# **Table of Contents**

<b>Foreword to the First Edition of Learning Perl .....</b>	<b>xi</b>
<b>Foreword to the Present Edition .....</b>	<b>xv</b>
<b>Preface .....</b>	<b>xvii</b>
<b>1. Introduction .....</b>	<b>1</b>
History of Perl .....	1
Purpose of Perl .....	3
Availability .....	4
support .....	7
Basic Concepts .....	9
A Stroll Through Perl .....	12
Exercises .....	37
<b>2. Scalar Data .....</b>	<b>38</b>
What Is Scalar Data? .....	38
Numbers .....	38
Strings .....	40
Scalar Operators .....	42
Scalar Variables .....	47
Scalar Operators and Functions .....	48
<STDIN> as a Scalar Value .....	52
Output with print .....	53
The Undefined Value .....	53
Exercises .....	54

<b>3. Arrays and List Data .....</b>	<b>55</b>
What Is a List or Array? .....	55
Literal Representation .....	<b>55</b>
Variables .....	56
Array Operators and Functions .....	57
Scalar and List Context .....	62
<STDIN> as an Array .....	<b>63</b>
Variable Interpolation of Arrays .....	<b>63</b>
Exercises .....	64
<b>4. Control Structures .....</b>	<b>65</b>
Statement Blocks .....	65
The if/unless Statement .....	66
The while/until Statement .....	68
The do {} while/until Statement .....	<b>69</b>
The for Statement .....	70
The foreach Statement .....	70
Exercises .....	72
<b>5. Hashes .....</b>	<b>73</b>
What Is a Hash? .....	<b>73</b>
Hash Variables .....	<b>73</b>
Literal Representation of a Hash .....	74
Hash Functions .....	75
Hash Slices .....	77
Exercises .....	78
<b>6. Basic I/O .....</b>	<b>79</b>
Input from STDIN .....	79
Input from the Diamond Operator ....	80
Output to STDOUT .....	81
Exercises .....	82
<b>7. Regular Expressions .....</b>	<b>84</b>
Concepts About Regular Expressions .....	84
Simple Uses of Regular Expressions .....	84
Patterns .....	86
More on the Matching Operator .....	<b>92</b>
Substitutions .....	<b>96</b>
The split and join Functions .....	97
Exercises .....	99

<b>8. Functions .....</b>	<b>100</b>
Defining a User Function .....	100
Invoking a User Function .....	101
Return Values .....	102
Arguments .....	102
Private Variables in Functions .....	104
Semiprivate Variables Using local .....	106
File-Level my() Variables .....	107
Exercises .....	107
<b>9. Miscellaneous Control Structures .....</b>	<b>109</b>
The last Statement .....	109
The next Statement .....	110
The redo Statement .....	111
Labeled Blocks .....	112
Expression Modifiers .....	113
&&,   , and ?: as Control Structures .....	114
Exercises .....	115
<b>10. Filehandles and File Tests .....</b>	<b>116</b>
What Is a Filehandle? .....	116
Opening and Closing a Filehandle .....	116
Using Pathnames and Filenames .....	117
A Slight Diversion: die .....	119
Using Filehandles .....	120
The -x File Tests .....	121
The stat Function .....	123
Exercises .....	124
<b>11. Formats .....</b>	<b>126</b>
What Is a Format? .....	126
Defining a Format .....	127
Invoking a Format .....	128
More About the Fieldholders .....	130
The Top-of-Page Format .....	134
Changing Defaults for Formats .....	135
The FileHandle Module .....	138
Exercises .....	138

<b>12.</b>	<b>Directory Access .....</b>	<b>139</b>
	Moving Around the Directory Tree .....	139
	Globbing .....	140
	Directory Handles .....	141
	Opening and Closing a Directory Handle .....	142
	Reading a Directory Handle .....	142
	Exercises .....	143
<b>13.</b>	<b>File and Directory Manipulation .....</b>	<b>144</b>
	Removing a File .....	144
	Renaming a File .....	145
	Making and Removing Directories .....	146
	Modifying Permissions .....	146
	Modifying Timestamps .....	148
	Exercises .....	149
<b>14.</b>	<b>Process Management .....</b>	<b>150</b>
	Using system and exec .....	150
	Using Backquotes .....	152
	Using Processes as Filehandles .....	153
	Summary of Process Operations .....	154
	Win32::Process .....	155
	Exercises .....	156
<b>15.</b>	<b>Other Data Transformation .....</b>	<b>157</b>
	Finding a Substring .....	157
	Extracting and Replacing a Substring .....	158
	Formatting Data with sprintf() .....	160
	Advanced Sorting .....	160
	Transliteration .....	163
	Exercises .....	166
<b>16.</b>	<b>System Information .....</b>	<b>167</b>
	Getting User and Machine Information .....	167
	Packing and Unpacking Binary Data .....	168
	Getting Network Information .....	170
	The Registry .....	171
	Opening and Reading Registry Values .....	173
	Setting Registry Values .....	175
	Exercises .....	176

<b>17. Database Manipulation .....</b>	<b>177</b>
DBM Databases and DBM Hashes .....	177
Opening and Closing DBM Hashes .....	178
Using a DBM Hash .....	179
Fixed-Length Random-Access Databases .....	179
Variable-Length (Text) Databases .....	181
Win32 Database Interfaces .....	182
Exercises .....	183
<b>18. CGI Programming .....</b>	<b>184</b>
The CGI.pm Module .....	185
Your CGI Program in Context .....	186
Simplest CGI Program .....	188
Passing Parameters via CGI .....	189
Creating a Guestbook Program .....	198
Troubleshooting CGI Programs .....	207
Perl and the Web: Beyond CGI Programming .....	209
Further Reading .....	210
Exercises .....	211
<b>19. OLE Automation .....</b>	<b>212</b>
Introduction to OLE Automation .....	212
Creating Automation Objects .....	213
Using Automation Objects .....	214
Variants .....	218
Tips and Techniques .....	219
Exercises .....	220
<b>A. Exercise Answers .....</b>	<b>221</b>
<b>B. Libraries and Modules .....</b>	<b>243</b>
<b>C. Networking Clients .....</b>	<b>259</b>
<b>D. Topics We Didn't Mention .....</b>	<b>264</b>
<b>Index .....</b>	<b>269</b>
