

CONTENTS

1	ENERGY STATES IN SEMICONDUCTORS	1
1-A	Band Structure	1
<i>I-A-1 Banding of Atomic Levels</i>	<i>I</i>	
<i>I-A-2 Distribution in Momentum Space</i>	<i>3</i>	
<i>I-A-3 Density-of-States Distribution</i>	<i>6</i>	
<i>I-A-4 Carrier Concentration</i>	<i>7</i>	
1-B	Impurity States	8
1-C	Band Tailing	10
1-D	Excitons	12
<i>I-D-1 Free Excitons</i>	<i>12</i>	
<i>I-D-2 Excitonic Complexes</i>	<i>14</i>	
<i>I-D-3 Polaritons</i>	<i>16</i>	
1-E	Donor-Acceptor Pairs	17
1-F	States in Semiconducting Alloys	18
2	PERTURBATION OF SEMICONDUCTORS BY EXTERNAL PARAMETERS	22
2-A	Pressure Effects	22
<i>2-A-1 Hydrostatic Pressure</i>	<i>22</i>	
<i>2-A-2 Uniaxial Strain</i>	<i>26</i>	
2-B	Temperature Effects	27
2-C	Electric-Field Effects	28
<i>2-C-1 Stark Effects</i>	<i>28</i>	
<i>2-C-2 Franz-Keldysh Effect</i>	<i>29</i>	
<i>2-C-3 Ionization Effects</i>	<i>29</i>	
2-D	Magnetic-Field Effects	30
<i>2-D-1 Landau Splitting</i>	<i>30</i>	
<i>2-D-2 Zeeman Effect</i>	<i>32</i>	
3	ABSORPTION	34
3-A	Fundamental Absorption	34
<i>3-A-1 Allowed Direct Transition</i>	<i>35</i>	

3-A-2	<i>Forbidden Direct Transitions</i>	36
3-A-3	<i>Indirect Transitions between Indirect Valleys</i>	37
3-A-4	<i>Indirect Transitions between Direct Valleys</i>	42
3-A-5	<i>Transitions between Band Tails</i>	43
3-A-6	<i>Fundamental Absorption in the Presence of a Strong Electric Field</i>	46
3-B	Higher-energy Transitions	52
3-C	Exciton Absorption	57
3-C-1	<i>Direct and Indirect Excitons</i>	57
3-C-2	<i>Exciton Absorption in the Presence of an Electric Field</i>	60
3-D	Absorption due to Isoelectronic Traps	61
3-E	Transitions between a Band and an Impurity Level	62
3-F	Acceptor-to-Donor Transitions	66
3-G	Intraband Transitions	67
3-G-1	<i>p-Type Semiconductors</i>	67
3-G-2	<i>n-Type Semiconductors</i>	71
3-H	Free-carrier Absorption	74
3-I	Lattice Absorption	76
3-J	Vibrational Absorption of Impurities	80
3-K	Hot-Electron-Assisted Absorption	81

4 RELATIONSHIPS BETWEEN OPTICAL CONSTANTS 87

4-A	Absorption Coefficient	87
4-B	Index of Refraction	88
4-C	The Kramers-Kronig Relations	89
4-D	Reflection Coefficient	90
4-E	Determination of Carrier Effective Mass	91
4-F	Plasma Resonance	92
4-G	Transmission	93
4-H	Interference Effects	94

5 ABSORPTION SPECTROSCOPY 96

6 RADIATIVE TRANSITIONS 107

6-A	The Van Roosbroeck-Shockley Relation	108
6-B	Radiative Efficiency	111
6-C	The Configuration Diagram	113
6-D	Fundamental Transitions	114
6-D-1	<i>Exciton Recombination</i>	114
6-D-2	<i>Conduction-Band-to-valence-Band Transitions</i>	124

