0. Introduction 1

0.1 Finite Sums 1
0.11 Progressions 1
0.12 Sums of powers of natural numbers 1
0.13 Sums of reciprocals of natural numbers 3
0.14 Sums of products of reciprocals of natural numbers 3
0.15 Sums of the binomial coefficients 4
0.2 Numerical Series and Infinite Products 6
0.21 The convergence of numerical series 6
0.22 Convergence tests 6
0.23-0.24 Examples of numerical series 8
0.25 Infinite products 14
0.26 Examples of infinite products 15
0.3 Functional Series 16
0.30 Definitions and theorems 16
0.31 Power series 17
0.32 Fourier series 20
0.33 Asymptotic series 22
0.4 Certain Formulas from Differential Calculus 23
0.41 Differentiation of a definite integral with respect to a parameter 23
0.42 The *nth* derivative of a product 23
0.43 The *nth* derivative of a composite function 24

1. Elementary Functions 26

1.1 Power of Binomials 26
1.11 Power series 26
1.12 Series of rational fractions 27

1.2 The Exponential Function 27
1.21 Series representations 27
1.22 Functional relations 28
1.23 Series of exponentials 28
1.3-1.4 Trigonometric and Hyperbolic Functions 29
1.30 Introduction 29
1.31 The basic functional relations 29
1.32 The representation of powers of trigonometric and hyperbolic functions in terms of functions of multiples of the argument (angle) 31
1.33 The representation of trigonometric and hyperbolic functions of multiples of the argument (angle) in terms of powers of these functions 33
1.34 Certain sums of trigonometric and hyperbolic functions 36
1.35 Sums of powers of trigonometric functions of multiple angles 37
1.36 Sums of products of trigonometric functions of multiple angles 38
1.37 Sums of tangents of multiple angles 39
1.38 Sums leading to hyperbolic tangents and cotangents 39
1.39 The representation of cosines and sines of multiples of the angle as finite products 40
1.41 The expansion of trigonometric and hyperbolic functions in power series 42
1.42 Expansion in series of simple fractions 43
1.43 Representation in the form of an infinite product 44
1.44– 1.45 Trigonometric (Fourier) series 45
1.46 Series of products of exponential and trigonometric functions 50
1.47 Series of hyperbolic functions 50
1.48 Lobachevskiy's "Angle of parallelism" $\Pi(x)$ 50
1.49 The hyperbolic amplitude (the Gudermannian) gd x 51
1.5 The Logarithm 52
1.51 Series representation 52
1.52 Series of logarithms 54
1.6 The Inverse Trigonometric and Hyperbolic Functions 55
1.61 The domain of definition 55
1.62-1.63 Functional relations 55
1.64 Series representations 59

2. Indefinite Integrals of Elementary Functions 62

2.0 Introduction 62
2.00 General remarks 62
2.01 The basic integrals 63
2.02 General formulas 64
2.1 Rational Functions 66
2.10 General integration rules 66
2.11–2.13 Forms containing the binomial $a + bx^k$ 68
2.14 Forms containing the binomial $1 \pm x^n$ 75
2.15 Forms containing pairs of binomials: $a + bx$ and $\alpha + \beta x$ 79

