

# CONTENTS

EXECUTIVE SUMMARY . . . . .	1
I. INTRODUCTION . . . . .	5
1.1. Background . . . . .	5
1.2. Objectives . . . . .	6
1.3. Scope . . . . .	7
1.4. Structure . . . . .	7
2. BACKGROUND INFORMATION . . . . .	8
2.1. The site . . . . .	8
2.2. Relevant organizations and radiological protection infrastructure in Georgia . . . . .	8
2.2.1. Regulatory authority . . . . .	8
2.2.2. Relevant organizations . . . . .	10
3. CHRONOLOGY OF THE ACCIDENT . . . . .	11
4. RECOVERY OF SOURCES . . . . .	13
4.1. Radiological monitoring at the Lilo facility . . . . .	13
4.2. Radiological survey . . . . .	13
4.3. Determination of the radionuclide involved . . . . .	16
4.4. Storage facility . . . . .	18
4.5. Physical protection of the sources . . . . .	18
5. CO-OPERATION BETWEEN THE WHO AND THE IAEA . . . . .	19
6. IAEA MISSION . . . . .	20
6.1. Objectives of the mission . . . . .	20
6.2. Radiological survey equipment . . . . .	21
6.3. Radiological survey results . . . . .	21
6.4. Soil sample measurements . . . . .	24
7. BIOLOGICAL DOSIMETRY . . . . .	24

7.1.	Cytogenetic investigations . . . . .	24
7.2.	Electron spin resonance dosimetry . . . . .	27
7.3.	Monte Carlo method of dose reconstruction . . . . .	27
8.	OVERVIEW OF THE MEDICAL ASPECTS . . . . .	30
9.	PRIMARY MEDICAL ASSESSMENT OF THE PATIENTS BY LOCAL PHYSICIANS IN GEORGIA , . . . . .	31
9.1.	Period prior to hospitalization . . . . .	31
9.2.	Diagnosis and treatment in hospitals in Georgia . . . . .	31
9.2.1.	General clinical manifestations and management of patients . . . . .	31
9.2.2.	Cutaneous signs and symptoms . . . . .	34
9.2.3.	Haematological indices . . . . .	39
9.2.4.	Chromosomal analysis . . . . .	39
9.2.5.	Immunological status . . . . .	41
9.2.6.	Results of microbiological investigations . . . . .	41
9.2.7.	Functional status of physiological systems . . . . .	41
9.2.8.	Treatment provided in Georgia . . . . .	42
10.	DIAGNOSIS AND TREATMENT IN SPECIALIZED HOSPITALS IN FRANCE AND GERMANY . . . . .	42
10.1.	Overview . . . . .	42
10.2.	Cutaneous syndrome . . . . .	43
10.2.1.	Initial medical check-up . . . . .	43
10.2.2.	Cutaneous signs and symptoms . . . . .	44
10.2.3.	MRI results . . . . .	45
10.2.4.	Telethermography results . . . . .	45
10.2.5.	20 MHz ultrasound results . . . . .	45
10.2.6.	X ray results . . . . .	45
10.2.7.	Bacteriological results . . . . .	49
10.2.8.	Treatment of the cutaneous syndrome . . . . .	49
10.2.9.	Outcome of the treatment . . . . .	52
10.3.	Haematological data . . . . .	56
10.4.	Reproductive system . . . . .	60
10.5.	Other organs and organ systems . . . . .	64
105.1.	Cardiovascular system . . . . .	64
105.2.	Liver . . . . .	64
105.3.	Respiratory system . . . . .	64

10.5.4. Thyroid . . . . .	64
10.5.5. Additional examinations by specialists . . . . .	65
10.6. Special case histories . . . . .	65
I I. PATHOPHYSIOLOGICAL CONSIDERATIONS REGARDING THE DEVELOPMENT OF CLINICAL SIGNS AND SYMPTOMS . . . . .	76
12. TREATMENT OF FOUR PATIENTS WITH RECURRENT SKIN ULCERS IN A SPECIALIZED HOSPITAL IN THE RUSSIAN FEDERATION . . . . .	79
13. CONCLUSIONS DRAWN FROM THE MEDICAL MANAGEMENT OF THE PATIENTS . . . . .	82
14. RECOMMENDATIONS ON THE FOLLOW-UP OF THE PATIENTS . . . . .	83
15. CONCLUSIONS AND LESSONS TO BE LEARNED . . . . .	84
15.1. Conclusions . . . . .	84
15.2. Lessons to be learned . . . . .	86
ANNEX I: STATUS OF THE GEORGIAN PATIENTS IN AUGUST 1999 . . . . .	91
ANNEX II: WHO COLLABORATING CENTRES AND LIAISON INSTITUTIONS WITHIN REMPAN . . . . .	93
REFERENCES . . . . .	97
ABBREVIATIONS . . . . .	99
CONTRIBUTORS TO DRAFTING AND REVIEW . . . . .	101
