
CONTENTS

1 BACKGROUND	1.
1.1 Introduction	1.
1.2 Rinsing process.....	2
1.3 Outline of the chapters.....	5
2 GREY BOX MODELLING	7.
2.1 Introduction	7
2.2 Background for grey box modelling.....	8
2.3 Model construction procedure	11
2.3.1 Basic modelling	14
2.3.2 Experiment.....	19
2.3.3 Identification.. ..	22
2.3.4 Model analysis.....	25
2.3.5 Expanded modelling	34
2.3.6 Model appraisal	37
2.4 Software tools.....	38
2.4.1 CYPROS software.....	39
2.4.2 MoCaVal/IdKit software	41
2.5 Summary.....	43
3 APPLICATION OF BASIC MODELLING	45
3.1 Introduction	45
3.2 Basic modelling of the rinsing process	48
3.2.1 Process description	48
3.2.2 Process structure.....	52
3.2.3 Process hypotheses	53
3.2.4 Basic equations.....	60
3.2.5 State space model	64
3.2.6 Model preparation	65
3.2.7 General form.....	71
3.3 Summary.....	71

4 APPLICATION OF AUGMENTED MODELLING.....	73
4.1 Introduction	73
4.2 Experiment.....	74
4.3 Searching for an appropriate model.....	78
4.3.1 Basic model M_1	78
4.3.2 Expanded model M_{121}	81
4.3.3 Expanded model M_{122}	82
4.3.4 Expanded model M_{131}	88
4.3.5 Expanded model M_{132}	89
4.3.6 Expanded model M_{133}	89
4.3.7 Expanded model M_{134}	90
4.3.8 Expanded model M_{141}	92
4.3.9 Expanded model M_{142}	93
4.3.10 Expanded model M_{143}	95
4.3.11 Cross validation	96
4.4 Modelling aspects	100
4.5 Alternative tank models	101
4.6 Summary	104
5 REAL-TIME ESTIMATION	105
5.1 Introduction	105
5.2 Data acquisition	106
5.3 Off-line identification	112
5.4 On-line estimation.....	114
5.5 Summary	122
6 PROCESS CONTROL	123
6.1 Introduction	123
6.2 Combined feedforward and feedback controller.....	125
6.3 Application of the combined controller.....	132
6.3.1 Adaptation to the rinsing process.....	132
6.3.2 Simulation of the control system.....	135
6.3.3 Control of the process.....	142
6.4 Non-linear optimal controller	148
6.5 Application of the optimal controller	153
6.5.1 Adaptation to the rinsing process	153
6.5.2 Simulation of the control system.....	156

6.5.3	Control of the process	161
6.6	Summary	167
7	PROCESS SUPERVISION	169
7.1	Introduction	169
7.2	Terminology	171
7.3	Supervision methods	175
7.3.1	On-line system	175
7.3.2	Process models	176
7.3.3	On-line estimation	179
7.3.4	Preventive maintenance	182
7.4	Application of supervision	183
7.4.1	System design	183
7.4.2	Decision basis for replacing worn parts	184
7.4.3	Useful life of the squeezer rolls	192
7.4.4	Economic aspects of changing the squeezer rolls	198
7.4.5	Evaluation of process components	200
7.5	Summary	202
8	FAULT DETECTION, DIAGNOSIS & IDENTIFICATION	203
8.1	Introduction	203
8.2	Fault-related methods	205
8.2.1	Fault detection	205
8.2.2	Fault diagnosis	208
8.2.3	Fault identification	210
8.3	Application of fault-related methods	211
8.4	Summary	218
