Contributors xv

Preface xix

PART 1 Principles of Operation

Chapter 1 Basic Concepts **1.3**

- 1.1 Components of Cells and Batteries *¶* 1.3
- 1.2 Classification of Cells and Batteries *¶* 1.4
- 1.3 Operation of a Cell *¶* 1.7
- 1.4 Theoretical Cell Voltage, Capacity, and Energy *¶* 1.9
- 1.5 Specific Energy and Energy Density of Practical Batteries *¶* 1.14
- 1.6 Upper Limits of Specific Energy and Energy Density *¶* 1.17

Chapter 2 Electrochemical Principles and Reactions **2.1**

- 2.1 Introduction *¶* 2.1
- 2.2 Thermodynamic Background *¶* 2.4
- 2.3 Electrode Processes *¶* 2.5
- 2.4 Electrical Double-Layer Capacity and Ionic Adsorption *¶* 2.11
- 2.5 Mass Transport to the Electrode Surface *¶* 2.16
- 2.6 Electroanalytical Techniques *¶* 2.20

Chapter 3 Factors Affecting Battery Performance **3.1**

- 3.1 General Characteristics *¶* 3.1
- 3.2 Factors Affecting Battery Performance I 3.1

Chapter 4 Battery Standardization **4.1**

- 4.1 General *¶* 4.1
- 4.2** International Standards *¶* 4.3
- 4.3** Concepts of Standardization *¶* 4.4
- 4.4** IEC and ANSI Nomenclature Systems *¶* 4.5
- 4.5** Terminals / 4.8
- 4.6** Electrical Performance *¶* 4.9
- 4.7** Markings *¶* 4.10
- 4.8** Cross-References of ANSI IEC Battery Standards *¶* 4.11
- 4.9** Listing of IEC Standard Round Primary Batteries *¶* 4.12
- 4.10 Standard SLI and Other Lead-Acid Batteries *¶* **4.13**
- 4.11 Regulatory and Safety Standards *¶* 4.21

Chapter 5 Battery Design	5.1
<hr/>	
5.1 General	5.1
5.2 Designing to Eliminate Potential Safety Problems	5.1
5.3 Battery Safeguards when Using Discrete Batteries	5.7
5.4 Battery Construction	5.10
5.5 Design of Rechargeable Batteries	5.14
5.6 Challenges Energy Management and Display-“Smart” Batteries	5.18
Chapter 6 Selection and Application of Batteries	6.1
<hr/>	
6.1 General Characteristics	6.1
6.3 Major Applications Selecting a Battery	6.2
6.4 Portable Applications	6.8
PART 2 Primary Batteries	
Chapter 7 Primary Batteries-Introduction	7.3
<hr/>	
7.1 General Characteristics and Applications of Primary Batteries	7.3
7.2 Types and Characteristics of Primary Batteries	7.5
7.3 Comparison of the Performance Characteristics of Primary Battery Systems	7.9
7.4 Recharging Primary Batteries	7.21
Chapter 8 Zinc-Carbon Batteries (Leclanché and Zinc Chloride Cell Systems)	8.1
<hr/>	
8.1 General Characteristics	8.1
8.2 Chemistry	8.4
8.3 Types of Cells and Batteries	8.5
8.4 Construction	8.7
8.5 Cell Components	8.11
8.6 Performance Characteristics	8.17
8.7 Special Designs	8.37
8.8 Types and Sizes of Available Cells and Batteries	8.40
Chapter 9 Magnesium and Aluminum Batteries	9.1
<hr/>	
9.1 General Characteristics	9.1
9.2 Chemistry	9.2
9.3 Construction of Mg/MnO ₂ Batteries	9.4
9.4 Performance Characteristics of Mg/MnO ₂ Batteries	9.6
9.5 Sizes and Types of Mg/MnO ₂ Batteries	9.12
9.6 Other Types of Magnesium Primary Batteries	9.13
9.7 Aluminum Primary Batteries	9.13
Chapter 10 Alkaline-Manganese Dioxide Batteries	10.1
<hr/>	
10.1 General Characteristics	10.1
10.2 Chemistry	10.3
10.3 Cell Components and Materials	10.5
10.4 Construction	10.10
10.5 Performance Characteristics	10.13
10.6 Battery Types and Sizes	10.27
10.7 Premium Zinc/Alkaline/Manganese Dioxide High-Rate Batteries	10.29

