fuzzy neural network learning fuzzy control rules and membership functions by fuzzy error backpropagation — <i>D. Nauck and R. Kruse</i>	1022
ARTSYS: A new fuzzy classifier — <i>E. Maillard and B. Zerr</i>	*
Comparing learning Performance of neural networks and fuzzy systems - <i>C.-C. Jou</i>	1028
Inherent fault tolerance analysis for a class of multi-layer neural networks with weight deviations - <i>X. Yang and T. Chen</i>	1034

ASSOCIATIVE MEMORIES

Networks based on Kanerva's sparse distributed memory: Results showing their strengths and limitations and a new algorithm to design the location matching layer — <i>R. W. Prager</i>	1040
Noise corrupted pattern retrieval capability for sparsely encoded associative memory — <i>Y.-P. Huang and D. Gustafson</i>	1046
Sparse distributed memory for multivalued patterns- <i>J. Vanhala, J. Saarinen, and K. Kaski</i>	1051
A new associative memory which inhibits a meaningless output — <i>T. Tanaka and M. Yamada</i>	1057
On the equivalence of two Hopfield-type networks — <i>T. Grossman and A. Jagota</i>	1063
Design of Hopfield content-addressable memories — <i>X. Zhuang and Y. Huang</i>	1069
Training a Hopfield memory with noisy examples - <i>E. C. Segura</i>	1075

OPTIMIZATION

Analog implementations of a binary relation inference network for minimum cost path problems — <i>C. W. Tong and K. P. Lam</i> ..	108:
Strictly digital neurocomputer based on a paradigm of constraint set programming for solving combinatorial optimization problems — <i>T. Nakagawa, K. Murakami, and H. Kitagawa</i>	108:
Neural networks for solving the quadratic 0-1 programming problem under linear constraints - <i>M. Aourid and B. Kaminska</i>	109
A real-time solution for the traveling salesman problem using a Boolean neural network — <i>S. Bhide, N. John, and M. R. Kabuka</i> ..	109

GENETIC ALGORITHMS

Genetic algorithms and simulated annealing: A marriage proposal - <i>D. Adler</i>	110
Retaining diversity of genetic algorithms for multivariable optimization and neural network learning — <i>Y. Ichikawa and Y. Ishii</i> ..	111
Genetic algorithm based input selection for a neural network function approximator with applications to SSME health monitoring — <i>C. C. Peck, A. P. Dhawan, and C. M. Meyer</i>	111
A dynamic routing control based on a genetic algorithm — <i>N. Shimamoto, A. Hiramatsu, and K. Yamasaki</i>	11:

RECURRENT NEURAL NETWORKS

A comparison of recurrent neural network learning algorithms — <i>A. M. Logar, E. M. Corwin, and W. J. B. Oldham</i>	11:
Dynamics and stability of multilayered recurrent neural networks — <i>L. Jin, P. N. Nikiforuk, and M. M. Gupta</i>	11:
Putting the simple recurrent network to the test — <i>J.-F. Jodouin</i>	11:

VOLUME III

WEDNESDAY, MARCH 31, 1993, 8:30–10:00 AM

JOINT FUZZ-IEEE '93-ICNN '93 PLENARY SESSION

The evolution of analog electronic neural networks — <i>C. Mead</i> , *	*
Things you haven't heard about the self-organizing map — <i>T. Kohonen</i>	1147

NEWLEARNING ARCHITECTURES V

A new acceleration technique for backpropagation algorithm - <i>X. Yu, N. K. Loh, and W. C. Miller</i>	1157
Fuzzy function learning with covariance ellipsoids - <i>J. A. Dickerson and B. Kosko</i>	1162
Learning in the hypercube — <i>V. A. Pedroni and A. Yariv</i>	1168
Learning trajectories with a hierarchy of oscillatory modules — <i>P. Baldi and N. B. Toomarian</i>	1172
Neural network construction using multi-threshold quadratic sigmoidal neurons — <i>C.-C. Chiang and H.-C. Fu</i>	1177

INVITED SESSION:

