

## Chapter 1

# COLLECTION, PREPARATION, AND STORAGE OF SAMPLES FOR SPECIATION ANALYSIS

Graeme E. Batley

## TABLE OF CONTENTS

I.	Introduction .....	2
II.	Water Samples .....	2
	A. Water Sampling .....	2
	B. Water Sample Pretreatment .....	4
	C. Water Sample Storage .....	6
III.	Sediment Samples .....	10
	A. Sediment Sampling .....	10
	B. Sediment Sample Preparation and Storage .....	11
IV.	Atmospheric Samples .....	12
	A. Sampling of Aerosols .....	12
	B. Atmospheric Deposition .....	15
V.	Biological Samples .....	16
	A. Sampling .....	16
	B. Sample Preparation and Storage .....	17
VI.	Laboratory Design and Practice .....	18
	A. Clean Laboratories .....	18
	B. Laboratory Apparatus and Reagents .....	18
	References .....	20

## Chapter 2

**TRACE ELEMENT SPECIATION AND ITS RELATIONSHIP TO BIOAVAILABILITY AND TOXICITY IN NATURAL WATERS**

G. M. P. Morrison

**TABLE OF CONTENTS**

I.	Introduction .....	26
II.	Bioavailable and Toxic Metal Species .....	27
	A. Introduction .....	27
	B. Free and Weakly Complexed Metal .....	27
	C. Lipid-Soluble Metal .....	29
	D. Sediment-Bound Metal .....	29
III.	Mechanisms of Metal Transport Across Biomembranes .....	29
	A. Introduction .....	29
	B. Passive Diffusion .....	29
	C. Facilitated (Carrier-Mediated) Transport .....	29
	D. Active Transport .....	32
IV.	Metal Accumulation by Organisms .....	33
V.	Metal Toxicity and Detoxification .....	35
VI.	Conclusions .....	37
	Acknowledgments .....	38
	References .....	38

# PHYSICOCHEMICAL SEPARATION METHODS FOR TRACE ELEMENT SPECIATION IN AQUATIC SAMPLES

Graeme E. Batley

## TABLE OF CONTENTS

- I. Introduction ..... 44
- II. Separation Techniques ..... 44
  - A. Filtration ..... 44
  - B. Ultrafiltration ..... 45
  - C. Centrifugation ..... 51
  - D. Dialysis ..... 51
  - E. Gel Filtration ..... 57
  - F. Adsorption and Ion Exchange ..... 59
  - G. Solvent Extraction ..... 66
  - H. Foam Fractionation ..... 66
  - I. Photooxidation ..... 66
- III. Speciation Schemes Based on Physicochemical Separations ..... 68
- IV. Conclusions ..... 71
- References ..... 71

## Chapter 4

ELECTROCHEMICAL TECHNIQUES FOR TRACE ELEMENT SPECIATION  
IN WATERS

T. Mark Florence

## TABLE OF CONTENTS

I.	Introduction.....	78
II.	Range of Applicability of Electrochemical Speciation Methods.....	79
	A. Labile/Inert Discrimination.....	79
	B. Redox State.....	79
	C. Half-Wave Potential Shifts.....	81
	D. Limitations of Electrochemical Speciation Techniques.....	81
	E. Speciation Schemes Combining Electrochemical and Other Techniques.....	83
	F. Electrodeposition Prior to Carbon Furnace Atomic Absorption Spectrometry.....	84
III.	Theory of Labile/Inert Discrimination.....	85
	A. The Electrodeposition Step.....	85
	B. The ASV Stripping Step.....	89
	C. Comparison of Kinetics of Dissociation of Metal Complexes at an Electrode and a Biomembrane.....	90
IV.	Electrodes for Speciation Measurements.....	91
	A. Hanging Mercury Drop Electrode (HMDE).....	91
	B. Thin Mercury Film Electrode (TMFE).....	92
	C. Jet Stream Mercury Film Electrode.....	94
	D. Flow-Through Cells.....	94
	E. Streaming Mercury Film Electrode (SME).....	94
	F. Microelectrodes.....	95
	G. Chemically Modified Electrodes.....	95
V.	Electrochemical Techniques for Speciation.....	96
	A. Polarography.....	96
	B. Anodic Stripping Voltammetry (ASV).....	96
	C. Cathodic Stripping Voltammetry (CSV).....	97
	D. Potentiometric Stripping Analysis (PSA).....	98
	E. Pseudopolarography.....	98
	F. Modulation Waveforms.....	99
VI.	Some Speciation Results Using Electrochemical Techniques.....	99
	A. Collection and Preservation of Water Samples for Speciation Measurements.....	99
	B. Selected Electrochemical Speciation Results for Some Trace Metals in Waters.....	99
	1. Copper.....	99