- 6-E Transition between a Band and an Impurity Level 131
 6-E-1 Shallow Transitions 131
 6-E-2 Deep Transitions 132
 6-E-3 Transitions to Deep Levels 138
- 6-F Donor-Acceptor Transitions 143
 6-F-1 Spectral Structure 143
 6-F-2 Transition Probability 147
 6-F-3 Time Dependence of Donor-to-Acceptor Transitions 152
- 6-G Intraband Transition 154
- 7 NONRADIATIVE RECOMBINATION 160
- 7-A Auger Effect 161
 7-B Surface Recombination 164
 7-C Recombination through Defects or Inclusions 165
 7-D Configuration Diagram 166
 7-E Multiple-Phonon Emission 167
- 8 PROCESSES IN p-n JUNCTIONS 170
- 8-A Nature of the p-n Junction 170
 8-A-1 The Depletion Layer 171
 8-A-2 Junction Capacitance 173
 S-A-3 Electric Field in the p-n Junction 174
- 8-B Forward-bias Processes 174
 8-B-1 Band-to-Band Tunneling 175
 8-B-2 Photon-Assisted Tunneling 177
 8-B-3 Injection 180
 8-B-4 Tunneling to Deep Levels 181
 S-B-5 Donor-to-Acceptor Photon-Assisted Tunneling 183
 8-B-6 Band Filling 189
 8-B-7 Injection Luminescence in Lightly Doped Junctions 192
 8-B-8 Optical Refrigeration 193
- 8-C Heterojunctions 197
- 8-D Reverse-Bias Processes 201
 8-D-1 Saturation Current and Photoconductivity 201
 8-D-2 Zener Breakdown 203
 8-D-3 Avalanche Breakdown 203
- 9 STIMULATED EMISSION 213
- 9-A Relationship between Spontaneous and Stimulated Emission 213

9-B Criteria for Lasing in a Semiconductor	215
10 SEMICONDUCTOR LASERS	222
10-A Cavity and Modes	222
1 O-B Waveguiding Properties of the Active Region	225
10-C Far-Field Pattern	227
1 O-D Temperature Dependence	229
<i>10-D-1 Effect of the Cavity</i>	229
<i>10-D-2 Temperature Dependence of Losses, of Efficiency and of Threshold Current Density</i>	229
<i>10-D-3 Power Dissipation</i>	233
10-E Optimum Design for Injection Laser	234
10-F Influence of a Magnetic Field	238
1 O-G Pressure Effects	239
11 EXCITATION OF LUMINESCENCE AND LASING IN SEMICONDUCTORS	242
11 -A Electroluminescence	242
<i>I I-A-1 Forward Biased p-n Junction</i>	242
<i>I I-A-2 Forward-Biased Surface Barrier</i>	245
<i>II-A-3 Tunneling through an Insulating Layer</i>	247
<i>II-A-4 Bulk Excitation by Impact Ionization</i>	247
11-B Optical Excitation	249
11 -C Electron-Beam Excitation	252
12 PROCESSES INVOLVING COHERENT RADIATION	258
12-A Photon-Photon Interactions in Semiconductors	258
<i>12-A-1 Quenching of a Laser by Another Laser</i>	259
<i>12-A-2 Amplification</i>	261
<i>12-A-3 Harmonic Generation</i>	265
<i>12-A-4 Two-photon Absorption</i>	268
<i>12-A-5 Frequency Mixing</i>	270
12-B Photon-Phonon Interactions in Semiconductors	271
<i>12-B-1 Raman Scattering</i>	273
<i>12-B-2 Brillouin Scattering</i>	275
12-C Optical Properties of Acoustoelectric Domains	278
<i>12-C-1 The Acoustoelectric Effect</i>	279
<i>12-C-2 Light Transmission at Acoustoelectric Domain</i>	281
<i>12-C-3 Light Emission by Acoustoelectric Domain</i>	283
<i>12-C-4 Brillouin Scattering Studies of Acoustoelectric Domains</i>	285

13 PHOTOELECTRIC EMISSION 287

- 13-A Threshold for Emission 287
- 13-B Photoelectric Yield 289
- 13-C Effect of Surface Conditions 294
- 13-D Energy Distribution of Emitted Electrons 299