RECURRENT NEURAL NETWORKS III

Chairman and Organizer: C. Lee Giles, NEC Corporation

Convergence of learning in recurrent neural networks — <i>H. White, C.-M. Kuan, and K. Hornik</i> *	*
The problem of learning long-term dependencies in recurrent networks — <i>Y. Bengio, P. Frasconi, and P. Simard</i>	1183
Practical considerations for Kalman filter training of recurrent neural networks — <i>G. V. Puskorius and L. A. Feldkamp</i>	1189
Constructive learning of recurrent neural networks-D. <i>Chen, C. L. Giles, G. Z. Sun, H. H. Chen, Y. C. Lee, and M. W. Goudreau</i>	1196

UNSUPERVISED LEARNING I

An unsupervised learning rule for vector normalization and gain control — <i>M. M. Van Hulle</i>	1202
Is LQV really good for classification?-An interesting alternative — <i>W. Poehmueller, M. Glesner, and H. Juergs</i>	1207
Fast non-linear dimension reduction — <i>N. Kambhatla and T. K. Leen</i>	1213
Error potentials for self-organization — <i>T. M. Heskes and B. Kappen</i>	1219

OTHER APPLICATIONS OF NEURAL NETWORKS III

Intelligent FMS scheduling using modular neural networks - <i>L. Rabelo, Y. Yih, A. Jones, and G. Witzgall</i>	1224
Application of neural networks to fluorescent diagnostics of organic pollution in natural waters — <i>Y. V. Orlov, I. G. Persiantsev, and S. P. Rebrik</i>	1230
Classification of chromosomes using a combination of neural networks — <i>P. A. Errington and J. Graham</i>	1236
Two-bit weights are enough to solve vehicle license number recognition problem — <i>F. Lisa, J. Carrabina, C. Pérez-Vicente, N. Avellana, and E. Valderrama</i>	1242

HARDWARE IMPLEMENTATIONS III

An analog wavelet transform chip — <i>R. T. Edwards and M. D. Godfrey</i>	1247
Hardware implementation of an artificial neural network - <i>N. M. Botros and M. Abdul-Aziz</i>	1252
A neural network systems component — <i>D. Mueller and D. Hammerstrom</i>	1258
Process models and networks complexity — <i>E. A. Rietman, R. C. Frye, and E. R. Lory</i>	1265

APPLICATIONS TO IMAGE PROCESSING III

A multi-layer Kohonen's self-organizing feature map for range image segmentation — <i>J. Koh, M. Suk, and S. M. Bhandarkar</i>	1270
Segmentation of medical images through competitive learning - <i>A. P. Dhawan and L. Arata</i>	1277

WEDNESDAY, MARCH 31, 1993, 2:00–3:30 PM

NEURO-CONTROL III

Honfield-based adaptive state estimators -R. *Shoureshi and S. R. Chu* , 12

Design of fault tolerant neurocontrollers using immunization technique-D. *U. Ekong, M. H. Abd-El-Barr, and H. C. Wood.* 12

An adaptive-topology neural architecture and algorithm for nonlinear system identification — *G. Govind and P. A. Ramamoorthy.* 13

Self-tuning adaptive control of multi-input multi-output nonlinear systems using multilayer recurrent neural networks with application to synchronous power generators — *I. Muhsin, S. I. Sudharsanan, and M. K. Sundareshan* 13

INVITED SESSION:

REVERSE ENGINEERING

Chairman Lawrence W. Stark, University of California, Berkeley

Neural nets, random design and reverse engineering (*Special Invited Lecture*) — *L. W. Stark.* 1:

The role of neural networks in the study of the posterior parietal cortex -*P. Mazzoni and R. A. Andersen* 1:

Color opponency as the internal representation acquired by a three-layer neural network model (*Special Invited Lecture*) — *S. Usui and S. Nakauchi.*..... 1

A relationship between neural networks and programmable logic arrays — *V. Eliashberg.*..... 1

