

# Contents

<b>Preface</b>	xiii
<b>System requirements</b>	xvii
<b>1 How to use this book</b>	<b>1</b>
1.1 First look at the simulations . . . . .	2
1.2 Using this guidebook . . . . .	4
1.3 Who the package is designed for . . . . .	7
<b>2 “bravais” – Crystal structure and x-ray diffraction</b>	<b>9</b>
2.1 Introduction . . . . .	10
2.2 Crystal lattice versus crystal structure . . . . .	10
2.3 Lattice planes . . . . .	12
2.4 Reciprocal lattice . . . . .	14
2.5 Diffraction conditions . . . . .	16
2.6 Atomic form factor . . . . .	19
2.7 Structure factor . . . . .	21
2.8 Summary . . . . .	26
2.A Deeper exploration . . . . .	27
2.B “bravais” – the program . . . . .	27
<b>3 “laue” – Diffraction in perfect and imperfect crystals</b>	<b>30</b>
3.1 Introduction . . . . .	31
3.2 Bragg condition . . . . .	31
3.3 Atomic form factor . . . . .	34
3.4 Structure factor . . . . .	38
3.5 Order-disorder* . . . . .	43
3.6 Atomic displacements and thermal disorder . . . . .	45
3.7 Quasicrystals* . . . . .	51
3.8 Summary . . . . .	52
3.A Deeper exploration . . . . .	53
3.B Periodically modulated crystal . . . . .	53

3.C “laue” – the program . . . . .	54
<b>4 “born” – Lattice dynamics in one dimension</b>	<b>61</b>
4.1 Introduction . . . . .	62
4.2 Plane waves – infinite medium . . . . .	63
4.3 Normal modes of finite chain . . . . .	68
4.4 Wave packets . . . . .	70
4.5 Pulse propagation* . . . . .	75
4.6 Impurities . . . . .	75
4.7 Anharmonicity** . . . . .	78
4.8 Summary . . . . .	80
4.A Deeper exploration . . . . .	80
4.B “born” – the program . . . . .	81
<b>5 “debye” – Lattice dynamics and heat capacity</b>	<b>87</b>
5.1 Introduction . . . . .	88
5.2 Brillouin zone . . . . .	88
5.3 Dispersion relations . . . . .	90
5.4 Density of states . . . . .	95
5.5 Thermal energy . . . . .	102
5.6 Heat capacity . . . . .	103
5.7 Summary . . . . .	106
5.A Deeper exploration . . . . .	106
5.B “debye” – the program . . . . .	107
<b>6 “drude” – Dynamics of the classical free electron gas</b>	<b>113</b>
6.1 Introduction . . . . .	114
6.2 No applied fields . . . . .	114
6.3 Electric field (DC) . . . . .	116
6.4 Noise* . . . . .	119
6.5 Magnetic field . . . . .	121
6.6 Crossed fields . . . . .	123
6.7 AC electric field . . . . .	129
6.8 Summary . . . . .	131
6.A Deeper exploration . . . . .	132
6.B “drude” – the program . . . . .	132
<b>7 “sommerfeld” – Dynamics of quantum free electrons</b>	<b>137</b>
7.1 Introduction . . . . .	138
7.2 Ground state . . . . .	138
7.3 Electric field . . . . .	141
7.4 Crossed <b>E</b> - and <b>B</b> -fields . . . . .	148
7.5 Heating of the electron gas** . . . . .	149

