

CONTENTS

| | |
|---|----|
| PREFACE | v |
| INTRODUCTION | ix |
| 1 POTENTIOSTATIC METHODS | 1 |
| 1. The Basic Potentiostatic Method | 1 |
| 2. The Voltage Step Method | 12 |
| 3. The Cyclic Potentiostatic Method | 19 |
| 4. Applications of the Potentiostatic Method in Analytical Chemistry | 28 |
| 2 GALVANOSTATIC METHODS | 31 |
| 1. The Basic Galvanostatic Method | 31 |
| 2. The Cyclic Galvanostatic Method | 38 |
| 3. The Double Pulse Galvanostatic Method | 48 |
| 4. The Coulostatic Method | 52 |
| 5. Uses of the Galvanostatic Method in Analytical Chemistry—Chronopotentiometry | 57 |
| 3 ALTERNATING CURRENT METHODS | 61 |
| 1. The Faradaic Impedance Method | 61 |
| 2. The Graphical Method for the Determination of Electrode Impedance | 71 |
| 3. The Faradaic Distortion Method (The Use of Second Harmonics) | 78 |
| 4. The Faradaic Rectification Method | 82 |
| 5. The Applications of Alternating Current Methods in Analytical Chemistry | 90 |
| 4 THE EFFECT OF THE STRUCTURE OF THE DOUBLE LAYER IN RELAXATION METHODS | 99 |
| 1. The Equilibrium Distribution of Concentrations in the Double Layer | 99 |

| | |
|---|-----|
| 2. The Nonequilibrium Distribution of Concentrations in the Double Layer | 101 |
| 3. The Structure of the Double Layer and the Use of Equivalent Electrical Circuits | 104 |
| REFERENCES | 110 |
| INDEX | 112 |