2.16 Forms containing the trinomial $a + bx^k + cx^{2k}$ 80
2.17 Forms containing the quadratic trinomial $a + bx + cx^2$ and powers of x 81
2.18 Forms containing the quadratic trinomial $a + bx + cx^2$ and the binomial $\alpha + \beta x$ 83
2.2 Algebraic Functions 84
2.20 Introduction 84
2.21 Forms containing the binomial $a + bx^k$ and $\sqrt{x}$ 85
2.22–2.23 Forms containing $\sqrt[n]{(a + bx)^k}$ 87
2.24 Forms containing $\sqrt{a + bx}$ and the binomial $\alpha + \beta x$ 91
2.25 Forms containing $\sqrt{a + bx + cx^2}$ 97
2.26 Forms containing $\sqrt{a + bx + cx^2}$ and integral powers of x 98
2.27 Forms containing $\sqrt{a + cx^2}$ and integral powers of x 104
2.28 Forms containing $\sqrt{a + bx + cx^2}$ and first- and second-degree polynomials 108
2.29 Integrals that can be reduced to elliptic or pseudo-elliptic integrals 109
2.3 The Exponential Function 111
2.31 Forms containing e^{ax} 111
2.32 The exponential combined with rational functions of x 112
2.4 Hyperbolic Functions 113
2.41–2.43 Powers of sh x, ch x, th x and cth x 113
2.44–2.45 Rational functions of hyperbolic functions 130
2.46 Algebraic functions of hyperbolic functions 139
2.47 Combinations of hyperbolic functions and powers 146
2.48 Combinations of hyperbolic functions, exponentials, and powers 155
2.5–2.6 Trigonometric Functions 158
2.50 Introduction 158
2.51-2.52 Powers of trigonometric functions 158
2.53-2.54 Sines and cosines of multiple angles and of linear and more complicated functions of the argument 169
2.55-2.56 Rational functions of the sine and cosine 179
2.57 Forms containing $\sqrt{a \pm b \sin x}$, or $\sqrt{a \pm b \cos x}$ and forms reducible to such expressions 187
2.58-2.62 Integrals reducible to elliptic and pseudo-elliptic integrals 191
2.63-2.65 Products of trigonometric functions and powers 225
2.66 Combinations of trigonometric functions and exponentials 237
2.67 Combinations of trigonometric and hyperbolic functions 242
2.7 Logarithms and Inverse-Hyperbolic Functions 247
2.71 The logarithm 247
2.72-2.73 Combinations of logarithms and algebraic functions 248
2.74 Inverse hyperbolic functions 251
2.8 Inverse Trigonometric Functions 251
2.81 Arcsines and arccosines 251
2.82 The arcsecant, the arccosecant, the arctangent, and the arccotangent 252

2.83 Combinations of arcsine or arccosine and algebraic functions 253
2.84 Combinations of the arcsecant and arccosecant with powers of x 254
2.85 Combinations of the arctangent and arccotangent with algebraic functions 255

3.-4. Definite Integrals of Elementary Functions 257

3.0 Introduction 257
3.01 Theorems of a general nature 257
3.02 Change of variable in a definite integral 258
3.03 General formulas 259
3.04 Improper integrals 261
3.05 The principal values of improper integrals 262
3.1-3.2 Power and Algebraic Functions 264
3.11 Rational functions 264
3.12 Products of rational functions and expressions that can be reduced to square roots of first- and second-degree polynomials 265
3.13-3.17 Expressions that can be reduced to square roots of third- and fourth-degree polynomials and their products with rational functions 265
3.18 Expressions that can be reduced to fourth roots of second-degree polynomials and their products with rational functions 331
3.19–3.23 Combinations of powers of x and powers of binomials of the form $(\alpha + \beta x)$ 333
3.24–3.27 Powers of x, of binomials of the form $\alpha + \beta x^p$ and of polynomials in x 340
3.3-3.4 Exponential Functions 352
3.31 Exponential functions 352
3.32-3.34 Exponentials of more complicated arguments 354
3.35 Combinations of exponentials and rational functions 357
3.36-3.37 Combinations of exponentials and algebraic functions 362
3.38-3.39 Combinations of exponentials and arbitrary powers 364
3.41-3.44 Combinations of rational functions of powers and exponentials 370
3.45 Combinations of powers and algebraic functions of exponentials 380
3.46-3.48 Combinations of exponentials of more complicated arguments and powers 382
3.5 Hyperbolic Functions 387
3.51 Hyperbolic functions 387
3.52-3.53 Combinations of hyperbolic functions and algebraic functions 391
3.54 Combinations of hyperbolic functions and exponentials 399
3.55-3.56 Combinations of hyperbolic functions, exponentials, and powers 403
3.6-4.1 Trigonometric Functions 408
3.61 Rational functions of sines and cosines and trigonometric functions of multiple angles 408
3.62 Powers of trigonometric functions 412
3.63 Powers of trigonometric functions and trigonometric functions of linear functions 415
3.64-3.65 Powers and rational functions of trigonometric functions 420
3.66 Forms containing powers of linear functions of trigonometric functions 424
3.67 Square roots of expressions containing trigonometric functions 428
3.68 Various forms of powers of trigonometric functions 431
3.69-3.71 Trigonometric functions of more complicated arguments 435