7.6 Summary . . . . .	152
7.A Deeper exploration . . . . .	152
7.B “sommerfeld”– the program . . . . .	152
<b>8 “bloch” – Electron energy bands and states</b>	<b>158</b>
8.1 Introduction . . . . .	159
8.2 Solutions in one dimension . . . . .	159
8.3 In-band states . . . . .	162
8.4 Gap states* . . . . .	166
8.5 Nearly free electrons . . . . .	167
8.6 Tight binding (TB) . . . . .	169
8.7 ‘Atomic’ and ‘molecular’ potentials . . . . .	172
8.8 Summary . . . . .	173
8.A Deeper exploration . . . . .	174
8.B “bloch” . the program . . . . .	175
<b>9 “ziman” – Dynamics of a single band-electron</b>	<b>182</b>
9.1 Introduction . . . . .	183
9.2 $\mathbf{L}(\mathbf{k})$ and the contour plot . . . . .	183
9.3 Group velocities . . . . .	184
9.4 Acceleration in electric fields . . . . .	185
9.5 Magnetic field . . . . .	189
9.6 Crossed fields** . . . . .	193
9.7 Summary . . . . .	193
9.A Deeper exploration . . . . .	194
9.B “ziman” . the program . . . . .	194
<b>10 “peierls” – Transport in a partially full electron band</b>	<b>197</b>
10.1 Introduction . . . . .	198
10.2 Nearly empty band . . . . .	198
10.3 Half-full band . . . . .	199
10.4 Nearly full band: holes . . . . .	202
10.5 Anisotropy” . . . . .	207
10.6 Summary . . . . .	208
10.A Deeper exploration . . . . .	208
10.B Preferred Fermi energies . . . . .	208
10.C ‘peierls” – the program . . . . .	209
<b>11 “fermi” – Carrier densities in semiconductors</b>	<b>213</b>
11.1 Introduction . . . . .	214
11.2 Pure (intrinsic) material . . . . .	214
11.3 Doped (extrinsic) material . . . . .	218
11.4 Summary . . . . .	223

11.A Deeper exploration . . . . .	223
11.B “fermi” – the program . . . . .	224
<b>12 “poisson” – Band bending in semiconductors</b>	<b>229</b>
12.1 Introduction . . . . .	230
12.2 <i>pn-junction</i> . . . . .	231
12.3 Metal-insulator-semiconductor (MIS) diode . . . . .	239
12.4 Contact potential and work functions** . . . . .	245
12.5 Summary . . . . .	248
12.A Deeper exploration . . . . .	248
12.B “poisson” – the program . . . . .	249
<b>13 “ising” – Ising model and ferromagnetism</b>	<b>255</b>
13.1 Introduction . . . . .	256
13.2 Ising simulation . . . . .	256
13.3 High temperature susceptibility . . . . .	258
13.4 Ferromagnetic state . . . . .	261
13.5 Coarsening and nucleation . . . . .	263
13.6 Critical fluctuations* . . . . .	265
13.7 Correlation lengths* . . . . .	266
13.8 Thermodynamic limit* . . . . .	266
13.9 Summary . . . . .	267
13.A Deeper exploration . . . . .	268
13.B “ising” . the program . . . . .	269
<b>14 “néel” – Antiferromagnetism and magnetic domains</b>	<b>274</b>
14.1 Introduction . . . . .	275
14.2 Antiferromagnetism . . . . .	276
14.3 Ferromagnetic domains . . . . .	283
14.4 Summary . . . . .	288
14.A Deeper exploration . . . . .	288
14.B Dipolar and field energies . . . . .	289
14.C “néel” – the program . . . . .	291
<b>15 “burgers” – Dislocations and plastic flow</b>	<b>295</b>
15.1 Introduction . . . . .	296
15.2 About the “burgers” model . . . . .	296
15.3 Perfect crystal . . . . .	298
15.4 Single dislocation . . . . .	299
15.5 Critical shear stress with dislocations . . . . .	303
15.6 Impurity pinning . . . . .	306
15.7 Dislocation interactions . . . . .	308
15.8 Frank-Read source . . . . .	308

15.9 Summary . . . . .	310
15.A Deeper exploration . . . . .	310
15.B “burgers” – the program . . . . .	311
<b>Epilogue</b>	<b>314</b>
<b>Appendices</b>	<b>316</b>
<b>A How to run and install the SSS programs</b>	<b>317</b>
A.1 Information for all platforms . . . . .	318
A.2 Microsoft Windows . . . . .	318
A.3 Apple Power Macintosh . . . . .	321
A.4 Versions of Unix . . . . .	322
A.5 Compiling the simulations for yourself . . . . .	323
<b>B Detailed system requirements</b>	<b>324</b>
B.1 Introduction . . . . .	325
B.2 For all platforms . . . . .	325
B.3 Microsoft Windows . . . . .	326
B.4 Apple MacOS . . . . .	327
B.5 Versions of Unix . . . . .	327
<b>C Presets and file editing</b>	<b>329</b>
C.1 Presets provided with SSS package . . . . .	330
C.2 Customized presets . . . . .	331
C.3 Exercises and other editing . . . . .	334
<b>Bibliography</b>	<b>336</b>
<b>Index</b>	<b>344</b>