Chapter 11 Mercuric Oxide Batteries 11.1

-
- 11.1 General Characteristics / *11.1*
 - 11.2 Chemistry / *11.2*
 - 11.3 Cell Components / *11.3*
 - 11.4 Construction / *11.5*
 - 11.5 Performance Characteristics of Zinc/Mercuric Oxide Batteries / *11.8*
 - 11.6 Performance Characteristics of Cadmium/Mercuric Oxide Batteries / *11.13*

Chapter 12 Silver Oxide Batteries 12.1

-
- 12.1 General Characteristics / *12.1*
 - 12.2 Battery Chemistry and Components / *12.2*
 - 12.3 Construction / *12.10*
 - 12.4 Performance Characteristics / *12.11*
 - 12.5 Cell Sizes and Types / *12.16*

Chapter 13 Zinc/Air Batteries-Button Configuration 13.1

-
- 13.1 General Characteristics / *13.1*
 - 13.2 Chemistry / *13.2*
 - 13.3 Construction / *13.3*
 - 13.4 Performance Characteristics / *13.6*

Chapter 14 Lithium Batteries 14.1

-
- 14.1 General Characteristics / *14.1*
 - 14.2 Chemistry / *14.5*
 - 14.3 Characteristics of Lithium Primary Batteries / *14.9*
 - 14.4 Safety and Handling of Lithium Batteries / *14.17*
 - 14.5 Lithium/Sulfur Dioxide (Li/SO₂) Batteries / *14.19*
 - 14.6 Lithium/Thionyl Chloride (Li/SOCl₂) Batteries / *14.31*
 - 14.7 Lithium/Oxychloride Batteries / *14.49*
 - 14.8 Lithium/Manganese Dioxide (Li/MnO₂) Batteries / *14.55*
 - 14.9 Lithium/Carbon Monofluoride {Li/(CF)_n} Batteries / *14.72*
 - 14.10 Lithium/Iron Disulfide (Li/FeS₂) Batteries / *14.84*
 - 14.11 Lithium/Copper Oxide (Li/CuO) and Lithium/Copper Oxyphosphate [Li/Cu₄O(PO₄)₂] Cells / *14.92*
 - 14.12 Lithium/Silver Vanadium Oxide Batteries I *14.99*

Chapter 15 Solid-Electrolyte Batteries 15.1

-
- 15.1 General Characteristics / *15.1*
 - 15.2 Li/Li(Al₂O₃)/Metal Salt Batteries I *15.3*
 - 15.3 The Lithium/Iodine Battery / *15.9*
 - 15.4 Ag/RbAg₄I₅/Me₄Ni_nC Batteries I *15.22*

PART 3 Reserve Batteries**Chapter 16 Reserve Batteries-Introduction** 16.3

-
- 16.1 Classification of Reserve Batteries / *16.3*
 - 16.2 Characteristics of Reserve Batteries I *16.4*

Chapter 17	Magnesium Water-Activated Batteries	17.1
	17.1 General Characteristics I <i>17.1</i>	
	17.2 Chemistry I <i>17.2</i>	
	17.3 Types of Water-Activated Batteries I <i>17.3</i>	
	17.4 Construction <i>¶ 17.6</i>	
	17.5 Performance Characteristics I <i>17.10</i>	
	17.6 Battery Applications I <i>17.23</i>	
	17.7 Battery Types and Sizes <i>¶ 17.26</i>	
Chapter 18	Zinc/Silver Oxide Reserve Batteries	18.1
	18.1 General Characteristics <i>¶ 18.1</i>	
	18.2 Chemistry <i>¶ 18.2</i>	
	18.3 Construction I <i>18.2</i>	
	18.4 Performance Characteristics I <i>18.7</i>	
	18.5 Cell and Battery Types and Sizes I <i>18.12</i>	
	18.6 Special Features and Handling I <i>18.16</i>	
	18.7 cost I <i>18.16</i>	
Chapter 19	Spin-Dependent Reserve Batteries	19.1
	19.1 General Characteristics I <i>19.1</i>	
	19.2 Chemistry <i>¶ 19.2</i>	
	19.3 Design Considerations <i>¶ 19.3</i>	
	19.4 Performance Characteristics I <i>19.6</i>	
Chapter 20	Ambient-Temperature Lithium Anode Reserve Batteries	20.1
	20.1 General Characteristics <i>¶ 20.1</i>	
	20.2 Chemistry <i>¶ 20.2</i>	
	20.3 Construction I <i>20.4</i>	
	20.4 Performance Characteristics I <i>20.15</i>	
Chapter 21	Thermal Batteries	21.1
	21.1 General Characteristics <i>¶ 21.1</i>	
	21.2 Description of Electrochemical Systems <i>¶ 21.3</i>	
	21.3 Cell Chemistry <i>¶ 21.7</i>	
	21.4 Cell Construction I <i>21.10</i>	
	21.5 Cell-Stack Designs <i>¶ 21.14</i>	
	21.6 Performance Characteristics I <i>21.16</i>	
	21.7 Testing and Surveillance <i>¶ 21.20</i>	
	21.8 New Developments I <i>21.20</i>	
PART 4 Secondary Batteries		
Chapter 22	Secondary Batteries-Introduction	22.3
	22.1 General Characteristics and Applications of Secondary Batteries <i>¶ 22.3</i>	
	22.2 Types and Characteristics of Secondary Batteries <i>¶ 22.8</i>	
	22.3 Comparison of Performance Characteristics for Secondary Battery Systems <i>¶ 22.11</i>	