2.	Lead .....	100
3.	Cadmium .....	101
4.	Zinc .....	<b>101</b>
5.	<b>Manganese</b> .....	<b>101</b>
VII.	Correlation Between ASV-Labile Measurements and Toxicity .....	<b>101</b>
VIII.	Complexing Capacity .....	103
IX.	Conclusions and Recommendations for Future Research .....	<b>105</b>
	References .....	<b>107</b>

## Chapter 5

## MATHEMATICAL MODELING OF TRACE ELEMENT SPECIATION

T. David Waite

## TABLE OF CONTENTS

I.	Introduction. ....	118
II.	Mathematical Approaches to Equilibrium Modeling .....	118
III.	Methods of Nonideality and Temperature Correction .....	121
	A. Nonideality Correction .....	121
	B. Temperature Correction .....	125
IV.	Overview of Available Models.....	127
V.	Detailed Discussion of Selected Models .....	130
	A. <b>THERMODATA/CHEMIX</b> .....	130
	1. Program Synopsis.....	130
	2. Mathematical Formulation of <b>THERMODATA/</b> <b>CHEMIX</b> .....	132
	3. Application of <b>THERMODATA/CHEMIX</b> .....	133
	a. Example 1. Solubility of Gypsum in Strong Aqueous Solution .....	133
	b. Example 2. Zinc Speciation in Groundwaters .....	133
	B. <b>MINEQL/MICROQL</b> .....	136
	1. Program Synopsis .....	136
	2. Mathematical Formulation of <b>MINEQL/MICROQL</b> .....	137
	3. Application of <b>MINEQL</b> and <b>MICROQL</b> .....	139
	a. <b>Example 1. Addition of <math>10^{-3}</math> M <math>\text{CaCO}_3</math> to</b> Solution .....	139
	b. Example 2. Species Distribution in the Growth Medium <b>AQUIL</b> .....	141
	c. Example 3. Trace Element Speciation in Sewage .....	142
	C. <b>EQ3/6</b> .....	143
	1. Program Synopsis .....	143
	2. Mathematical Formulation of <b>EQ3/6</b> .....	146
	3. Application of <b>EQ3/6</b> .....	148
	a. Example 1. Iron and Uranium Speciation Under Reducing Conditions .....	148
VI.	Model Intercomparisons .....	150
VII.	Adsorption Modeling .....	161
VIII.	Incorporation of Kinetics in Speciation Models .....	168

IX.	Transport Modeling .....	170
A.	Surface Waters .....	<b>no</b>
B.	Subsurface Waters .....	<b>171</b>
X.	Conclusions .....	175
	References .....	178

## Chapter 6

APPLICATIONS OF HIGH-PERFORMANCE LIQUID CHROMATOGRAPHY  
TO TRACE ELEMENT SPECIATION STUDIES

Graeme E. Batley and Gary K.-C. Low

## TABLE OF CONTENTS

I.	Introduction. ....	186
II.	Practical HPLC .....	186
	A. Column Technology .....	186
	1. Reversed-Phase Separations. ....	186
	2. Normal-Phase Separations .....	187
	3. Ion Chromatography .....	187
	4. Gel Permeation Chromatography. ....	187
	B. Pumps and Hardware.....	188
	C. Detection Systems. ....	188
III.	Speciation Studies .....	200
	A. Arsenic .....	200
	1. Occurrence.....	200
	2. Analysis .....	201
	B. Selenium .....	205
	1. Occurrence.....	205
	2. Analysis .....	205
	C. Tin .....	206
	1. Occurrence.....	206
	2. Analysis .....	206
	D. Lead .....	208
	E. Mercury .....	209
	F. Other Metals .....	210
	G. Anion Speciation .....	211
	References .....	212