PROBABILISTIC NEURAL NETWORKS

Minimum description length pruning and maximum mutual information training of adaptive probabilistic neural networks — *W. Fakhr and M. I. Elmasry.*..... 1

Receptive field estimation for Gaussian-based neural networks — *M. T. Musavi* 1

Invariance constraints for improving generalization in probabilistic neural networks — *H. G. C. Tråvén* 1

BAYESNET: Bayesian classification network based on biased random competition using Gaussian kernels — *S. Lee and S. Shimoji.*

ASSOCIATIVE MEMORIES III

How lateral interaction develops in a self-organizing feature map — *J. Sirosh and R. Miikkulainen.* 1

Quantization effects of Hebbian-type associative memories — *P.-C. Chung, Y.-N. Chung, and C.-T. Tsai* 1

Further cross talk reduction of associative memory and exact data retrieval — *Y. Kumagai, J. Kamruzzaman, and H. Hikita* 1

Convergence of higher-order neural networks with modified updating — *M. Vidyasagar* 1

HYBRID (NN AND EXPERT SYSTEMS) III

A theory on a neural net with non-monotone neurons — *H.-F. Yanai and S.-i. Amari* 1

The back-extract algorithm for extracting production rules from neural nets -*E. Bar-On and A. Pollack* 1

Adaptive mixtures of local experts are source coding solutions — *P. T. Szymanski and M. D. Lemmon*..... 1

Extraction of semantic rules from trained multilayer neural networks — *R. Kane and M. Milgram* 1

APPLICATIONS TO PATTERN RECOGNITION III

Analysis, modeling and estimation through a similarity based approach: An economic signal case study — *A. C. G. Thome and M. F. daMotaTenorio* 1

Combined mutually connected neural network model for higher order association-A. *Iwata and N. Kobayashi* 1

On decomposing MLPS — *S. Lucas, Z. Zhao, G. Cawley, and P. Noakes* 1

Stock ranking: Neural networks vs multiple linear regression -*A. N. Refenes, M. Azema-Barac, and A. D. Zapranis.* 1

NEW LEARNING ARCHITECTURES VI

Vectorized backpropagation and automatic pruning for MLP network optimization-s. <i>Stalin and T. V. Sreenivas</i>	1427
A neural network to solve discrete dynamic programming problems — <i>R. A. Fruncelin and F. A. C. Gomide</i>	1433
CMAC learning is governed by a single parameter — <i>Y.-f. Wong</i>	1439
A competitive and selective learning method for designing optimal vector quantizers - <i>N. Ueda and R. Nakano</i>	1444

SYSTEM MODELING AND CONTROL

Chairman: Lawrence Stark, University of California, Berkeley

Bee-havior in a mobile robot: The construction of a self-organized cognitive map and its use in robot navigation within a complex, natural environment — <i>A. Walker, J. Hallam, and D. Willshaw</i>	1451
Self-architecture-Theory and experiment of biological neural network — <i>H. Szu, J. Kim, and I. Kim</i>	1457
Adaptive predictive control of nonlinear time-varying systems using neural networks (<i>Special Invited Lecture</i>)- <i>Y. Takahashi</i> ..	1464
Neural networks and walking <i>robots (Special Invited Lecture)</i> — <i>G. Bekey</i>	*

UNSUPERVISED LEARNING II

Self-generating vs. self-organizing, what's different? — <i>W. X. Wen, V. Pang, and A. Jennings</i>	1469
An extended self-organizing map with gated neurons — <i>V. Chandrasekaran, M. Palaniswami, and T. M. Caelli</i>	1474
Recursive least-squares approach to self-organizing maps — <i>V. T. Ruoppilu, T. Sorsa, and H. N. Koivo</i>	1480
Unsupervised learning for multivariate probability density estimation: Radial basis and projection pursuit — <i>J.-N. Hwang, S.-R. Lay, and A. Lippman</i>	1486