Chapter 23	Lead-Acid Batteries	23.1
	23.1 General Characteristics # 23.1	
	23.2 Chemistry I 23.6	
	23.3 Constructional Features, Materials, and Manufacturing Methods # 23.16	
	23.4 SLI (Automotive) Batteries: Construction and Performance I 23.35	
	23.5 Deep-Cycle and Traction Batteries: Construction and Performance # 23.44	
	23.6 Stationary Batteries: Construction and Performance I 23.54	
	23.7 Charging and Charging Equipment # 23.67	
	23.8 Maintenance Safety, and Operational Features # 23.75	
	23.9 Applications and Markets I 23.81	
Chapter 24	Valve Regulated Lead-Acid Batteries	24.1
	24.1 General Characteristics # 24.1	
	24.2 Chemistry # 24.3	
	24.3 Cell Construction # 24.4	
	24.4 Performance Characteristics # 24.8	
	24.5 Charging Characteristics # 24.27	
	24.6 Safety and Handling I 24.39	
	24.7 Battery Types and Sizes # 24.40	
	24.8 Applications of VRLA Batteries to Uninterruptible Power Supplies # 24.43	
Chapter 25	Iron Electrode Batteries	25.1
	25.1 General Characteristics # 25.1	
	25.2 Chemistry of Nickel-Iron Batteries # 25.2	
	25.3 Conventional Nickel-Iron Batteries # 25.4	
	25.4 Advanced Nickel-Iron Batteries # 25.13	
	25.5 Iron/Air Batteries # 25.16	
	25.6 Silver-Iron Battery # 25.19	
	25.7 Iron Materials as Cathodes # 25.23	
Chapter 26	Industrial and Aerospace Nickel-Cadmium Batteries	26.1
	26.1 Introduction # 26.1	
	26.2 Chemistry # 26.4	
	26.3 Construction # 26.4	
	26.4 Performance Characteristics I 26.9	
	26.5 Charging Characteristics # 26.14	
	26.6 Fiber Nickel-Cadmium (FNC) Battery Technology # 26.15	
	26.7 Manufacturers and Market Segments # 26.24	
	26.8 Applications # 26.28	
Chapter 27	Vented Sintered-Plate Nickel-Cadmium Batteries	27.1
	27.1 General Characteristics # 27.1	
	27.2 Chemistry # 27.2	
	27.3 Construction # 27.3	
	27.4 Performance Characteristics # 27.7	
	27.5 Charging Characteristics # 27.16	
	27.6 Maintenance Procedures # 27.20	
	27.7 Reliability # 27.22	
	27.8 Cell and Battery Designs # 27.26	

