

# Contents

Preface	vii
<b>I. Early Universe and Cosmic Chemical Evolution</b>	
Abundance Measurements in Very Metal-Deficient Stars: Insights into Cosmology and Galactic Evolution <i>SJ G. Ryan</i>	3
First Generation Stars and the Early History of Nucleosynthesis in the Galaxy <i>T. C. Beers</i>	12
Accuracy of Abundances Obtained from Stellar Spectroscopic Analyses <i>K. Sadakane</i>	29
The Cosmological <b>Baryon</b> Density from Deuterium in QSO Spectra <i>D. Tytler and S. Burles</i>	37
Deuterium and Ionic Abundances at High <b>Redshift</b> <i>E. J. Wampler, G. M. Williger, J. A. Baldwin, R. F. Carswell, R. G. McMahon and C. Hazard</i>	64
Primordial vs. Galactic Origin of Elements <i>TJ Kajino</i>	78
Metals and Dust in High <b>Redshift</b> Galaxies <i>M. Pettini, D. L. King, L. J. Smith, K. Lipman and R. W. Hunstead</i>	86
<b>II. Searches for Baryonic Dark Matter</b>	
The Search for <b>Machos</b> in the Galactic Dark Matter <i>C. Alcock</i>	101
Astrometry for Determining the Macho Mass <i>M. Miyamoto and Y. Yoshii</i>	114

Substellar Astronomy as a New Tool for Cosmology <i>T. Tsuji</i>	124
 <b>III. Cosmological Parameters and Dark Matter</b>	
A New Method for Determining the Hubble Constant <i>M. Chiba and Y. Yoshii</i>	137
Completely Sampled Rotation Curves and the Distribution of Dynamical Mass in Galaxies <i>Y. Sofue</i>	148
Outer Rotation Curve and Mass of the Galaxy <i>M. Honma and Y. Sofue</i>	155
Neutrinos and Spin Coupled Dark Matters Studied by ELEGANT V and ELEGANT VI <i>H. Ejiri</i>	160
 <b>IV. Neutrinos in Physics and Astrophysics</b>	
Observation of Neutrinos in SuperKamiokande <i>Y. Fukuda</i>	173
Neutrino Energy Loss in Stellar Interiors <i>N. Ztoh, H. Hayashi, A. Nishikawa and Y. Kohyama</i>	183
Coulomb Excitation Measurement for ${}^7\text{Be}(p,\gamma){}^8\text{B}$ and the Missing-Solar-Neutrino Problem <i>T. Motobayashi, N. Zwasa, T. Kikuchi, Y. Ando, M. Kurokawa, S. Moriya, H. Murakami, T. Nishio, J. Ruan (Gen), S. Shimoura, S. Shirato, T. Uchibori, Y. Yanagisawa, N. Znabe, M. Zshihara, T. Kubo, Y. Watanabe, M. Hirai, T. Nakamura, H. Sakurai, T. Teranishi, S. Kubono, M. Gai, R. H. France III, K. I. Hahn, Z. Zhao, Y. Futami, K. Furutaka, Th. Delbar, C. Michotte and P. Lipnik</i>	193
Roles of Light Nuclei for Nucleosynthesis and Solar Neutrino Problems Studied by Neutron Capture Reactions <i>Y. Nagai, T. Shima, T. Kikuchi, T. Kii, T. Kobayashi, T. Baba, T. S. Suzuki, M. Zgashira and T. Ohsaki</i>	203

## V. Stellar Models, Nucleosynthesis and Chemical Compositions

- Nucleosynthesis of Heavy Elements and Nucleo-cosmochronology —  
Recent Topics 213  
*K. Takahashi and H.-Th. Janka*
- Helium Burning: A Further Measurement of the Beta-Delayed  
Alpha-Particle Emission of  $^{16}\text{N}$  228  
*M. Gai*
- Explosive Hydrogen Burning in the Cosmos 238  
*S. Kubono*
- rp-Process Nucleosynthesis in Novae 250  
*S. Wanajoh, M. Hashimoto and K. Nomoto*
- A Plan of Measurements of (n, p) and (n,  $\alpha$ ) Reactions|  
Relevant to Astrophysics 254  
*T. Shima, T. Kii, T. Baba, T. Kikuchi and Y. Nagai*
- Exotic Properties of Light Nuclei and Their Neutron Capture  
Reaction Rates 264  
*A. Mengoni, T. Otsuka and M. Ishihara*
- Mass Loss from the Carbon Star U Ant 269  
*H. Izumiura, L. B. F. M. Waters, T. de Jong, D. J. M. Kester;  
C. Loup and Tj. R. Bontekoe*
- Evolution of the Molecular Abundance in Gaseous Disks Around  
Young Stars: Depletion of CO Molecules 275  
*Y. Aikawa, S. M. Miyama, T. Nakano and T. Umebayashi*
- ## VI. Galaxies, Clusters, QSOs and AGNs
- A Steady Model for X-Ray Emitting Gases of Elliptical Galaxies:  
The Role of Thermal Conduction and Type Ia Supernovae 283  
*T. Shigeyama, R. Saitoh and Y. Fujita*
- ASCA Observations of Clusters of Galaxies 296  
*T. Ohashi*

High Energy Processes in Galaxies and AGNs <i>F. Takahara</i>	304
Binary Black-Hole Engines in Active Galactic Nuclei <i>Y. Taniguchi and O. Kaburaki</i>	314
<b>VII. Quark-Hadron Physics and Astrophysics</b>	
Relativistic Heavy-Ion Collisions, Probing Quark-Gluon Plasma in the Early Universe <i>Y. Miake and M. Sumbera</i>	327
Enhancement of Baryonic Fluctuations near Chiral Phase Transition of QCD at Finite Density <i>O. Miyamura, K. Kumagai, S. Muroya and Z.-D. Liu</i>	338
Simulations of the Finite Temperature QCD Phase Transition on the Lattice <i>K. Kanaya</i>	343
Recent Progress in Nonperturbative QCD Theory and Insight on Cosmological Phase Transition <i>H. Suganuma, H. Zchie, H. Toki and H. Monden</i>	354
Relativistic Many-Body Theory for Unstable Nuclei and Neutron Stars <i>H. Toki, K. Sumiyoshi, D. Hirata, H. Sugahara and I. Tanihata</i>	367
<b>VIII. Galactic Chemical Evolution</b>	
A New Approach to Determine the IMF in the Solar Neighborhood <i>T. Tsujimoto, Y. Yoshii and K. Nomoto</i>	377
Nonlinear Multipopulation Models and the Chemical Evolution of Galaxies <i>V. I. Korchagin, Y. D. Mayya and E. I. Vorobyov</i>	387
Epoch of Galaxy Formation <i>N. Arimoto</i>	397

Where Is SNIa? — Origin of Iron in the ICM <i>Y. Ishimaru</i>	407
Formation Epoch of Globular Cluster Systems Around Elliptical Galaxies <i>T. Kodama and N. Arimoto</i>	412
<b>IX. SUBARU Project</b>	
HDS for SUBARU and Its Science <i>H. Ando</i>	421
Time Variation Studies, SUBARU Telescope, and an Outlook for Observational Instruments Coming into the Game <i>M. Iye</i>	430
List of Participants	439
Author Index	451