14 PHOTOVOLTAIC EFFECTS 302

- 14-A Photovoltaic Effect at p-n Junctions 302
 - 14-A-1 Electrical Characteristics* 302
 - 14-A-2 Spectral Characteristics* 305
 - 14-A-3 The Solar Cell* 307
- 14-B Photovoltaic Effects at Schottky Barriers 312
 - 14-B-1 The Schottky Barrier* 312
 - 14-B-2 Photo-Effects* 314
 - 14-B-3 Particle Detectors* 319
- 14-C Bulk Photovoltaic Effects 320
 - 14-C-1 Dember effect* 320
 - 14-C-2 Photomagnetovoltaic Effect* 321
- 14-D Anomalous Photovoltaic Effect 323
 - 14-D-1 Characteristics of Anomalous Photovoltaic Cells* 324
 - 14-D-2 Conditions for Obtaining the Anomalous Photovoltaic Effect* 325
 - 14-D-3 Models for the Anomalous Photovoltaic Effect* 327
 - 14-D-4 Angular Dependence of Photovoltaic Effects* 329
- 14-E Other Photovoltaic Effects 331
 - 14-E-1 Lateral Photoeffect* 331
 - 14-E-2 Optically Induced Barriers* 331
 - 14-E-3 Photovoltaic Effect at a Graded Energy Gap* 333

15 POLARIZATION EFFECTS 337

- 15-A Birefringence 337
 - 15-A-1 Birefringence in Uniaxial Crystals* 338
 - 15-A-2 Elliptical Polarization* 339
 - 15-A-3 Birefringence in Biaxial Crystals* 340
- 15-B Induced Optical Anisotropy 344
 - 15-B-1 Electro-Optic Kerr Effect* 344
 - 15-B-2 Pockels Effect or Linear Electro-Optic Effect* 345
 - 15-B-3 Faraday Effect* 346
 - 15-B-4 Voigt Effect* 347

15-B-5	<i>Strain-Induced Birefringence</i>	347
15-B-6	<i>Deflection and Modulation of a Light Beam</i>	348
16	PHOTOCHEMICAL EFFECTS	352
16-A	Photochemistry with a Gaseous Ambient	353
16-A-1	<i>Surface States</i>	353
16-A-2	<i>Adsorption and Desorption</i>	354
16-A-3	<i>Photocatalysis</i>	358
16-A-4	<i>Spectroscopic Analysis of Adsorbed Species</i>	358
16-A-5	<i>Epitaxial Growth</i>	360
16-B	Photochemistry with a Liquid Ambient	361
16-B-1	<i>Chemical Etching</i>	361
16-B-2	<i>Electrolytic Etching</i>	363
16-B-3	<i>Plating</i>	363
16-C	Photochemical Reactions Inside the Crystal	365
16-C-1	<i>Photo-Induced Annealing</i>	365
16-C-2	<i>Photochromism</i>	366
17	EFFECT OF TRAPS ON LUMINESCENCE	370
17-A	Growth and Decay of Luminescence	370
17-B	Thermoluminescence	371
17-C	Infrared Stimulated Luminescence	376
17-D	Quenching of Luminescence	376
17-E	Trapping Effects in Lasers	377
17-E-1	<i>Time Delay in Lasers</i>	377
17-E-2	<i>Trap Storage Time</i>	379
17-E-3	<i>Traps as Saturable Absorbers</i>	379
17-E-4	<i>Temperature Dependence of Trapping in GaAs Injection Lasers</i>	383
17-E-5	<i>Double-Acceptor Model</i>	385
17-E-6	<i>Internal Q-Switching</i>	386
17-F	Triboluminescence	387
17-F-1	<i>Strain-Excited Luminescence</i>	387
17-F-2	<i>Strain-Stimulated Luminescence</i>	389
17-F-3	<i>Fracture Luminescence</i>	390
18	REFLECTANCE MODULATION	391
18-A	Dependence of Reflectance on the Band Structure	392
18-B	Reflectance-modulation Techniques	396
18-B-1	<i>Electroreflectance</i>	396
18-B-2	<i>Optical Modulation of Reflectance</i>	399
18-B-3	<i>Cathodorelectance Modulation</i>	399

<i>18-B-4 Piezoreflectance Modulation</i>	400
<i>18-B-5 Thermoreflectance Modulation</i>	401
<i>18-B-6 Wavelength Modulation</i>	401
18-C Some Results	402

APPENDICES 409

I Table of Symbols	410
II Properties of Semiconductors	412
III Nomograph of the Temperature Dependence of the Fermi Level in a Degenerate Parabolic Band	414
IV Physical Constants	416