Chapter 28	Portable Sealed Nickel-Cadmium Batteries	28.1
	28.1 General Characteristics <i>¶ 28.1</i>	
	28.2 Chemistry <i>¶ 28.2</i>	
	28.3 Construction <i>¶ 28.3</i>	
	28.4 Performance Characteristics <i>¶ 28.6</i>	
	28.5 Charging Characteristics I <i>28.20</i>	
	28.6 Special-Purpose Batteries <i>¶ 28.26</i>	
	28.7 Battery Types and Sizes <i>¶ 28.32</i>	
Chapter 29	Portable Sealed Nickel-Metal Hydride Batteries	29.1
	29.1 General Characteristics <i>¶ 29.1</i>	
	29.2 Chemistry <i>¶ 29.2</i>	
	29.3 Construction <i>¶ 29.4</i>	
	29.4 Discharge Characteristics <i>¶ 29.7</i>	
	29.5 Charging Sealed Nickel-Metal Hydride Batteries <i>¶ 29.21</i>	
	29.6 Cycle and Battery Life <i>¶ 29.29</i>	
	29.7 Proper Use and Handling <i>¶ 29.32</i>	
	29.8 Applications <i>¶ 29.32</i>	
	29.9 Battery Types and Manufacturers <i>¶ 29.32</i>	
Chapter 30	Propulsion and Industrial Nickel-Metal Hydride Batteries	30.1
	30.1 Introduction <i>¶ 30.1</i>	
	30.2 General Characteristics <i>¶ 30.2</i>	
	30.3 Chemistry <i>¶ 30.3</i>	
	30.4 Construction <i>¶ 30.4</i>	
	30.5 EV Battery Packs <i>¶ 30.14</i>	
	30.6 HEV Battery Packs <i>¶ 30.16</i>	
	30.7 Fuel Cell Startup and Power Assist <i>¶ 30.18</i>	
	30.8 Other Applications <i>¶ 30.18</i>	
	30.9 Discharge Performance <i>¶ 30.22</i>	
	30.10 Charge Methods <i>¶ 30.29</i>	
	30.11 Thermal Management <i>¶ 30.30</i>	
	30.12 Electrical Isolation <i>¶ 30.31</i>	
	30.13 Development Targets I <i>30.32</i>	
Chapter 31	Nickel-Zinc Batteries	31.1
	3 1.1 General Characteristics <i>¶ 31.1</i>	
	31.2 Chemistry I <i>31.2</i>	
	31.3 Cell Components <i>¶ 31.3</i>	
	31.4 Construction <i>¶ 31.12</i>	
	3 1.5 Performance Characteristics <i>¶ 31.17</i>	
	3 1.6 Charging Characteristics <i>¶ 31.25</i>	
	31.7 Applications <i>¶ 31.29</i>	
	31.8 Handling and Storage <i>¶ 31.35</i>	
Chapter 32	Nickel-Hydrogen Batteries	32.1
	32.1 General Characteristics I <i>32.1</i>	
	32.2 Chemistry <i>¶ 32.2</i>	
	32.3 Cell and Electrode-Stack Components <i>¶ 32.3</i>	
	32.4 Ni-H, Cell Construction <i>¶ 32.6</i>	
	32.5 Ni-H, Battery Design <i>¶ 32.11</i>	
	32.6 Applications <i>¶ 32.16</i>	
	32.7 Performance Characteristics <i>¶ 32.19</i>	
	32.8 Advanced Designs <i>¶ 32.26</i>	

Chapter 33 Silver Oxide Batteries	33.1
33.1 General Characteristics <i>¶ 33.1</i>	
33.2 Chemistry <i>¶ 33.3</i>	
33.3 Cell Construction and Components I 33.4	
33.4 Performance Characteristics <i>¶ 33.8</i>	
33.5 Charging Characteristics <i>¶ 33.20</i>	
33.6 Cell Types and Sizes <i>¶ 33.22</i>	
33.7 Special Features and Handling I 33.25	
33.8 Applications <i>¶ 33.25</i>	
33.Y Recent Developments <i>¶ 33.28</i>	

Chapter 34 Rechargeable Lithium Batteries (Ambient Temperature)	34.1
34.1 General Characteristics <i>¶ 34.1</i>	
34.2 Chemistry I 34.4	
34.3 Characteristics of Lithium Rechargeable Batteries <i>¶ 34.17</i>	
34.4 Characteristics of Specific Rechargeable Lithium Metal Batteries <i>¶ 34.25</i>	

