

CONTENTS

| | |
|---|-----|
| Preface | vii |
| Archimedes <i>J. M. Rassias</i> | 1 |
| Towards the Ultimate Scheme for Numerical Integration in Multi-Dimensions <i>C. D. Angelopoulos and V. D. Angelopoulos</i> | 5 |
| Efficient Finite Difference Schemes for Multi-Dimensional Nonlinear Diffusion Equations <i>C. D. Angelopoulos and V. D. Angelopoulos</i> | 21 |
| On a Simplified Quasilinear Equation of Elasticity Theory <i>L. Berg and K. Frischmuth</i> | 43 |
| Quantum Stochastic Integral Equations with Exponential Noise <i>A. Boukas</i> | 61 |
| The Euler Formula for Polyhedra and Functional Equations <i>E. Castillo and R. Ruiz-Cobo</i> | 77 |
| Relative Homotopy Groups in Unirational Homotopy Theory <i>P. Cherenack</i> | 85 |
| Discrete and Non-Discrete Phenomena in the Mixed Problem <i>C. Q. Wu and Y. K. Liu</i> | 101 |
| A WZ Proof of Ramanujan's Formula for π <i>Sh. B. Ekhad and D. Zeilberger</i> | 107 |

| | |
|---|-----|
| Problems on the n Dimensional Simplex | 109 |
| <i>K. Hatada</i> | |
| On the Reason Why the Product of Two Negative Integers Must be Positive | 113 |
| <i>K. Hatada</i> | |
| The Two Squares Theorem | 121 |
| <i>P. Kamgiorgis and K. Markata</i> | |
| Free Surface Flows Induced by Submerged Sources | 125 |
| <i>A. C. King</i> | |
| Archimedes and the Invention of Burning Mirrors: An Investigation of Work by Buffon | 139 |
| <i>E. Kreyszig</i> | |
| A Characterization of the $c_2(\mathbb{A})$ Function from the Characteristic Polynomial | 149 |
| <i>D. S. Moak and K. J. Hewers</i> | |
| Algorithms and Complexity for Continuous Problems | 157 |
| <i>E. Novak</i> | |
| The Well-Posed Tricomi Problem in the Euclidean Plane | 189 |
| <i>J. M. Rassias</i> | |
| A New Computation Formula for the Inverse of a Matrix | 197 |
| <i>J. M. Rassias</i> | |
| An Archimedes Solution to the Problem: Find the Volume Common to Two Intersecting Right Circular Cylinders of the Same Radius if the Axis of the First Forms an Non-Orthogonal Angle with that of the Second | 205 |
| <i>W. A. Stannard</i> | |
| A Problem which Archimedes Would Probably Like | 215 |
| <i>S. Tabachnikov</i> | |
| Application of Expansion of Poisson Kernel to the Dirichlet Problem for a Degenerate Elliptic Equation in the Extended Space | 219 |
| <i>X. H. Ji and D. Q. Chen</i> | |

| | |
|--|------------|
| On the Non-Fredholm Oblique Derivative Problem | 227 |
| <i>A. Yanushauskas</i> | |
| Extreme Position Functionals of Involution Algebras | 243 |
| <i>Y. Tsertos</i> | |
| Fractional Linear Algebra | 251 |
| <i>J. M. Rassias</i> | |
| The Global Cauchy Problem for Quasilinear Hyperbolic Equations | |
| $u_{xx} + f_1(u_x)f_2(u_y)u_{xy} = 0$ | 269 |
| <i>O. Jokhadze</i> | |
| On the Stability of the Multi-Dimensional Nonlinear Euler-Algebra Functional Equation | 275 |
| <i>J. M. Rassias</i> | |
| Multi-Dimensional Landau Inequalities | 287 |
| <i>J. M. Rassias</i> | |
| Open Problems in Analysis | 355 |
| <i>J. M. Rassias</i> | |
| On the Stability of a Multi-Dimensional Cauchy Type Functional Equation | 365 |
| <i>J. M. Rassias</i> | |