OTHER APPLICATIONS OF NEURAL NETWORKS IV

A neural network to diagnose liver cancer — <i>P. S. Maclin and J. Dempsey</i>	1492
Fully parallel summation in a new stochastic neural network architecture — <i>C. L. Janer, J. M. Quero, and L. G. Franquelo</i>	1498
Distributed syntactic representations with an application to part-of-speech tagging - <i>H. Schültze</i>	1504
Neural and associative modules in a hybrid dynamic system for visual industry quality control — <i>A. König, H. Genther, and M. Glesner</i>	1510

NEURAL NETWORKS THEORY III

Analysis of Linsker-type Hebbian learning: Rigorous results — <i>J. Feng and H. Pan</i>	1516
Continuous time modeling of nonlinear systems: A neural network-based approach - <i>R. Rico-Martinez and I. G. Kevrekidis</i>	1522
Optimization by reduction to maximum clique - <i>A. Jagota</i>	1526

APPLICATIONS TO SIGNAL PROCESSING I

Feature extraction of event-related potential waveforms by neural networks — <i>F. Y. Wu, J. D. Slater, R. E. Ramsay, and L. S. Honig</i> ..	1532
Neural network techniques for multi-user demodulation — <i>U. Mitra and H. V. Poor</i>	1538
Wavelet neural networks and receptive field partitioning — <i>T. I. Boubez and R. L. Peskin</i>	1544
Generation of traveling wave mode in a chained neural oscillator network model — <i>H. Nagashino, K. Kakuyama, and Y. Kinouchi</i> ..	1550

POSTER PAPERS

WEDNESDAY, MARCH 31, 1993

APPLICATIONS TO PATTERN RECOGNITION, IMAGE PROCESSING, AND SIGNAL PROCESSING

Image compression using stochastic neural networks — <i>Y. Liu</i>	1558
Employing shape to aid magnetic resonance brain segmentation - <i>A. J. Worth and D. N. Kennedy</i>	1564
A new analytical method for AM neural networks and its application to pattern recognition- <i>M. Zhenjiang and Y. Buozong</i>	1570
Design of an elliptical neural network with application to degraded character classification — <i>M. C. Moed and C.-P. Lee</i>	1576

Parallel implementation of time delay neural networks for phoneme recognition — <i>D. M. Weber</i>	158:
Multiresolution neural networks for omnifont character recognition — <i>J. Wang and J. Jean</i>	1581
A pattern recognition ANN that acts as its own inband and/or bandpass filter — <i>M. E. Ulug</i>	159
An ARTMAP based hybrid neural network for shift invariant Chinese character recognition — <i>C.-A. Hung and S.-F. Lin</i>	160
Connectionist network for feature extraction and classification of English alphabetic characters - <i>S. W. Khobragade and A. K. Ray</i>	160
Superresolution of multi-frequency signals using multilayer neural network supervised by backpropagation algorithm — <i>K. Hara and K. Nakayama</i>	161
Representing visual schemas in neural networks for scene analysis — <i>W. K. Leow and R. Mikkuluinen</i>	161
A comparison of neural network and nearest-neighbor classifiers of handwritten lower-case letters — <i>T. M. English, M. del Pilar Gomex-Gil, and W. J. B. Oldham</i>	161
Self-organized color image quantization for color image data compression — <i>K.R. L. Godfrey and Y. Attikiouzel</i>	162
Application oriented automatic structuring of time-delay neural networks for high performance character and speech recognition — <i>U. Bodenhausen and A. Waibel</i>	162
A display oriented technique for interactive pattern recognition by multilayer neural network - <i>M. Daoudi, D. Hamad, and J.-G. Postaire</i>	163

