

CONTENTS

1. INTRODUCTION	1
1.1. Scope of the report	1
2. A NATIONAL STRATEGY FOR RADIOACTIVE WASTE DISPOSAL	2
3. WASTE TREATMENT AND CONDITIONING	4
3.1. General	4
3.2. Classification, characterization and segregation of wastes	4
3.2.1. Classification	4
3.2.2. Characterization and segregation of wastes	10
3.3. Techniques for waste treatment and conditioning	10
3.3.1. General	10
3.3.2. Volume reduction	11
3.3.3. Immobilization and packaging	13
4. THE SITE	13
4.1. Climate	14
4.2. Topography	15
4.3. Geology and hydrogeology	16
5. DESIGN AND OPERATION OF REPOSITORIES	18
5.1. Design and operation	18
5.2. Backfilling	20
5.3. Cover	22
6. SURVEILLANCE	23
6.1. Regulatory requirements	23
6.2. Performance assessments	24
6.2.1. Safety assessments	24
6.2.2. Performance evaluation	27
6.2.3. Validation of safety assessment	28
6.3. Post-operational surveillance	29
SUMMARY COMMENTS	30
REFERENCES	31

APPENDIX 1: LOW- AND INTERMEDIATE-LEVEL SOLID
RADIOACTIVE WASTE MANAGEMENT AT CHALK
RIVER NUCLEAR LABORATORIES, CHALK RIVER,
ONTARIO, CANADA..... 33

1. Overview of low- and intermediate-level solid radioactive waste management in Canada 33
2. Radioactive waste management at the Chalk River Nuclear Laboratories 34
 - 2.1. Introduction 34
 - 2.2. Geology and hydrology of the site 35
 - 2.3. Waste management 35
 - 2.3.1. General 35
 - 2.3.2. Operational experience 37
 - 2.4. Future disposal plans 43
 - 2.4.1. General 43
 - 2.4.2. Waste categories and conditioning 43
 - 2.4.3. Important parameters 43
 - 2.4.4. Repository concepts 46
 - 2.4.5. Radionuclide migration/retardation.. 49
 - 2.4.6. Repository siting 51

APPENDIX 2: DISPOSAL OF RADIOACTIVE WASTE AT THE
CENTRE DE LA MANCHE, FRANCE 52

1. Site characteristics 52
 - 1.1. Geological features 52
 - 1.2. Geohydrological features 52
 - 1.3. Climatic features 52
 - 1.4. Surroundings 52
2. Types of wastes disposed of 53
 - 2.1. Origin of wastes 53
 - 2.2. Maximum specific activities 53
 - 2.3. Radionuclides associated with the wastes 53
3. Conditioning and packaging adopted 54
4. Receipt of wastes at repository 54
5. Interim and/or decay storage 54
6. Repackaging/overpackaging 54
7. Disposal practices 55
8. Sealing and backfilling 62
9. Monitoring 62
10. Repository layout 62
11. Capacity of the Centre 62

APPENDIX 3: THE SOLID WASTE MANAGEMENT FACILITY AT TARAPUR, INDIA	63
1. Site characteristics	63
1.1. Location	63
1.2. General geological features	63
1.3. Subsurface geology	63
1.4. Climatic features	65
1.5. Hydrology	65
2. Types of waste disposed of	66
3. Conditioning and packaging adopted	66
4. Receipt of wastes at repository	66
5. Interim/decay storage	66
6. Repackaging/overpackaging	67
7. Disposal practices	67
8. Sealing and backfilling	70
9. Monitoring	70
10. Repository layout	71
11. Quantity of different types of wastes	71

APPENDIX 4: DISPOSAL OF RADIOACTIVE WASTE TO SHALLOW GROUND FACILITIES IN THE UNITED KINGDOM	72
1. Regulatory control	72
2. Review of existing disposal practice	72
3. Drigg disposal site	74
3.1. General features	74
3.2. Geological features	74
3.3. Hydrogeological features	74
3.4. Regulatory considerations	75
3.5. Nature of waste	75
3.6. Packaging	76
3.7. Monitoring	76

APPENDIX 3: DISPOSAL OF RADIOACTIVE WASTE AT SAVANNAH RIVER PLANT, AIKEN, SOUTH CAROLINA, USA	77
1. Site characteristics	77
1.1. Location	77
1.2. Climate	77
1.3. Geology	77
1.4. Hydrology	78
1.5. Ecology	79

2.	Licensing	80
3.	Operation..	80
	3.1. Dates of operation	80
	3.2. Operational techniques	80
	3.3. Special management techniques	81
	3.4. Usage	81
4.	Monitoring	82
5.	Identification of problem areas	82
	5.1. Site	82
	5.2. Wastes	83
	5.3. Operation	83
	5.4. Performance..	83
