

CONTENTS

Foreword	vii
Experimental Techniques in High Energy Physics	1
<i>G. Herrera, C. Hojvat and M. Sheaff</i>	
Effective Lagrangians (for electroweak physics)	61
<i>J. Wudka</i>	
Solitons in Quantum Field Theories: From Particles to Topological Defects	107
<i>M. Torres</i>	
The Loop Representation in Gauge Theories and Quantum Gravity	162
<i>R. Gambini</i>	
Canonical Gravity	217
<i>R. Capovilla</i>	
Analysis of Heavy Baryon Decays at Fermilab-E791	258
<i>A. Fernández, A. Sánchez-Hernandez and S. Kwan</i>	
Rapidity Gaps in High Energy Physics	266
<i>M. B. Gay Ducati</i>	
Detection of Charged Higgs Bosons at Hadron Colliders	272
<i>J. L. Diaz-Cruz, O. A. Sampayo, J. E. Barradas, A. Gutierrez and A. Rosado</i>	
Radiative Decays and Effective Lagrangians	282
<i>J. G. Contreras, R. Martinez, M. A. Perez and J. J. Toscano</i>	
Weak Mixing of Hadrons	291
<i>A. García, G. Sánchez-Colón and R. Huerta</i>	
The NC-CC Interference in a Left-Right Symmetric Model	298
<i>V. Ceron, M. Maya and O. G. Miranda</i>	

Fermion Damping and Reaction Rates in a Thermal Background <i>J. C. D'Olivo and J. F. Nieves</i>	304
Thermal Corrections to the Effective Potential of Massless Neutrinos <i>E. Tututi, J. C. D'Olivo and M. Torres</i>	316
Neutrino Propagation in Superdense Matter at Finite Temperature <i>A. P. Martínez and H. P. Rojas</i>	324
String Models and QCD <i>A. Antillón and G. Germán</i>	333
Renormalisation Function in Finite Temperature QED₃ <i>M. Klein-Kreisler</i>	341
Towards the Identification of the Reduced Phase Space in the Loop-Space Formulation of Gauge Theories <i>L. F. Urrutia</i>	352
A Generalization of the Relativistic Particle <i>J. D. Vergara, J. L. Lucia-Martinez and J. A. Nieto</i>	361
The Arrow of Time in Quantum Mechanics <i>P. Kielanowski</i>	368
Exact Solutions of the Wheeler-De Witt Equation in R² Theory <i>L. O. Pimentel</i>	375
List of Participants	379
