

Granular Matter

Volume 3 | Numbers 1-2 . March 2001

Special issue: Workshop Porous and Granular Materials

San Carlos de Bariloche, Argentina, March 2000

Editorial

Wio H, Albano E, Rosen M, Pusiol D, Zgrablich J 1

Original papers. Invited talks

Sahimi M: Characterization and modelling of oil reservoirs and groundwater aquifers: application of **Wavelet** Transformations 3

Herrmann HJ: Structures in deformed granular packings 15

Hurd AJ, Steinberg L: The physics of **evaporation**-induced assembly of sol-gel materials 19

Kenkre VM: Spatial memories and correlation functions in the theory of stress distribution in granular materials 23

Robledo A, Quintana J: Anomalous transport, the renormalization group and optimization of entropy 29

Sen S, Manciu M, Sinkovits RS, Hurd AJ: Nonlinear acoustics in granular assemblies 33

Moukarzel CF: Isostaticity in granular matter 41

Rodriguez CR, Chavez FV, Pusiol DJ, Neto AMF: NMR study of the slow dynamics and local structure in lyotropic micellar liquid crystals 53

(Continuation on pages A8 and A9)

Online edition in LINK-

Granular Matter

Volume 3 . Numbers 1-2 . March 2001

Special issue: Workshop Porous and Granular Materials

San Carlos de Bariloche, Argentina, March 2000

(Contents continued)

Arenzon JJ, Sellitto M: Glassy models for granular systems 57

Rosen M, Freytes VM, D'Onofrid A, Allain CA, Hulin JP: Density difference driven instabilities in porous media 63

López RH, Vidales AM, Zgrablich G: Determination of the pore size distribution of correlated mesoporous networks 69

Original papers . Contributed papers

Aguirre MA, Nerone N, Ippolito I, Calvo A, Bideau D: Granular packing: influence of different parameters on its stability 75

Becerra A, Dimitrijewits M, Arciprete C, Luna AC: Stable Ni/Al₂O₃ catalysts for methane dry reforming Effects of pretreatment 79

Bruno L, Ippolito I, Calvo A: Granular mixing in a Galton board 83

Bulnes F, Ramirez-Pastor AJ: Monte Carlo simulation of collective diffusion on heterogeneous media: Dual Site-Bond Model 87

Buteral A: Ferromagnetic films deposited on nanochannel alumina 93

Cordero S, Rojas F, Kornhauser I, Riccardo JL: Sorption characteristics and visualization of the state of porous entities in simulated porous networks 97

Dimitrijewits MI, Guraya MM, Arciprete CP, Luna AC, Becerra A: Catalytic behaviour Ni/ γ -Al₂O₃ microporous catalysts in the methane dry-reforming reaction 101

Drazer G, Wio HS, Tsallis C: Exact time-dependent solutions for anomalous diffusion with absorption

Granular Matter

Volume 3 Numbers 1-2 March 2001

Special issue: Workshop Porous and Granular Materials

San Carlos de Bariloche, Argentina, March 2000

(Contents continued)

Falco MG, Boero L, Figoli NS: Preparation of porous materials as catalysts for isomerization reactions 109

Monetti R, Hurd A, Kenkre VM: Simulations for dynamics of granular mixtures in a rotating drum 113

Nerone N, Gabbanelli S: Surface fluctuations and the inertia effect in sandpiles 117

Peretti HA, Ghilarducci AA, Corso HL: Elaboration and hydriding behavior characterization of a magnesium matrix composite containing intermetallic particles 121

Quattrini D, Serrano D, Catán SP: Modifications in the microstructure of alumina porous materials by hydrothermal treatment 125

Sapag K, Girón RL, Mendioroz S: Proper stability in porous media based in a natural clay 131

Serrano DA, Wio HS: Efficiency of membranes for isotopic separation: effect of cracks 137

Vidales AM, Kenkre VM, Hurd A: Simulation of Granular Compacts in two dimensions 141

Zuzek E, Catán SP, Arciprete CP, Dimitrijewits MI, Almandoz MC, Marchese J: Asymmetric ceramic microporous membranes 145
