

Contents

Foreword	v
Simulation Studies of Supercooled and Glass Forming Liquids R. D. Mountain	11
Dynamic Light Scattering Studies of Glasses and Gels: Analogies in Relaxation Behavior C. M. Sorensen, D. L. Sidebottom and S. Z. Ren	16
Frustration-Limited Clusters and the Behavior of Supercooled Liquids D. Kivelson, S. A. Kivelson, X. Zhao, T. M. Fischer and C. M. Knobler	32
Universal Reaction-Limited Colloid Aggregation: The Computer Simulations A. E. González	41
A Generalization of Darcy's Law for a Viscoelastic Fluid M. Lopez de Haro, J. A. del Rio and S. Whitaker	54
Normal Mode Analysis and Ultrafast Spectroscopy in Liquids T. Keyes, P. Moore and G. Seeley	71
Near-Critical Fluids in Space D. Beysens, M. Bonetti, T. Fröhlich, Y. Garrabos, P. Guenoun, B. Le Neindre and F. Perrot	88
Continuous Formulation in the Pair Approximation of the Cluster Variational Method F. de J. Guevara-Rodríguez and F. Aguilera-Granja	106
First-Order Wetting Transitions as Interface Critical Endpoints A. Robledo and J. O. Indekeu	120
Atomic Force Microscopy of Langmuir-Blodgett Films D. K. Schwartz, K. Viswanathan and J. A. Zasadzinski	132

Vibrational Spectra of Fullerenes <i>C. G. Joslin, J. Yang, C. G. Gray, J. D. Poll and S. Goldman</i>	146
Elimination of Fast Variables in Chemical Kinetics <i>M. Frankowicz, M. Moreau and L. Vicente</i>	166
Spatial Averaging Approach to Transport Properties in Porous Silicon <i>J. A. del Río, J. Tagüeña-Martínez and J. E. Lugo</i>	177
Active Walks <i>L. Lam</i>	192
Nonequilibrium Ensemble Method and Irreversible Thermodynamics <i>B. C. Eu</i>	205
Diffusive Quantum Kinetic Theory in Solids <i>S. Godoy and E. Braun</i>	235
Optimality in Human and Genetic Messages <i>J.-L. Torres</i>	250
Is There a Universal Behavior in the Singularity of the Specific Heat at the Phase Transition? <i>E. Braun and A. Aguilar</i>	266
