

# DETAILED CONTENTS

## PART I FOUNDATIONS

### Chapter 1

#### Introduction to Neuroscience

---

##### INTRODUCTION / 3

##### THE ORIGINS OF NEUROSCIENCE / 3

- Views of the Brain in Ancient Greece / 4
- Views of the Brain During the Roman Empire / 4
- Views of the Brain From the Renaissance to the Nineteenth Century / 5
- Nineteenth-Century Views of the Brain / 7
  - Nerves as Wires / 7
  - Localization of Specific Functions to Different Parts of the Brain / 10
  - The Evolution of Nervous Systems / 11
  - The Neuron: The Basic Functional Unit of the Brain / 12

##### NEUROSCIENCE TODAY / 13

##### Levels of Analysis / 13

- Molecular Neuroscience / 13
- Cellular Neuroscience / 13
- Systems Neuroscience / 13
- Behavioral Neuroscience / 13
- Cognitive Neuroscience / 14

##### Neuroscientists / 14

##### The Scientific Process / 15

- Observation / 15
- Replication / 15
- Interpretation / 15
- Verification / 16

##### The Use of Animals in Neuroscience Research / 16

- The Animals / 16
- Animal Welfare / 17
- Animal Rights / 17

##### The Cost of Ignorance: Nervous System Disorders / 18

##### CONCLUDING REMARKS / 20

##### REVIEW QUESTIONS / 21

### Chapter 2

#### Neurons and Glia

---

##### INTRODUCTION / 23

##### THE NEURON DOCTRINE / 23

- The Golgi Stain / 24
- Cajal's Contribution / 25

- *Box 2.1 Of Special Interest: Advances in Microscopy* / 27

##### THE PROTOTYPICAL NEURON / 26

- The Soma / 26
- The Nucleus / 26

##### Rough Endoplasmic Reticulum / 29

##### Smooth Endoplasmic Reticulum and the Golgi Apparatus / 31

##### The Mitochondrion / 31

##### The Neuronal Membrane / 32

##### The Cytoskeleton / 32

##### Microtubules / 33

##### ■ *Box 2.2 Of Special Interest: Alzheimer's Disease and the Neuronal Cytoskeleton* / 34

##### Microfilaments / 33

##### Neurofilaments / 36

##### The Axon / 36

##### The Axon Terminal / 37

##### The Synapse / 38

##### Axoplasmic Transport / 38

##### ■ *Box 2.3 Of Special Interest: Hitching a Ride on "Retrorail"* / 41

##### Dendrites / 39

##### ■ *Box 2.4 Of Special Interest: Mental Retardation and Dendritic Spines* / 42

##### ■ *Box 2.5 Path of Discovery: The Story of Dendritic Protein Synthesis, by Oswald Steward* / 44

##### CLASSIFYING NEURONS / 40

##### Classification Based on the Number of Neurites / 40

##### Classification Based on Dendrites / 40

##### Classification Based on Connections / 40

##### Classification Based on Axon Length / 41

##### Classification Based on Neurotransmitter / 42

##### GLIA / 42

##### Astrocytes / 43

##### Myelinating Glia / 44

##### Other Non-Neuronal Cells / 47

##### CONCLUDING REMARKS / 47

##### KEY TERMS / 48

##### REVIEW QUESTIONS / 49

### Chapter 3

#### The **Neuronal** Membrane at Rest

---

##### INTRODUCTION / 51

##### THE CAST OF CHEMICALS / 52

##### Cytosol and Extracellular Fluid / 52

##### Water / 52

##### Ions / 52

##### The Phospholipid Membrane / 53

##### The Phospholipid Bilayer / 54

##### Protein / 54

##### Protein Structure / 54

##### Channel Proteins / 57

##### Ion Pumps / 57

THE MOVEMENT OF IONS / 58

Diffusion / 58

- Box 3.1 *Brain Food: A Review of Moles and Molarity* / 59

Electricity / 58

THE IONIC BASIS OF THE RESTING MEMBRANE

POTENTIAL / 60

Equilibrium Potentials / 60

The Nernst Equation / 62

- Box 3.2 *Brain Food: The Nernst Equation* / 64

The Distribution of Ions Across the Membrane / 63

Relative Ion Permeabilities of the Membrane at Rest / 63

- Box 3.3 *Brain Food: The Goldman Equation* / 66

The Wide World of Potassium Channels / 65

- Box 3.4 *Path of Discovery: Shaker Flies and Their Defective Potassium Channels*, by Lily and Yuh Nung Jan / 67