OTHER APPLICATIONS OF NEURAL NETWORKS

Parallel comparison of neural networks in a processor pipeline with partially shared memory — <i>Y. Okawa and H. Suyama</i>	163
A scaly artificial neural network architecture for isolated word recognition using the British telecommunications English alphabet database — <i>M. J. Creaney and R. N. Gorgui-Naguib</i>	164
Fuzzy neural networks with fuzzy weights and fuzzy biases - <i>H. Ishibuchi, H. Tanaka, and H. Odaka</i>	165
Blind bilevel image restoration using Hopfield neural networks - <i>H.-J. Liu and Y. Sun</i>	165
Detection of tonals in lofagrams using connectionist methods — <i>D. M. Weber and C. C. Krieger</i>	166
An application of neural networks in adaptive information retrieval — <i>S. K. M. Wong, Y. J. Cai, and Y. Y. Yao</i>	166
SCRIPT-A prototype for the recognition of continuous, cursive, handwritten input by means of a neural network simulator — <i>B. Harriehausen-Mühlbauer and A. Koop</i>	167
A local neural implementation of histogram equalization — <i>T. H. Hildebrandt</i>	167
Triphone- and word-based self-structuring hidden control neural models - <i>H. B. D. Sorensen</i>	167
Performance of multilayer neural networks in binary-to-binary mappings under weight errors- <i>N. S. Orzechowski, S. R. T. Kumara, and C. R. Das</i>	168
Maximum likelihood sequence estimation of minimum shift keying modulated signals using a Hopfield neural network- <i>G. Pfeiffer</i>	169
3D motion estimation using single perspective sparse range data via surface reconstruction neural networks - <i>J.-N. Hwang and Y.-H. Tseng</i>	169
Textured image segmentation via neural network probabilistic modeling - <i>J.-N. Hwang and E. T.-Y. Chen</i>	170
Stone impact damage to automotive paint finishes a neural net analysis of electrochemical impedance data - <i>A. C. Ramamurthy and M. Uriquidi-Macdonald</i>	170
An approximation network for measurement systems - <i>M. B. Zaremba, E. Porada, and W. J. Bock</i>	171
Evaluation of the performance of various artificial neural networks to the signal fault diagnosis in nuclear reactor systems — <i>S. Keyvan, A. Durg, and L. C. Rabelo</i>	171
Multi-layer back-propagation neural networks for finance analysis — <i>J. Thomas, B. J. Sheu, and C.-F. Chang</i>	171
Neural networks as massively parallel automatic test pattern generators - <i>A. Majumder and R. Dandapani</i>	171
Detection of type-specific herpesvirus antibodies by neural network classification of Western blot densitometer scans — <i>J. M. Lamiell, J. A. Ward, and J. K. Hilliard</i>	171
Neural net simulation with MUSIC — <i>U. A. Müller, A. Gunzinger, and W. Guggenbühl</i>	171
Neural network approach to identify batch cell growth — <i>M. J. Syu and G. T. Tsao</i>	171
Optimal parallel back-propagation schemes for mesh-connected and bus-connected mutiprocessors — <i>T. Yukawa and T. Ishikawa</i>	171
Using neural networks for underwater target ranging - <i>R. J. F. Dow and J. Sietsma</i>	171
An application of neural networks in the control of chemical reactors — <i>F. Panetos, A. Garcia, and J. M. Zaldival</i>	171
Speech synthesis with artificial neural networks — <i>T. Weijters and J. Thole</i>	171
Automatic speech recognition using hidden Markov models and artificial neural networks - <i>N. M. Botros, M. Siddiqi, and M. Z. Deiri</i>	171
On the comparison results of the neural networks trained using well-logs from one service company and tested on another service company's data — <i>H. A. Malki and J. L. Baldwin</i>	171
Neuralnetwork based hybrid lung nodule detection (HLND) system- <i>Y.-M. F. Lure, Y.-S. P. Chiou, J.-S. J. Lin, P. A. Ligomenides, M. T. Freedman, and S. Fritz</i>	171

UNSUPERVISED LEARNING

Identification of high noise time series signals using hybrid ARMA modeling and neural network approach — <i>X. Feng and J. Schulteis</i>	1780
Results of the time series prediction competition at the Sante Fe Institute - <i>A. S. Weigend and N. A. Gershenfeld</i>	1786

THURSDAY, APRIL 1, 1993, 8:30–10:00 AM

PLENARY SESSION

Neural networks and intelligent systems — <i>K. Narendra</i>	*
Simultaneous discovery of detectors and a way of using the detectors via genetic programming - <i>J. R. Koza</i>	1794

