INTRODUCTION				1
CHAPTER I. AREA OF CONTACT BETV				5
MEASUREMENT OF SURFACE IRREGULARITIES	AND SU	RFACE	CONTOUR	5
Stylus methods		er laye	92000	5
Optical interference [A]	S	. 51	Big	6
Electron microscope [A] .	- Kita	Limba	73 lt	8
Oblique sectioning	and the	neital	it ti	9
AREA OF CONTACT BETWEEN SOLIDS	irticlus			10
Asperities of spherical shape	is an	A.MO	FT)	10
Effect of work-hardening .				14
Asperities of conical and pyramidal sha	pe	e Felo	O T	17
The area of real contact	letied to	<b>HATA</b>	0.30	19
Area of real and apparent contact		. 253	arta	20
The effect of removing the load	ENRINE	A.4400	5:14	22
ELECTRICAL RESISTANCE AS A MEASURE OF				25
Effect of load on contact resistance	TA BOA	MAGE 8	DAY	28
The contact of flat surfaces .		SAGI	i v	30
CHAPTER II. SURFACE TEMPERATURI		UBBIN	NG SOLIDS	33
SURFACE TEMPERATURE OF SLIDING METAI	s	diay pi	118A	33
Calculation of surface temperature			majo	33
Measurement of surface temperature	H OF CI	HAN M	STA	3.5
Temperature of sliding metals .	or rather	right to	dia	37
Temperature of lubricated surfaces	d payage	2		40
Intermittent nature of surface temperate			SNC	41
Surface temperature and thermal condu				41
SURFACE TEMPERATURE OF NON-CONDUCTI				42
Temperature at which hot spots become	e visible	10 231	TRE	43
Thermal conductivity and the incidence				44
Photographic recording of hot spots		iclenesi		46
Effect of grit on the incidence of hot sp	ots	o Mai	ne fi	47
Influence of size and shape of slider			1.	48
Measurement of transient hot spots [A]		. 87	arkin.	49
A More Evace Calculation of the Sup				52

CHAPTER III. EFFECT OF FRICTIONAL HEA	TING	ON SU	RFACE	
FLOW	•		•	58
POLISHING AND SURFACE FLOW OF SOLIDS [A]	,	•	•	, 58
81	•	•	. ,	
Mechanism of polishing , .	. ,		, ,	
The action of a typical polisher		•		. 63
THE MECHANISM OF SLIDING ON ICE AND SNOW [A]		al ====		. 65
Pressure melting .OMO: MAR WINE TOAT	# CON	O AREA	v dota	. 6
Melting due to frictional heating .	ENDARR	FT OF St	SUBERNIE	. 60
Formation of a water laver				6
Effect of temperature	· [M] so	nerolisi	of labite	. 6
Effect of thermal conductivity	Ald Lane	debayada		. 6
Static and kinetic friction and the influence of s	peed	rianni the	z sopile	. 6
k and relevant references granded				
CHAPTER I'V. FRICTION AND SURFACE DA				
METALS	gulaebi	erl-strow	fect of	7.
THE MM.SUREMENT OF FRICTION	from In-	State No.	and trimore	. 7.
The measurement of the temperature of stationa	ary surfa	aces	sana se	. 7
Preparration of surfaces	terunga.	bon to	10,69	. 7
THE FRICTION OF METALS	ov galive	man la	tealin or	. 78
CHEMICAL AND RADIOACTIVE DETECTION OF METAL	L TRANS	FER [A]	JASUAT	. 82
FRICTION AND SURFACE DAMAGE AT LIGHT LOADS [				
EARLY THEORIES OF METALLIC FRICTION .	alme i	alt to to	ulnos so	. 8
CHAPTER V. MECHANISM OF METALLIC FRIG				. 90
THE ROLE OF SHEARING AND PLOUGHING .	To ski		PPP.	. 90
The phughing term		True Ten in	air tool.	. 92
The shearing term	1 . marrie	a birthan	ere cons	. 94
The shear strength of the metal junctions	ex sothi	te to sur	Anna-franc	. 9
Amontons's law .	brigate	ni lo sus	Accordant	. 98
THE INTERDEPENDENCE OF SHEARING AND PLOUGH	ING	Allen te	of the second	. 101
INTIMACY OF CONTACT AND THE INFLUENCE OF SUI	RFACE F	ILMS	or exalter	. 104
INTERMITTENT MOTION	torn min	19 1 11 11 11 11	VP man	. 105
LUBRICATING PROPERTIES OF THIN METALLIC FILMS	S			. 111
Friction as a function of track width .	Seen makes	1 midwei		. 113
The limiting him thickness	· south	ALC: UNK		. 114
Breakdown of the film . storp and to store	bingi ad	r no line	the best	. 115
vvear of nims	water from	Acole Sa		. 116
Effect of temperature		Witn Steel	*	. 117
METALLIC FILMS AS LUBRICANTS	Market Brank	. 5	• 12	. 119