The Importance of Regulating the External Potassium Concentration / 69

- Box 3.5 *Of Special Interest: Death by Lethal Injection* / 71

CONCLUDING REMARKS / 71

KEY TERMS / 72

REVIEW QUESTIONS / 72

Chapter 4

The Action Potential

---

INTRODUCTION / 74

PROPERTIES OF THE ACTION POTENTIAL / 74

The Ups and Downs of an Action Potential / 74

- Box 4.1 *Brain food: Methods of Recording Action Potentials* / 75

The Generation of an Action Potential / 74

The Generation of Multiple Action Potentials / 76

THE ACTION POTENTIAL IN THEORY / 78

Membrane Currents and Conductances / 78

The Ins and Outs of an Action Potential / 80

THE ACTION POTENTIAL IN REALITY / 80

The Voltage-Gated Sodium Channel / 82

Sodium Channel Structure / 82

Functional Properties of the Sodium Channel / 84

- Box 4.2 *Brain Food: The Patch-Clamp Method* / 85

- Box 4.3 *Path of Discovery: The Challenge of Resolving Voltage-Gated Channels*, by Erwin Neher / 86

The Effects of Toxins on the Sodium Channel / 87

Voltage-Gated Potassium Channels / 88

Putting the Pieces Together / 89

ACTION POTENTIAL CONDUCTION / 89

Factors Influencing Conduction Velocity / 91

- Box 4.4 *Of Special Interest: Local Anesthesia* / 93

Myelin and Saltatory Conduction / 92

- Box 4.5 *Of Special Interest: Multiple Sclerosis, a Demyelinating Disease* / 94

ACTION POTENTIALS, AXONS, AND DENDRITES / 94

- Box 4.6 *Of Special Interest: The Eclectic Electric Behavior of Neurons* / 96

CONCLUDING REMARKS / 97

KEY TERMS / 97

REVIEW QUESTIONS / 97

Chapter 5

Synaptic Transmission

---

INTRODUCTION / 99

- Box 5.1 *Of Special Interest: Otto Loewi and Vagusstoff* / 100

TYPES OF SYNAPSES / 100

Electrical Synapses / 100

Chemical Synapses / 101

CNS Synapses / 102

The Neuromuscular Junction / 103

PRINCIPLES OF CHEMICAL SYNAPTIC TRANSMISSION / 105

Neurotransmitters / 105

Neurotransmitter Synthesis and Storage / 107

Neurotransmitter Release / 109

- Box 5.2 *Path of Discovery: The Functional Anatomy of Neurotransmitter Release*, by Thomas Südhof / 110

