

CONTENTS

Preface	vii
Investigation of Giant Resonances via Photon Decay <i>R. L. Varner, P. E. Mueller and J. R. Beene</i>	1
Giant Dipole Resonance in Hot Nuclei <i>N. Vinh Mau</i>	16
Monopole Transitions in Hot Nuclei <i>Z. Sujkowski</i>	50
Coherent and Incoherent Processes Probed Through r /Correlations <i>J. Québert</i>	72
Dynamical Properties of Heavy-Ion Collisions from Photon Intensity Interferometry <i>L. V. Razumov and R. M. Weiner</i>	93
Two-Photon Interferometry: The Experiment <i>M. Marqués</i>	98
Direct Photons as a Potential Probe of the A -Resonance in Compressed Nuclear Matter <i>R. S. Simon</i>	101
Hard Photon Production in Neutron-Proton, Proton-Nucleus and Nucleus-Nucleus Reactions <i>J. A. Pinston</i>	112
Building a Tool for Heavy Ion Collision Studies: The Event Generator Geneve <i>J. P. Wieleczko, E. Plagnol and P. Ecomard</i>	145
Impact Parameter Dependence of Hard-Photon Production in Heavy-Ion Collisions <i>G. Martinez</i>	163

Calibration of Forward Wall and First Results J. H. G. van Pol	166
Heavy Ion Optical Potentials Based on the Dirac-Brueckner Approach to Nuclear Matter M. Centelles et al.	173
INTEGRAL-The Next ESA Space Mission A. J. Dean	182
On the Nuclear Equation of State E. Suraud	187
Sigma-and-Rho-Mesons in Dense Matter Z. Aouissat, G. Chanfray and P. Schuck	234
Meson Photo- and Electroproduction L. Tiator	258
Photoproduction of π^0 and η -Mesons on Complex Nuclei M. E. Röbzig-Landau	300
Photoproduction of T-Mesons: Recent Results and Planned Experiments B. Krusche	310
Industrial Applications at GANIL H. Delagrangé	329
Particle Production in Heavy-Ion Collisions at Intermediate and Ultra-Relativistic Energies V. D. Toneev	350
Particle Production at SIS Energies Gy. Wolf	418
Polar and Azimuthal Distributions of Subthreshold π^0 's: A Probe of Reaction Dynamics and Pion Final-State Interactions A. Schubert and R. Holzmann	468
Identification and Spectroscopy of π^+ with BaF ₂ -Scintillators R. Auerbeck	478

TAPS Response Measurements at MAMI <i>A. R. Gabler</i>	487
Baryon Emission Relative to the Reaction Plane in Bi + Pb Collisions at 1 GeV/u <i>M. Pacht</i>	497
Plans for Nucleon-Nucleon Bremsstrahlung Measurements with AGOR <i>N. Kalantar-Nayestanaki</i>	511
RICH Detectors and the Dilepton Spectrometer HADES <i>R. Novotny</i>	521
Fluctuations in the Multiparticle Dynamics <i>P. Bozek and M. Ploszajczak</i>	559
Cosmic Rays in TAPS <i>T. Matulewicz et al.</i>	590
List of Participants	607