# APPLICATIONS OF GAS CHROMATOGRAPHY TO TRACE ELEMENT SPECIATION

Y. K. Chau and P. T. S. Wong

## TABLE OF CONTENTS

I.	General Introduction .....	220
II.	Instrumentation .....	220
	A. Introduction .....	220
	B. GC Columns .....	220
	C. Detection Systems .....	221
	1. General .....	221
	2. Electron Capture Detection .....	221
	3. Atomic Absorption Detection .....	222
	4. Atomic Emission Detection .....	226
	5. Atomic Fluorescence Detection .....	233
	6. Mass Spectrometric Detection .....	233
III.	Sample Preparation .....	233
	A. Extraction and Preconcentration .....	233
	B. Derivatization Techniques .....	235
	1. Hydridization .....	235
	2. Alkylation .....	237
IV.	Conclusions .....	239
	References .....	239

## Chapter 8

## SPECIATION OF TRACE ELEMENTS IN SEDIMENTS

Michael Kersten and Ulrich Förstner

## TABLE OF CONTENTS

I.	Introduction.....	246
II.	Instrumental Methods.....	247
	A. Physical Separation Techniques.....	247
	B. Nondestructive Microanalysis Techniques.....	253
	1. X-Ray Fluorescence Techniques.....	253
	2. Other Techniques.....	257
III.	Selective Extraction Methods.....	259
	A. General Considerations.....	259
	B. Sediment and Soil Sampling and Handling for Selective Extraction.....	261
	1. Sampling.....	261
	2. Sample Storage and Preparation.....	264
	C. Limitations in the Selectivity of Extractants.....	266
	1. Cation-Exchanging Extractants.....	266
	2. Carbonate-Dissolving Extractants.....	270
	3. Acid-Reducing Extractants.....	272
	4. Extractants Releasing Organic- and Sulfide-Bound Metals.....	279
	5. Strong Acid Extractants.....	288
	6. Sequential Extraction Procedures.....	292
IV.	Case Studies.....	296
	A. Mobility and Bioavailability of Trace Metals in Sediments.....	296
	1. Identification of the Main Binding Sites of Trace Metals.....	296
	2. Assessment of Sources by Characterization of Typical Inputs.....	299
	3. Estimation of Biological Availability of Metal Pollutants.....	300
	4. Estimation of Waste Disposal Conditions Affecting Metal Mobility.....	301
	5. Evaluation of Sedimentary Diagenetic Effects on Metal Mobility.....	301
	B. Trace Element Associations in Atmospheric Deposits.....	302
V.	Conclusion.....	308
	Acknowledgments.....	309
	References.....	309

## Chapter 9

## TRACE ELEMENT SPECIATION IN BIOLOGICAL SYSTEMS

T. Mark Florence

## TABLE OF CONTENTS

I.	Introduction .....	320
II.	Techniques for Speciation Analysis of Biological Samples .....	321
	A. Theoretical Considerations .....	323
	B. Computer Modeling Techniques .....	325
	C. Nuclear Magnetic Resonance .....	325
	D. Dialysis and Ultrafiltration .....	328
	E. Electrophoresis .....	329
	F. Gel Filtration and Ion Chromatography .....	329
	G. Other Techniques .....	330
III.	Metallothioneins .....	331
IV.	Speciation of Some Elements in Biological Samples .....	332
	A. Copper .....	332
	B. Zinc .....	333
	C. Calcium .....	333
	D. Iron .....	334
	E. Manganese .....	334
	F. Selenium .....	336
	G. Aluminum .....	336
	H. Lead .....	337
	References .....	338