3.72-3.74 Combinations of trigonometric and rational functions 444
3.75 Combinations of trigonometric and algebraic functions 456
3.76-3.77 Combinations of trigonometric functions and powers 458
3.78-3.81 Rational functions of x and of trigonometric functions 470
3.82-3.83 Powers of trigonometric functions combined with other powers 482
3.84 Integrals containing the expressions $\sqrt{1-k^2\sin^2 x}$, $\sqrt{1-k^2\cos^2 x}$, and similar expressions 496
3.85-3.88 Trigonometric functions of more complicated arguments combined with powers 500
3.89-3.91 Trigonometric functions and exponentials 511
3.92 Trigonometric functions of more complicated arguments combined with exponentials 519
3.93 Trigonometric and exponential functions of trigonometric functions 521
3.94-3.97 Combinations involving trigonometric functions, exponentials, and powers 523
3.98-3.99 Combinations of trigonometric and hyperbolic functions 536
4.11-4.12 Combinations involving trigonometric and hyperbolic functions and powers 544
4.13 Combinations of trigonometric and hyperbolic functions and exponentials 551
4.14 Combinations of trigonometric and hyperbolic functions, exponentials, and powers 554
4.2-4.4 Logarithmic Functions 556
4.21 Logarithmic functions 556
4.22 Logarithms of more complicated arguments 558
4.23 Combinations of logarithms and rational functions 564
4.24 Combinations of logarithms and algebraic functions 567
4.25 Combinations of logarithms and powers 569
4.26-4.27 Combinations involving powers of the logarithm and other powers 571
4.28 Combinations of rational functions of $\ln x$ and powers 583
4.29-4.32 Combinations of logarithmic functions of more complicated arguments and powers 585
4.33-4.34 Combinations of logarithms and exponentials 602
4.35-4.36 Combinations of logarithms, exponentials, and powers 604
4.37 Combinations of logarithms and hyperbolic functions 609
4.38-4.41 Logarithms and trigonometric functions 612
4.42-4.43 Combinations of logarithms, trigonometric functions, and powers 626
4.44 Combinations of logarithms, trigonometric functions, and exponentials 632
4.5 Inverse Trigonometric Functions 632
4.51 Inverse trigonometric functions 632
4.52 Combinations of arcsines, arccosines, and powers 632
4.53-4.54 Combinations of arctangents, arccotangents, and powers 634
4.55 Combinations of inverse trigonometric functions and exponentials 638
4.56 A combination of the arctangent and a hyperbolic function 638
4.57 Combinations of inverse and direct trigonometric functions 638
4.58 A combination involving an inverse and a direct trigonometric function and a power 640
4.59 Combinations of inverse trigonometric functions and logarithms 640
4.6 Multiple Integrals 640
4.60 Change of variables in multiple integrals 640
4.61 Change of the order of integration and change of variables 641

7.3-7.4 Orthogonal Polynomials 833
7.31 Combinations of Gegenbauer polynomials $C_n^\nu(x)$ and powers 833
7.32 Combinations of the polynomials $C_n^\nu(x)$ and some elementary functions 837
7.33 Combinations of the polynomials $C_n^\nu(x)$ and Bessel functions. Integration of Gegenbauer functions with respect to the index 838
7.34 Combinations of Chebyshev polynomials and powers 839
7.35 Combinations of Chebyshev polynomials and some elementary functions 841
7.36 Combinations of Chebyshev polynomials and Bessel functions 842
7.37-7.38 Hermite polynomials 842
7.39 Jacobi polynomials 846
7.41-7.42 Laguerre polynomials 848
7.5 Hypergeometric Functions 853
7.51 Combinations of hypergeometric functions and powers 853
7.52 Combinations of hypergeometric functions and exponentials 855
7.53 Hypergeometric and trigonometric functions 857
7.54 Combinations of hypergeometric and Bessel functions 857
7.6 Confluent Hypergeometric Functions 861
7.61 Combinations of confluent hypergeometric functions and powers 861
7.62-7.63 Combinations of confluent hypergeometric functions and exponentials 863
7.64 Combinations of confluent hypergeometric and trigonometric functions 873
7.65 Combinations of confluent hypergeometric functions and Bessel functions 874
7.66 Combinations of confluent hypergeometric functions, Bessel functions, and powers 875
7.67 Combinations of confluent hypergeometric functions, Bessel functions, exponentials, and powers 879
7.68 Combinations of confluent hypergeometric functions and other special functions 885
7.69 Integration of confluent hypergeometric functions with respect to the index 887
7.7 Parabolic-Cylinder Functions 888
7.71 Parabolic-cylinder functions 888
7.72 Combinations of parabolic-cylinder functions, powers, and exponentials 889
7.73 Combinations of parabolic-cylinder and hyperbolic functions 890
7.74 Combinations of parabolic-cylinder and trigonometric functions 891
7.75 Combinations of parabolic-cylinder and Bessel functions 892
7.76 Combinations of parabolic-cylinder functions and degenerate hypergeometric functions 896
7.77 Integration of a parabolic-cylinder function with respect to the index 897
7.8 Meijer's and MacRobert's Functions (G and E) 898
7.81 Combinations of the functions G and E and the elementary functions 898
7.82 Combinations of the functions G and E and Bessel functions 902
7.83 Combinations of the functions G and E and other special functions 905