THURSDAY, APRIL 1, 1993, 11:00 AM–12:30 PM

NEW LEARNING ARCHITECTURES VII

An analytical learning algorithm for the dendro-dendritic artificial neural network via <i>linear</i> programming — <i>B. Ling and F. M. A. Salam</i>	1802
Lambda learning rule for feedforward neural networks - <i>J. M. Zurada</i>	1808
A method of training multi-layer networks with heaviside characteristics using internal representations — <i>R. J. Guynier and T. Downs</i>	1812
Backpropagation for linearly-separable patterns: A detailed analysis - <i>P. Frasconi, M. Gori, and A. Tesi</i>	1818

NEURO-FUZZY SYSTEMS II

The use of fuzzy membership in network training for isolated word recognition — <i>Y. Qi, B. R. Hunt, and N. Bi</i>	1823
Evolving fuzzy clusters — <i>D. B. Fogel and P. K. Simpson</i>	1829
Neurofuzzy interpretation--II: Reducing complexity of description — <i>M. Regattieri, F. J. V. Zuben, and A. F. Rocha</i>	1835
Puzzy miu-max networks for function approximation - <i>P. K. Simpson and G. Jahns</i>	1967

RADIAL BASIS FUNCTIONS

Combination of radial basis function neural networks with optimized learning vector quantization — <i>M. Vogt</i>	1841
Comparative fault tolerance of generalized radial basis function and multilayer perceptron networks- <i>B. E. Segee and M. J. Curter</i>	1847
Radial basis functions and multilayer feedforward neural networks for optimal control of nonlinear stochastic systems — <i>T. Parisini and R. Zoppoli</i>	1853
Robust construction of radial basis function neural networks for classification- <i>S.-R. Lay and J.-N. Hwang</i>	1859

OTHER APPLICATIONS OF NERUAL NETWORKS V

Improved CNC machining using NARMA neural systems — <i>W.-R. Chang and B. Fernández</i>	1865
Neural and cognitive modeling of analogical reasoning — <i>F. Blanc, S. Allemand, M. Dufossé, and E. Sanchez</i>	1871
Failure diagnosis system on pneumatic control valves by neural network — <i>T. Nogami, Y. Yokoi, M. Kasai, K. Kawai, and K. Takaura</i>	1876
Swinging up a pendulum into its upright position using a reward/punishment learning method — <i>K. Krutochwil, R. Engelbrecht, and H. P. Jörgl</i>	*

HARDWARE IMPLEMENTATIONS IV

Implementation of a multilayer perceptron network using an optically addressed photoconductive array — <i>R. G. Stearns</i>	1882
Problems of massive parallelism in neural network simulation — <i>A. Zell, N. Mache, M. Vogt, and M. Hüttel</i>	1890
Neural network controller for rearrangeable switching networks — <i>Y.-K. Park and V. Cherkassky</i>	1896

APPLICATIONS TO SIGNAL PROCESSING II

A sound localization system based on biological analogy - <i>N. Bhadkamkar and B. Fowler</i>	1902
Using elastic nets for correspondence in range data — <i>A. Joshi and C.-H. Lee</i>	1908

Auditory model representation and comparison for speaker recognition - <i>J. M. Colombi, T. R. Anderson, S. K. Rogers, D. W. Ruck, and G. T. Warhola</i>*	1914
Prediction-based networks with ECG application - <i>J. S. Taur and S. Y. Kung</i>	1920

THURSDAY, APRIL 1, 1993, 2:00-3:30 PM

NEURO-CONTROL IV

Time-optimal terminal control using neural networks - <i>E. S. Plumer</i>	1926
Neural net based lateral vehicle control learned by human steering examples — <i>S. Neußer, J. A. G. Nijhuis, L. Spaanenburg, B. Höfflinger, U. Franke, and H. Fritz</i>*	*
Self-organizing maps for dynamic process modeling - <i>H. Hyötyniemi</i>*	*
System identification using ARMA modeling and neural networks — <i>S. C. Bose and B. R. Pramod</i>*	*