0	~	117	13 13	B.T	TC

CONTENTS			XV
CHAPTER VI. ACTION OF BEARING ALLOYS [A]	sa). FITV	STOR	122
COPPER-LEAD BEARING ALLOYS	sien, ca	amus.	123
Frictional behaviour of steel, copper, and lead	(N)	(C)	124
Thin films of lead on copper	[14] 10	Relate	124
Copper–lead alloys	(a):	Fibre	125
Effect of wear on the friction	n least	DARK	126
Effect of temperature on friction		4.	128
Role of thin films in bearing alloys		1070	
Comparative behaviour of dendritic and non-dentritic alloys			
WHITE-METAL BEARING ALLOYS			
Lead-base alloys: structure and hardness	10 3985	nthại	132
Unlubricated surfaces	matile i	Rifer	134
Lubricated surfaces			
The role of the matrix and the hard particles			
Tin-base alloys: structure and hardness			
Unlubricated surfaces			
Lubricated surfaces			
Comparison of lead-base and tin-base bearing alloys .	वि क्षाप्रध	stolet.	139
SILVER-LEAD BEARINGS	DIME	Ouga	140
EFFECT OF TEMPERATURE CHANGES ON BEARING ALLOYS .	SHORULK:		140
THE ROLE OF THE SOFT CONSTITUENT IN BEARING ALLOYS		ATPULIN	
	aspl 16		
CHAPTER VII. FRICTION OF CLEAN SURFACES: EF	FECT		
CONTAMINANT FILMS	ega lo s	Effec	12 EC

CONTENTS		xvii
Compounds containing chlorine		230
Importance of chloride formation		232
LUBRICATION OF METALS BY COMPOUNDS CONTAINING SULPHUR		233
Sulphide films		233
Sulphurized compounds		235
Importance of chemical attack and of nature of surface film.	,	237
PHOSPHORUS ADDITIVES	,	238
REACTIVITY OF EXTREME PRESSURE AIDDITIVES [A]	,	239
EXTREME PRESSURE LUBRICANTS IN THE CUTTING AND DR AWING	OF	
METALS [A]		240
and the beginning of the		
CHAPTER XII. BREAKDOWN OF LUBRICANT FILMS [A].	,	247
LUBRICATION BETWEEN THE PISTON RINGS AND CYLINDER WALL O		
RUNNING ENGINE	Man't	
Effect of speed		248
Effect of viscosity and temperature		249
LUBRICATION BETWEEN A JOURNAL ANI BE AR ING	•	250
Effect of load, speed, viscosity, and temperature	•	252
EFFECT OF TEMPERATURE ON LUBRICAL VT F ILMS	•	254
CHAPTER XIII. NATURE OF CONTACT BETWEEN COLLIDI	NG	
SOLIDS [A]		258
SPHERICAL SURFACES		258
Effect of variation in the yield press ure.		261
The coefficient of restitution		264
Comparison of static and dynamic h ardness		265
Time of impact		267
Temperature of impact		270
Effect of lubricant film		271
FLAT SURFACES		272
Pressure developed in the liquid film l .		275
Velocity of flow and rate of shear		279
Temperature developed in the liquid I film		279
PRACTICAL IMPLICATIONS		281
CHAPTER XIV. THE NATURE OF MI ETALLIC WEAR [A]		285