- Box 5.3 *Brain Food: How to SNARE a Vesicle* / 111

Neurotransmitter Receptors and Effectors / 112

Transmitter-Gated Ion Channels / 112

- Box 5.4 *Brain Food: Reversal Potentials* / 114

G-Protein-Coupled Receptors / 113

Autoreceptors / 116

Neurotransmitter Recovery and Degradation / 116

Neuropharmacology / 117

- Box 5.5 *Of Special Interest: Bacteria, Spiders, Snakes, and You* / 118

PRINCIPLES OF SYNAPTIC INTEGRATION / 119

The Integration of EPSPs / 119

Quantal Analysis of EPSPs / 119

EPSP Summation / 120

The Contribution of Dendritic Properties to Synaptic Integration / 120

Dendritic Cable Properties / 120

Excitable Dendrites / 122

Inhibition / 123

- Box 5.6 *Of Special Interest: Startling Mutations* / 124

IPSPs and Shunting Inhibition / 123

The Geometry of Excitatory and Inhibitory Synapses / 125

Modulation / 126

CONCLUDING REMARKS / 127

KEY TERMS / 128

REVIEW QUESTIONS / 129

## Chapter 6

## Neurotransmitter Systems

## INTRODUCTION // 131

## STUDYING NEUROTRANSMITTER SYSTEMS // 132

Localization of Transmitters and Transmitter-  
Receptors

Synthesizing Enzymes // 132

Immunocytochemistry // 132

*In Situ* Hybridization // 133

Studying Transmitter Release // 135

Studying Synaptic Mimicry // 136

Studying Receptors // 136

Neuropharmacological Analysis // 136

Ligand-Binding Methods // 137

■ Box 6.1 Path of Discovery: A Brief History of  
the Nicotinic Receptor, by Jean-Pierre  
Changeux // 139

Molecular Analysis // 140

## NEUROTRANSMITTER CHEMISTRY // 140

Cholinergic Neurons // 141

■ Box 6.2 Brain Food: Pumping Ions and  
Transmitters // 142

Catecholaminergic Neurons // 143

Serotonergic Neurons // 145

Amino Acidergic Neurons // 145

Other Neurotransmitter Candidates and Intercellular

Messengers // 146

■ Box 6.3 Of Special Interest: Are Cannabinoids  
Neurotransmitters? // 148

## TRANSMITTER-GATED CHANNELS // 147

The Basic Structure of Transmitter-Gated  
Channels // 147

Amino Acid-Gated Channels // 150

Glutamate-Gated Channels // 150

■ Box 6.4 Of Special Interest: The Brain's  
Exciting Poisons // 152

GABA-Gated and Glycine-Gated Channels // 151

## G-PROTEIN-COUPLED RECEPTORS AND EFFECTORS // 153

The Basic Structure of G-Protein-Coupled  
Receptors // 153

The Ubiquitous G-Proteins // 154

G-Protein-Coupled Effector Systems // 156

The Shortcut Pathway // 156

Second Messenger Cascades // 156

Phosphorylation and Dephosphorylation // 158

The Function of Signal Cascades // 159

DIVERGENCE AND CONVERGENCE IN NEUROTRANSMITTER  
SYSTEMS // 160

## CONCLUDING REMARKS // 161

KEY TERMS // 161

REVIEW QUESTIONS // 162

## Chapter 7

## The Structure of the Nervous System

## INTRODUCTION // 164

GROSS ORGANIZATION OF THE MAMMALIAN NERVOUS  
SYSTEM // 164

Anatomical References // 164

The Central Nervous System // 167

The Cerebrum // 167

The Cerebellum // 167

The Brain Stem // 167

The Spinal Cord // 168

The Peripheral Nervous System // 169

The Somatic PNS // 169

The Visceral PNS // 169

Afferent and Efferent Axons // 169

The Cranial Nerves // 170

The Meninges // 170

The Ventricular System // 170

■ Box 7.1 Of Special Interest: Water on the  
Brain // 172

Imaging the Living Brain // 173

Computed Tomography // 173

Magnetic Resonance imaging // 173

■ Box 7.2 Brain Food: Magnetic Resonance  
Imaging // 174

Functional Brain Imaging // 173

■ Box 7.3 Brain Food: Functional Imaging of  
Brain Activity: PET and fMRI // 176UNDERSTANDING CNS STRUCTURE THROUGH  
DEVELOPMENT // 175