8.-9. Special Functions 907

8.1 Elliptic Integrals and Functions 907
8.11 Elliptic integrals 907
8.12 Functional relations between elliptic integrals 911

8.13 Elliptic functions 913
8.14 Jacobian elliptic functions 914
8.15 Properties of Jacobian elliptic functions and functional relationships between them 919
8.16 The Weierstrass function $\wp(u)$ 922
8.17 The functions $\zeta(u)$ and $\sigma(u)$ 925
8.18–8.19 Theta functions 926
8.2 The Exponential-Integral Function and Functions Generated by It 933
8.21 The exponential-integral function Ei (x) 933
8.22 The hyperbolic-sine-integral shi x and the hyperbolic-cosine-integral chi x 936
8.23 The sine integral and the cosine integral: si (x) and ci (x) 936
8.24 The logarithm-integral li (x) 937
8.25 The probability integral $\Phi(x)$, and Fresnel integrals $S(x)$, and $C(x)$, the error function erf (x) and the complementary error function erfc (x) 938
8.26 Lobachevskiy's function $L(x)$ 941
8.3 Euler's Integrals of the First and Second Kinds and Functions Generated by Them 942
8.31 The gamma function (Euler's integral of the second kind): $\Gamma(z)$ 942
8.32 Representation of the gamma function as series and products 944
8.33 Functional relations involving the gamma function 946
8.34 The logarithm of the gamma function 948
8.35 The incomplete gamma function 949
8.36 The psi function $\psi(x)$ 952
8.37 The function $\beta(x)$ 956
8.38 The beta function (Euler's integral of the first kind): B(x, y) 957
8.4–8.5 Bessel Functions and Functions Associated with Them 960
8.40 Definitions 960
8.41 Integral representations of the functions $J_\nu(z)$ and $N_\nu(z)$ 961
8.42 Integral representations of the functions $H_\nu^{(1)}(z)$ and $H_\nu^{(2)}(z)$ 965
8.43 Integral representations of the functions $I_\nu(z)$ and $K_\nu(z)$ 968
8.44 Series representation 970
8.45 Asymptotic expansions of Bessel functions 972
8.46 Bessel functions of order equal to an integer plus one-half 976
8.47–8.48 Functional relations 979
8.49 Differential equations leading to Bessel functions 984
8.51–8.52 Series of Bessel functions 987
8.53 Expansion in products of Bessel functions 992
8.54 The zeros of Bessel functions 994
8.55 Struve functions $\mathbf{H}_\nu(z)$, $\mathbf{L}_\nu(z)$ 996
8.56 Thomson functions and their generalizations: ber$_\nu$ (z), bei$_\nu$ (z), her$_\nu$ (z), hei$_\nu$ (z), ker (z), kei (z) 998
8.57 Lommel functions $s_{\mu,\nu}(z)$, $S_{\mu,\nu}(z)$, $U_\nu(w, z)$, $V_\nu(w, z)$ 999
8.58 Anger and Weber functions $\mathbf{J}_\nu$ (z) and $\mathbf{E}_\nu$ (z) 1002
8.59 Neumann's and Schläfli's polynomials: $O_n(z)$ and $S_n(z)$ 1004
8.6 Mathieu Functions 1006
8.60 Mathieu's equation 1006
8.61 Periodic Mathieu functions 1006

