Contents

1 Probability

1 1 Sample Space 1
1 2 Events 3
1 3 Operations with Events 5
1 4 Counting Sample Points 9
1 5 Probability of an Event 14
1.6 Some Probability Laws 16
1 7 Conditional Probability 18
1.8 Bayes' Rule 22

2 Random Variables

2 1 Concept of a Random Variable 30
2 2 Discrete Probability Distributions 32
2.3 Continuous Probability Distributions 37
2.4 Empirical Distributions 40
2 5 Joint Probability Distrbutions 44
2 6 Mathematical Expectation 54
2.7 Laws of Expectation 60
2.8 Special Mathematical Expectations 65
2.9 Properties of the Variance 69
2 10 Chebyshev's Theorem 72

3 Some Discrete Probability Distributions

3 1 Introduction 82
3.2 Uniform Distribution 82
3 3 Binomial and Multinomial Distributions 84
3.4 Hypergeometric Disstribution 91
3.5 Poisson Distribution 98
3 6 Negative Binomial and Geometric Distributions 103

4 Some Continuous Probability Distributions

4.1 Normal Distribution 110
4.2 Areas Under the Normal Curve 113
4.3 Normal Approximation to the Binomial 122
4.4 Gamma, Exponential, and Chi-Square Distributions 128
4.5 Weibull Distribution 133

5 Functions of Random Variables

5.1 Transformations of Variables 140
5.2 Moment-Generating Functions 150
5.3 Random Sampling 158
5.4 Sampling Theory 160
5.5 Sampling Distributions of Means 166
5.6 Sampling Distribution of $(n-1)S^2/\sigma^2$ 172
5.7 t Distribution 174
5.8 F Distribution 179

6 Estimation Theory

6.1 Introduction 189
6.2 Classical Methods of Estimation 190
6 3 Esirmating the Mean 194
6.4 Estimating the Difference Between Two Means 200
6.5 Estimating a Proportion 209
6.6 Estrmatrng the Difference Between Two Proportions 213
6 7 Estrmatrng the Variance 216
6 8 Estrmatrng the Rairo of Two Variances 218
6 9 Tolerance Limits 220
6 10 Bayesian Methods of Estimation 222
6 11 Decision Theory 228

7 Tests of Hypotheses

7 1 Statistical Hypotheses 238
7.2 Type I and Type II Errors 239
7 3 One-Tailed and Two-Tailed Tests 248
7 4 Tests Concerning Means and Variances 249
7 5 Choice of Sample Size for Testing Means 256
7 6 Tests Concerning Proportions 260
7 7 Testing the Difference Between Two Proportions 263
7 8 Goodness-of-Fit Test 265
7.9 Test for Independence 268

8 Linear Regression and Correlation

8.1 Linear Regression 280
8.2 Simple Linear Regression 282
8.3 Properties of the Least Squares Estimators 285
8.4 Confidence Limits and Tests of Significance 289
8.5 Choice of a Regression Model 295
8.6 Analysis-of-Variance Approach 296
8.7 Repeated Measurements on the Response 298
8.8 Correlation 303

9 Multiple Linear Regression

9.1 Introduction 314
9.2 Estimating the Coefficients 315
9.3 Estimating the Coefficients Using Matrices 319
9.4 Properties of the Least Squares Estimators 326
9.5 Inferences in Multiple Linear Regression 329
9.6 Adequacy of the Model 333
9.7 Special Case of Orthogonality 338
9.8 Sequential Methods for Model Selection 343
9.9 Ridge Regression 349

10 Analysis of Variance

10.1 Introduction 365
10.2 One-Way Classification 367
10.3 Tests for the Equality of Several Variances 374
10.4 Single-Degree-of-Freedom Comparisons 378
10.5 Multiple-Range Test 382
10.6 Comparing Treatments with a Control 383
10.7 Comparing a Set of Treatments in Blocks 386
10.8 Randomized Complete Block Designs 387
10.9 Additional Remarks Concerning Randomized Complete Block Designs 395
10.10 Random Effects Models 396
10.11 Regression Approach to Analysis of Variance 402
10.12 Power of Analysis-of-Variance Tests 406

11 Factorial Experiments

11.1 Two-Factor Experiments 417
11.2 Interaction in Two-Factor Experiments 417
11.3 Two-Factor Analysis of Variance 419
11.4 Three-Factor Experiments 428
11.5 Discussion of Specific Multifactor Models 436
11.6 Model II Factorial Experiments 438
11.7 Choice of Sample Size 441

12 2^k Factorial Experiments

12.1 Introduction 447
12.2 Analysis of Variance 448
12.3 Yates' Technique for Computing Contrasts 451
12.4 Factorial Experiments in Incomplete Blocks 455
12.5 Partial Confounding 461
12.6 Fractional Factorial Experiments 463
12.7 Analysis of Fractional Factorial Experiments 466

13 Nonparametric Statistics

13.1 Introduction 473
13.2 Wilcoxon Two-Sample Test 474
13.3 Sign Test 480
13.4 Wilcoxon Test for Paired Observations 484
13.5 Runs Test 488
13.6 Tolerance Limits 491
13.7 Rank Correlation Coefficient 492
13.8 Kruskal-Wallis Test 495