Formation of the Neural Tube // 175

■ Box 7.4 Of Special Interest: Nutrition and the  
Neural Tube // 180

Three Primary Brain Vesicles // 178

Differentiation of the Forebrain // 179

Differentiation of the Telencephalon and  
Diencephalon // 179

Forebrain Structure-Function Relationships // 184

Differentiation of the Midbrain // 185

Midbrain Structure-Function Relationships // 185

Differentiation of the Hindbrain // 186

Hindbrain Structure-Function Relationships // 186

Differentiation of the Spinal Cord // 188

Spinal Cord Structure-Function  
Relationships // 188

Putting the Pieces Together // 189

Special Features of the Human CNS // 191

## A GUIDE TO THE CEREBRAL CORTEX // 193

Types of Cerebral Cortex // 194

Areas of Neocortex // 195

Neocortical Evolution and Structure-Function  
Relationships // 196■ Box 7.5 Path of Discovery: Evolution of the  
Evolution of the Neocortex,  
by Jon Kaas // 197

## CONCLUDING REMARKS // 199

KEY TERMS // 200

REVIEW QUESTIONS // 201

APPENDIX: ILLUSTRATED GUIDE TO HUMAN  
NEUROANATOMY // 202

**PART II SENSORY AND MOTOR SYSTEMS**

## Chapter 8

The Chemical Senses

---

## INTRODUCTION / 255

## TASTE / 255

The Basic Tastes / 256

The Organs of Taste / 256

Taste Receptor Cells / 258

Mechanisms of Taste Transduction / 258

Saltiness / 258

Sourness / 261

Sweetness / 261

Bitterness / **261**Amino Acids / **261**

Central Taste Pathways / 263

■ *Box 8.1 Of Special Interest: Memories of a Very Bad Meal* / 265

The Neural Coding of Taste / 263

SMELL / **267**■ *Box 8.2 Of Special Interest: Human Pheromones?* / 266

The Organs of Smell / 268

■ *Box 8.3 Path of Discovery: Tales of Two Species: Hormones, Pheromones, and Behavior, by Martha McClintock* / 268

Olfactory Receptor Neurons / 269

Olfactory Transduction / 270

Central Olfactory Pathways / 273

Spatial and Temporal Representations of Olfactory Information / 276

Olfactory Population Coding / 277

Olfactory Maps / 277

Temporal Coding in the Olfactory System / **278**

## CONCLUDING REMARKS / 278

## KEY TERMS / 279

## REVIEW QUESTIONS / 279

## Chapter 9

The Eye

---

## INTRODUCTION / 281

## PROPERTIES OF LIGHT / 282

Light / 282

Optics / 282

## THE STRUCTURE OF THE EYE / 283

Gross Anatomy of the Eye / 283

Ophthalmoscopic Appearance of the Eye / 284

■ *Box 9.1 Of Special Interest: Demonstrating the Blind Regions of Your Eye* / 285

Cross-Sectional Anatomy of the Eye / 285

■ *Box 9.2 Of Special Interest: Eye Disorders* / 287

## IMAGE FORMATION BY THE EYE / 286

Refraction by the Cornea / 286

Accommodation by the Lens / 288

■ *Box 9.3 Of Special Interest: Vision Correction With Lenses and Surgery* / 290

The Pupillary Light Reflex / 289

The Visual Field / 289

Visual Acuity / 289

## MICROSCOPIC ANATOMY OF THE RETINA / 290

The Laminar Organization of the Retina / 292

Photoreceptor Structure / 292

Regional Differences in Retinal Structure / 293

## PHOTOTRANSDUCTION / 294

Phototransduction in Rods / 294

Phototransduction in Cones / 297

■ *Box 9.4 Path of Discovery: Genes and Vision, by Jeremy Nathans* / **300**

Color Detection / 299

■ *Box 9.5 Of Special Interest: Genetic Mistakes and the Colors We See* / 302

Dark and Light Adaptation / 300

## RETINAL PROCESSING / 300

Transformations in the Outer Plexiform Layer / **302**

Bipolar Cell Receptive Fields / 303

## RETINAL OUTPUT / 304

Ganglion Cell Receptive Fields / 304

Types of Ganglion Cells / 307

Color-Opponent Ganglion Cells / 307

Parallel Processing / **310**CONCLUDING REMARKS / **310**KEY TERMS / **311**REVIEW QUESTIONS / **312**