8.62 Recursion relations for the coefficients $A_{2r}^{(2n)}$, $A_{2r+1}^{(2n+1)}$, $B_{2r+1}^{(2n+1)}$, $B_{2r+2}^{(2n+2)}$ 1007
8.63 Mathieu functions with a purely imaginary argument 1008
8.64 Nonperiodic solutions of Mathieu's equation 1008
8.65 Mathieu functions for negative q 1008
8.66 Representation of Mathieu functions as series of Bessel functions 1010
8.67 The general theory 1012
8.7–8.8 Associated Legendre Functions 1013
8.70 Introduction 1013
8.71 Integral representations 1016
8.72 Asymptotic series for large values of $|\nu|$ 1018
8.73-8.74 Functional relations 1021
8.75 Special cases and particular values 1024
8.76 Derivatives with respect to the order 1026
8.77 Series representation 1027
8.78 The zeros of associated Legendre functions 1030
8.79 Series of associated Legendre functions 1030
8.81 Associated Legendre functions with integral indices 1032
8.82-8.83 Legendre functions 1034
8.84 Conical functions 1039
8.85 Toroidal functions 1041
8.9 Orthogonal Polynomials 1042
8.90 Introduction 1042
8.91 Legendre polynomials 1044
8.92 Series of Legendre polynomials 1048
8.93 Gegenbauer polynomials $C_n^{\lambda}(t)$ 1050
8.94 The Chebyshev polynomials $T_n(x)$ and $U_n(x)$ 1054
8.95 The Hermite polynomials $H_n(x)$ 1057
8.96 Jacobi's polynomials 1059
8.97 The Laguerre polynomials 1061
9.1 Hypergeometric Functions 1065
9.10 Definition 1065
9.11 Integral representations 1066
9.12 The representation of elementary functions in terms of a hypergeometric function 1066
9.13 Transformation formulas and the analytic continuation of functions defined by hypergeometric series 1069
9.14 A generalized hypergeometric series 1071
9.15 The hypergeometric differential equation 1072
9.16 Riemann's differential equation 1075
9.17 Representation of certain second-order differential equations by means of a Riemann scheme 1079
9.18 Hypergeometric functions of two variables 1080
9.19 A hypergeometric function of several variables 1084
9.2 Confluent Hypergeometric Functions 1084
9.20 Introduction 1084
9.21 The functions $\Phi(\alpha, \gamma; z)$ and $\Psi(\alpha, \gamma; z)$ 1085

9.22–9.23 The Whittaker functions $M_{\lambda,\mu}(z)$ and $W_{\lambda,\mu}(z)$ 1086
9.24–9.25 Parabolic cylinder functions $D_p(z)$ 1092
9.26 Confluent hypergeometric series of two variables 1095
9.3 Meijer's *G-Function* 1096
9.30 Definition 1096
9.31 Functional relations 1097
9.32 A differential equation for the G-function 1098
9.33 Series of G-functions 1098
9.34 Connections with other special functions 1099
9.4 MacRobert's E-Function 1100
9.41 Representation by means of multiple integrals 1100
9.42 Functional relations 1100
9.5 Riemann's Zeta Functions $\zeta(z, q)$, and $\zeta(z)$, and the Functions $\Phi(z, s, v)$ and $\zeta(s)$ 1100
9.51 Definition and integral representations 1100
9.52 Representation as a series or as an infinite product 1101
9.53 Functional relations 1102
9.54 Singular points and zeros 1103
9.55 The function $\Phi(z, s, v)$ 1103
9.56 The function $\xi(s)$ 1105
9.6 Bernoulli Numbers and Polynomials, Euler Numbers, the Functions $\nu(x)$, $\nu(x, \alpha)$, $\mu(x, \beta)$, $\mu(x, \beta, \alpha)$, $\lambda(x, y)$ and Euler Polynomials 1105
9.61 Bernoulli numbers 1105
9.62 Bernoulli polynomials 1106
9.63 Euler numbers 1108
9.64 The functions $\nu(x)$, $\nu(x, \alpha)$, $\mu(x, \beta)$, $\mu(x, \beta, \alpha)$, $\lambda(x, y)$ 1109
9.65 Euler polynomials 1109
9.7 Constants 1110
9.71 Bernoulli numbers 1110
9.72 Euler numbers 1111
9.73 Euler's and Catalan's constants 1111
9.74 Stirling numbers 1111

