Contents

	Series Foreword by L. M. Simmons, Jr.	xiii
	Foreword by Jack Cowan	xv
	Foreword by Christof Koch	xvii
	Preface	xix
ONE	Introduction	1
1.1	Inspiration from Neuroscience	2
1.2	History	6
1.3	The Issues	8
TWO	The Hopfield Model	11
2.1	The Associative Memory Problem	11
2.2	The Model	13
2.3	Statistical Mechanics of Magnetic Systems	25
2.4	Stochastic Networks	32
2.5	Capacity of the Stochastic Network	35
THREE	Extensions of the Hopfield Model	43
3.1	Variations on the Hopfield Model	43
3.2	Correlated Patterns	49
3.3	Continuous-Valued Units	53
3.4	Hardware Implementations	58
3.5	Temporal Sequences of Patterns	63
FOUR	Optimization Problems	71
4.1	The Weighted Matching Problem	72
4.2	The Travelling Salesman Problem	76
4.3	Graph Bipartitioning	79
4.4	Optimization Problems in Image Processing	81

FIVE	Simple Perceptrons	89
5.1	Feed-Forward Networks	90
5.2	Threshold Units	92
5.3	Proof of Convergence of the Perceptron Learning Rule	100
5.4	Linear Units	102
5.5	Nonlinear Units	107
5.6	Stochastic Units	110
5.7	Capacity of the Simple Perceptron	111
SIX	Multi-Layer Networks	115
6.1	Back-Propagation	111
6.2	Variations on Back-Propagation	120
6.3	Examples and Applications	130
6.4	Performance of Multi-Layer Feed-Forward Networks	141
6.5	A Theoretical Framework for Generalization	147
6.6	Optimal Network Architectures	156
SEVEN	Recurrent Networks	18
7.1	Boltzmann Machines	16
7.2	Recurrent Back-Propagation	17
7.3	Learning Time Sequences	17
7.4	Reinforcement Learning	18
EIGHT	Unsupervised Hebbian Learning	19
8.1	Unsupervised Learning	1
8.2	One Linear Unit	1
8.3	Principal Component Analysis	2
8.4	Self-Organizing Feature Extraction	2
NINE	Unsupervised Competitive Learning	1
9.1	Simple Competitive Learning	2'
9.2	Examples and Applications of Competitive Learning	2:
9.3	Adaptive Resonance Theory	2:
9.4	Feature Mapping	2:
9.5	Theory of Feature Mapping	2
9.6	The Travelling Salesman Problem	2
9.7	Hybrid Learning Schemes	2
TEN	Formal Statistical Mechanics of Neural Networks	2
10.1	The Hopfield Model	2
10.2	Gardner Theory of the Connections	2

APPENDIX Statistical Mechanics 275
A.1 The Boltzmann-Gibbs Distribution 275
A.2 Free Energy and Entropy 277
A.3 Stochastic Dynamics 279

Bibliography 281