## Chapter 10

The Central Visual System

---

INTRODUCTION / **314**

## THE RETINOFUGAL PROJECTION / 314

The Optic Nerve, Optic Chiasm, and Optic Tract / **315**Right and Left Visual Hemifields / **315**Targets of the Optic Tract / **317**■ *Box 10.1 Of Special Interest: David and Goliath* / 319Nonthalamic Targets of the Optic Tract / **318**

Retinotopy / 319

## THE LATERAL GENICULATE NUCLEUS / 321

The Segregation of Input by Eye and Ganglion Cell Type / 321

Receptive Fields / 323

Nonretinal Inputs to the LGN / 323

## ANATOMY OF THE STRIATE CORTEX / 324

Lamination of the Striate Cortex / 325

The Cells of Different Layers / 325

Input-Output Organization of Different Layers / 326

LGN Input to Layer IVC / 326

Innervation of Other Cortical Layers / 327

Blobs / 328

Parallel Pathways / 329

## PHYSIOLOGY OF THE STRIATE CORTEX / 330

The M Channel / 330

The P-IB Channel / 332

Orientation Columns / 333	■ Box 10.2 <i>Brain Food!</i> Optical Imaging of Neural Activity / 334
Physiology of the Blobs / 336	Putting the Pieces Together / 336
BEYOND STRIATE CORTEX / 337	The Dorsal Stream / 339
Area MT / 339	■ Box 10.3 <i>Path of Discovery: Seeking the Brain's Representation of Coherent Motion</i> , by Anthony Movshon / 340
Dorsal Areas and Motion Processing / 339	The Ventral Stream / 342
Area V4 / 342	Area IT / 342
FROM SINGLE NEURONS TO PERCEPTION / 342	■ Box 10.4 <i>Of Special Interest: Depth Perception, Random Dots, and the Shopping Mall</i> / 344
From Photoreceptors to Grandmother Cells / 343	Parallel Processing / 343
CONCLUDING REMARKS / 347	KEY TERMS / 347
REVIEW QUESTIONS / 348	

## Chapter 11

## The Auditory and Vestibular Systems

INTRODUCTION / 351	THE NATURE OF SOUND / 351
■ Box 11.1 <i>Of Special Interest: Infrasound</i> / 353	THE STRUCTURE OF THE AUDITORY SYSTEM / 353
THE MIDDLE EAR / 355	Components of the Middle Ear / 355
Sound Force Amplification by the Ossicles / 356	The Attenuation Reflex / 356
THE INNER EAR / 357	Anatomy of the Cochlea / 357
Physiology of the Cochlea / 359	The Response of the Basilar Membrane to Sound / 359
The Organ of Corti and Associated Structures / 359	Transduction by Hair Cells / 362
The Innervation of Hair Cells / 365	Amplification by Outer Hair Cells / 366
■ Box 11.2 <i>Of Special Interest: Noisy Ears: Otoacoustic Emissions</i> / 367	CENTRAL AUDITORY PROCESSES / 368
The Anatomy of Auditory Pathways / 368	Response Properties of Neurons in the Auditory Pathway / 370
ENCODING SOUND INTENSITY AND FREQUENCY / 371	Stimulus Intensity / 371
Stimulus Frequency, Tonotopy, and Phase Locking / 372	Tonotopy / 372
Phase Locking / 372	

MECHANISMS OF SOUND LOCALIZATION / 374	Localization of Sound in the Horizontal Plane / 374
The Sensitivity of Binaural Neurons to Sound Location / 375	■ Box 11.3 <i>Brain food: Auditory Neurons, Fast and Sure</i> / 378
Localization of Sound in the Vertical Plane / 378	■ Box 11.4 <i>Path of Discovery: A Search for the Impossible</i> , by Masakazu Konishi / 380
AUDITORY CORTEX / 380	Neuronal Response Properties / 381
■ Box 11.5 <i>Of Special Interest: How Does Auditory Cortex Work? Consult a Specialist</i> / 382	The Effects of Auditory Cortical Lesions and Ablation / 383
■ Box 11.6 <i>Of Special Interest: Auditory Disorders</i> / 384	