10. Vector Field Theory 1114

10.01-10.08 Vectors, Vector Operators, and Integral Theorems 1114
10.11 Products of vectors 1114
10.12 Properties of scalar product 1114
10.13 Properties of vector product. 1114
10.14 Differentiation of vectors 1115
10.21 Operators grad, div, and curl 1115
10.31 Properties of the operator V 1116
10.41 Solenoidal fields 1117
10.51-10.61 Orthogonal curvilinear coordinates 1117
10.71-10.72 Vector integral theorems 1121
10.81 Integral rate of change theorems 1123

11. Algebraic Inequalities 1125

11.1− 11.3 General Algebraic Inequalities 1125
11.11 Algebraic inequalities involving real numbers 1125
11.21 Algebraic inequalities involving complex numbers 1127
11.31 Inequalities for sets of complex numbers 1128

12. Integral Inequalities 1129

12.1-12.5 Properties of Integrals and Integral Inequalities 1129
12.11 Mean value theorems 1129
12.21 Differentiation of definite integral containing a parameter 1130
12.31 Integral inequalities 1131
12.41 Convexity and Jensen's inequality 1132
12.51 Fourier series and related inequalities 1133

13. Matrices and Related Results 1135

13.1-13.4 Matrices and Quadratic Forms 1135
13.11-13.12 Special matrices 1135
13.21 Quadratic forms 1137
13.31 Differentiation of matrices 1139
13.41 The matrix exponential 1139

14. Determinants 1141

14.1-14.3 Properties of Determinants 1141
14.11 Expansion of second- and third-order determinants 1141
14.12 Basic properties 1141
14.13 Minors and cofactors of a determinant 1141
14.14 Principal minors 1142
14.15 Laplace expansion of a determinant 1142
14.16 Jacobi's theorem 1142
14.17 Hadamard's theorem 1143
14.18 Hadamard's inequality 1143
14.21 Cramer's rule 1143
14.31 Some special determinants 1144

15. Norms 1148

15.1-15.9 Vector Norms 1148
15.11 General properties 1148
15.21 Principal vector norms 1148
15.31 Matrix norms 1148
15.41 Principal natural norms 1149
15.51 Spectral radius of a square matrix 1149
15.61 Inequalities involving eigenvalues of matrices 1150

15.71 Inequalities for the characteristic polynomial 1151
15.81-15.82 Named theorems on eigenvalues 1154
15.91 Variational principles 1158

16. Ordinary Differential Equations 1160

16.1-16.9 Results Relating to the Solution of Ordinary Differential Equations 1160
16.11 First-order equations 1160
16.21 Fundamental inequalities and related results 1161
16.31 First-order systems 1162
16.41 Some special types of elementary differential equations 1164
16.51 Second-order equations 1165
16.61-16.62 Oscillation and nonoscillation theorems for second order equations 1169
16.71 Two related comparison theorems 1172
16.81-16.82 Nonoscillatory solutions 1172
16.91 Some growth estimates for solutions of second-order equations 1174
16.92 Boundedness theorems 1175

17. Fourier, Laplace and Mellin Transforms 1177

17.1-17.3 Integral Transforms 1177
17.11 Laplace transform 1177
17.12 Basic properties of the Laplace transform 1177
17.13 Table of Laplace transform pairs 1178
17.21 Fourier transform 11.83
17.22 Basic properties of the Fourier transform 1183
17.23 Table of Fourier transform pairs 1184
17.31 Fourier sine and cosine transforms 1186
17.32 Basic properties of the Fourier sine and cosine transforms 1187
17.33 Table of Fourier sine transforms 1188
17.34 Table of Fourier cosine transforms 1190
17.35 Relationships between transforms 1193
17.41 Mellin transform 1193
17.42 Basic properties of the Mellin transform 1194
17.43 Table of Mellin transforms 1195