Chapter 35 Lithium-Ion Batteries	35.1
35.1 General Characteristics <i>¶ 35.1</i>	
35.2 Chemistry <i>¶ 35.4</i>	
35.3 Construction of Cylindrical and Prismatic Li-Ion Cells and Batteries <i>¶ 35.31</i>	
35.4 Li-Ion Battery Performance <i>¶ 35.35</i>	
35.5 Charge Characteristics of Li-Ion Batteries <i>¶ 35.67</i>	
35.6 Safety Testing of Cylindrical C/LiCoO ₂ Batteries <i>¶ 35.70</i>	
35.7 Polymer Li-Ion Batteries <i>¶ 35.71</i>	
35.8 Thin-Film, Solid-State Li-Ion Batteries <i>¶ 35.85</i>	
35.9 Conclusions and Future Trends <i>¶ 35.90</i>	

Chapter 36 Rechargeable Zinc/Alkaline/Manganese Dioxide Batteries	36.1
36.1 General Characteristics <i>¶ 36.1</i>	
36.2 Chemistry <i>¶ 36.2</i>	
36.3 Construction <i>¶ 36.4</i>	
36.4 Performance <i>¶ 36.5</i>	
36.5 Charge Methods <i>¶ 36.13</i>	
36.6 Types of Cells and Batteries <i>¶ 36.17</i>	

PART 5 Advanced Batteries for Electric Vehicles and Emerging Applications

Chapter 37 Advanced Batteries for Electric Vehicles and Emerging Applications-Introduction	37.3
37.1 Performance Requirements for Advanced Rechargeable Batteries <i>¶ 37.3</i>	
37.2 Characteristics and Development of Rechargeable Batteries for Emerging Applications <i>¶ 37.9</i>	
37.3 Near-Term Rechargeable Batteries <i>¶ 37.17</i>	
37.4 Advanced Rechargeable Batteries-General Characteristics <i>¶ 37.18</i>	
37.5 Refuelable Batteries and Fuel Cells-An Alternative to Advanced Rechargeable Batteries I 37.23	

Chapter 38 Metal/Air Batteries 38.1

- 38.1 General Characteristics / 38.1
- 38.2 Chemistry / 38.4
- 38.3 Zinc/Air Batteries / 38.6
- 38.4 Aluminum/Air Batteries / 38.30
- 38.5 Magnesium/Air Batteries / 38.44
- 38.6 Lithium/Air Batteries / 38.46

Chapter 39 Zinc/Bromine Batteries 39.1

- 39.1 General Characteristics / 39.1
- 39.2 Description of a Flow Electrochemical System / 39.2
- 39.3 Construction / 39.4
- 39.4 Performance / 39.6
- 39.5 Tradeoff Considerations / 39.10
- 39.6 Safety and Hazards / 39.11
- 39.7 Applications and System Designs / 39.11
- 39.8 Projections and Projections / 39.20

Chapter 40 Sodium-Beta Batteries 40.1

- 40.1 General Characteristics / 40.1
- 40.2 Description of a Flow Electrochemical System / 40.3
- 40.3 Battery Design and Performance Characteristics / 40.7
- 40.4 Applications and Performance Characteristics / 40.17
- 40.5 Construction / 40.28

Chapter 41 Lithium/Iron Sulfide Batteries 41.1

- 41.1 General Characteristics / 41.1
- 41.2 Description of a Flow Electrochemical System / 41.3
- 41.3 Construction / 41.4
- 41.4 Performance Characteristics / 41.6
- 41.5 Applications and Battery Designs / 41.15

PART 6 Portable Fuel Cells

Chapter 42 Portable Fuel Cells-Introduction 42.3

- 42.1 General Characteristics / 42.3
- 42.2 Operation of the Fuel Cell / 42.5
- 42.3 Sub-Kilowatt Fuel Cells / 42.9
- 42.4 Innovative Designs for Low Wattage Fuel Cells / 42.12

Chapter 43 Small Fuel Cells (Less than 1000 Watts) 43.1

- 43.1 General / 43.1
- 43.2 Application of Fuel Cells Technologies / 43.2
- 43.3 Fuel Processing and Storage Technologies / 43.7
- 43.4 Hardware Technology / 43.12
- 43.5 and Performance / 43.14

PART 7 Appendices

A. Definitions	A.1
<hr/>	
B. Standard Reduction Potentials	B.1
<hr/>	
C. Electrochemical Equivalents of Battery Materials	c.1
<hr/>	
D. Standard Symbols and Constants	D.1
<hr/>	
E. Conversion Factors	E.1
<hr/>	
F. Bibliography	F.1
<hr/>	
G. Battery Manufacturers and R&D Organizations	G.1
<hr/>	

Index follows Appendices