## THE VESTIBULAR SYSTEM / 385

The Vestibular Labyrinth / 385	The Otolith Organs / 386
The Semicircular Canals / 388	Central Vestibular Pathways and Vestibular Reflexes / 389
The Vestibulo-ocular Reflex (VOR) / 391	Vestibular Pathology / 393
CONCLUDING REMARKS / 393	KEY TERMS / 394
REVIEW QUESTIONS / 395	

## Chapter 12

## The Somatic Sensory System

INTRODUCTION / 397	TOUCH / 397
Mechanoreceptors of the Skin / 398	Vibration and the Pacinian Corpuscle / 400
Two-Point Discrimination / 401	Primary Afferent Axons / 402
The Spinal Cord / 403	Segmental Organization of the Spinal Cord / 403
■ Box 12.1 <i>Of Special Interest: Herpes, Shingles, and Dermatomes</i> / 408	Sensory Organization of the Spinal Cord / 407
The Dorsal Column-Medial Lemniscal Pathway / 407	■ Box 12.2 <i>Brain Food: Lateral Inhibition</i> / 411
The Trigeminal Touch Pathway / 410	Somatosensory Cortex / 410
Primary Somatosensory Cortex / 410	Cortical Somatotopy / 413
Cortical Map Plasticity / 416	■ Box 12.3 <i>Path of discovery: The Power of Mutable Maps</i> , by Michael Merzenich / 418
The Posterior Parietal Cortex / 420	PAIN / 421
■ Box 12.4 <i>Of Special Interest: The Misery of Life Without Pain</i> / 422	

Nociceptors and the Transduction of Painful Stimuli / 422  
 Types of Nociceptors / 423  
 Hyperalgesia / 423

Primary Afferents and Spinal Mechanisms / 424  
 Ascending Pain Pathways / 426

The Spinothalamic Pain Pathway / 426  
 The Trigeminal Pain Pathway / 427  
 The Thalamus and Cortex / 427

The Regulation of Pain / 428

Afferent Regulation / 430  
 Descending Regulation / 430  
 The Endogenous Opioids / 431

■ Box 12.5 Of *Special Interest*: Pain and the Placebo Effect / 432

TEMPERATURE / 432

Thermoreceptors / 432  
 The Temperature Pathway / 434

CONCLUDING REMARKS / 434

KEY TERMS / 435

REVIEW QUESTIONS / 435

## Chapter 13

### Spinal Control of Movement

---

INTRODUCTION / 437

THE SOMATIC MOTOR SYSTEM / 437

THE LOWER MOTOR NEURON / 439

The Segmental Organization of Lower Motor Neurons / 439

Alpha Motor Neurons / 440

Graded Control of Muscle Contraction by Alpha Motor Neurons / 440

Inputs to Alpha Motor Neurons / 442

Types of Motor Units / 442

Neuromuscular Matchmaking / 443

■ Box 13.1 Of *Special Interest*: Amyotrophic Lateral Sclerosis / 445

EXCITATION-CONTRACTION COUPLING / 444

■ Box 13.2 Of *Special Interest*: Myasthenia Gravis / 446

Muscle Fiber Structure / 445

The Molecular Basis of Muscle Contraction / 446

■ Box 13.3 Of *Special Interest*: Duchenne Muscular Dystrophy / 452

SPINAL CONTROL OF MOTOR UNITS / 449

Proprioception From Muscle Spindles / 449

The Myotatic Reflex / 450

Gamma Motor Neurons / 453

Proprioception From Golgi Tendon Organs / 454

Proprioception From the Joints / 457

Spinal Interneurons / 457

Inhibitory Input / 457

Excitatory Input / 458

The Generation of Spinal Motor Programs for Walking / 459

■ Box 13.4 *Path of Discovery*: Locomotion: From Molecules to Networks and Behavior, by Sten Grillner / 461

