

CONTENTS

Preface	ix
Dynamical Symmetry Be-arrangement and Nuclei <i>F. C. Khanna and X. Q. Zhu</i>	3
Symmetry and Systematics <i>M. Suzuki</i>	12
Non-Abelian Lattice Groups and Non-Euclidean Lattices: Generalizing the Fullerene Symmetry <i>M. Rasetti and R. Zecchina</i>	27
“Peierls Substitution” and Chern-Simons Quantum Mechanics <i>G. Dunne and R. Jackiw</i>	49
The Theory of Identical Particles and the Many-Body Problem in Low Dimensions <i>F. Illuminati</i>	57
Holstein-Primakoff Transformations and Coherent States for Strongly Correlated Electrons <i>A. Angelucci and R. Link</i>	71
A Systematic Perturbation Approach to the p-d Model for High T_c Oxide Superconductors <i>F. Mancini</i>	82
Magnetism in Superconducting Compounds <i>J. P. Whitehead, K. De’Bell and A. B. MacIsaac</i>	110
Normal and Superconducting Properties of Systems Described by the Periodic Anderson Model <i>M. Marinaro, C. Noce and A. Romano</i>	135
Flux Lattice Relaxation, Noise and Symmetry-Breaking in Frustrated Josephson Junction Arrays <i>N. Granbech-Jensen, A. R. Bishop and P. S. Lomdahl</i>	148
Quantum Solids by Means of Effective Potential <i>A. Cuccoli, A. Macchi, V. Tognetti, A. A. Maradudin, A. R. McGurn and R. Vaia</i>	163

On the Extended Impurity Problem <i>L. De Cesare</i>	176
A Topological Study of Random Walks <i>K. Tsurusaki, T. Deguchi and M. Wadati</i>	185
Gauge Theory of the Thermal Bogoliubov Transformation <i>K. Nakamum</i>	207
Green Function Method for Composite Operators <i>H. Matsumoto</i>	217
Development of Nonequilibrium TFD <i>Y. Yamanaka</i>	237
A Unified Framework of Quantum Stochastic Differential Equations <i>T. Arimitsu and T. Saito</i>	250
Evolution Equation for the Thermal Vacuum from Time-Dependent Bogoliubov Transformations <i>P. Shanta, S. Chaturvedi, V. Srinivasan and F. Mancini</i>	270
Laser Radiation and Thermo-Field Dynamics <i>Y. Georgelin and Y. Leblanc</i>	280
The Gauge Structure of Thermo-Field Dynamics <i>E. Celeghini, E. Gmriano, K. Nakamura and G. Vitiello</i>	291
Vacuum Polarization in Black Hole Thermospheres and Nuclei <i>W. Israel</i>	300
C-Calculus: From Coarse to Fine Measurement <i>E. R. Caianiello</i>	317
Integrable Systems of Coupled Nonlinear ODEs and PDEs and Solvable Nonlinear Integrodifferential Equations of Boltzmann Type <i>F. Calogero</i>	323
Functional Order Parameters for the Quenched Free Energy in Mean Field Spin Glass Models <i>F. Guerm</i>	351
Vacuum Structure and Jump Markovian Processes <i>S. De Martino, S. De Siena, E. Graziand and G. Vitiello</i>	358

Supersymmetric Theories as Hierarchies of Ordinary Hamiltonian Theories	366
<i>S. De Filippo</i>	
Remarks on the Construction of Measures for Euclidean Gauge Fields	377
<i>G. Dell'Antonio</i>	
Physical States of Unbroken Gauge Symmetry	400
<i>M. H. Friedman, A. Widom and Y. N. Srivastava</i>	
Quantum Spins and Strong Coupling in Gauge Theory	411
<i>E. Langmann, G. W. Semenoff, M. C. Diamantini and P. Sodano</i>	
Perturbation Properties of the Multipole Ghost System	431
<i>Y. Nakano</i>	
Dynamical Origin of the CP Violation	440
<i>S. Hashimoto, T. Inagaki and T. Muta</i>	
Particle and Wave Pictures: Are They Equivalent?	456
<i>H. Ezawa</i>	
Novel High Energy Phenomena at TeV Scale with Neutrino Telescopes	470
<i>M. Guida</i>	
Inequivalent Representations in Quantum Field Theory and Neutrino Mass and Oscillations	476
<i>E. Alfinito and G. Vitiello</i>	
Surgery on Three-Manifolds and Quantum Field Theory	487
<i>E. Guadagnini</i>	
Path-Integral Approach to Classical Mechanics and Toda Criterion	570
<i>E. Gozzi, M. Reuter and W. D. Thacker</i>	
Asymptotic Formulae for Cycles in the Quadratic Map	584
<i>J. Stephenson</i>	
Summary Talk: Hiroomi Umezawa, His Physics and Research	593
<i>S. Kamefuchi</i>