CONCLUDING REMARKS / 463

KEY TERMS / 463

REVIEW QUESTIONS / 464

## Chapter 14

### Brain Control of Movement

---

INTRODUCTION / 466

DESCENDING SPINAL TRACTS / 467

The Lateral Pathways / 468

The Effects of Lateral Pathway Lesions / 469

The Ventromedial Pathways / 470

The Vestibulospinal Tracts / 470

The Tectospinal Tract / 471

The Pontine and Medullary Reticulospinal Tracts / 471

THE PLANNING OF MOVEMENT BY THE CEREBRAL CORTEX / 473

Motor Cortex / 473

The Contributions of Posterior Parietal and Prefrontal Cortex / 474

Neuronal Correlates of Motor Planning / 475

■ Box 14.1 Of *Special Interest*: Behavioral Neurophysiology / 476

THE BASAL GANGLIA / 477

Anatomy of the Basal Ganglia / 478

The Motor Loop / 479

Basal Ganglia Disorders / 479

■ Box 14.2 Of *Special Interest*: Do Neurons in Diseased Basal Ganglia Commit Suicide? / 480

THE INITIATION OF MOVEMENT BY PRIMARY MOTOR CORTEX / 482

The Input-Output Organization of M1 / 483

The Coding of Movement in M1 / 483

■ Box 14.3 *Path of Discovery*: Distributed Coding in the Superior Colliculus, by James T. McIlwain / 486

The Malleable Motor Map / 484

THE CEREBELLUM / 487

■ Box 14.4 Of *Special Interest*: Involuntary Movements, Normal and Abnormal / 488

Anatomy of the Cerebellum / 489

The Motor Loop Through the Lateral Cerebellum / 490  
 Programming the Cerebellum / 492

CONCLUDING REMARKS / 492

KEY TERMS / 493

REVIEW QUESTIONS / 493

## PART III THE BRAIN AND BEHAVIOR

### Chapter 15

#### Chemical Control of the Brain and Behavior

---

INTRODUCTION / 497

THE SECRETORY HYPOTHALAMUS /499	The Effects of Decreased Leptin Levels on the Hypothalamus /530
An Overview of the Hypothalamus /499	The Control of Feeding by Lateral Hypothalamic Peptides / <b>531</b>
Homeostasis / 500	THE SHORT-TERM REGULATION OF FEEDING BEHAVIOR /534
Structure and Connections of the Hypothalamus / 500	Edting, Diqestion, and Satiety /535
Pathways to the Pituitary / 500	Gastric Distension /536
Hypothalamic Control of the Posterior Pituitary / 501	Cholecystokinin /536
Hypothalamic Control of the Anterior Pituitary /502	Insulin /536
■ Box 15.1 Of <i>Special Interest</i> : Stress and the Brain /506	■ Box 16.2 Of <i>Special Interest</i> : Diabetes Mellitus and Insulin Shock / 538
THE AUTONOMIC NERVOUS SYSTEM /505	WHY DO WE EAT? /539
ANS Circuits /507	The Role of Dopamine in Motivation /539
Sympathetic and Parasympathetic Divisions /507	Box 16.3 Of <i>Special Interest</i> : Dopamine and Addiction / <b>541</b>
The Enteric Division / <b>510</b>	Serotonin, Food, and Mood /540
Central Control of the ANS /510	OTHER MOTIVATED BEHAVIORS /540
Neurotransmitters and the Pharmacology of Autonomic Function / 511	Drinking /542
Preganglionic Neurotransmitters / <b>511</b>	Temperature Regulation /543
Postganglionic Neurotransmitters / <b>512</b>	CONCLUDING REMARKS /545
THE DIFFUSE MODULATORY SYSTEMS OF THE BRAIN / 512	KEY TERMS /546
Anatomy and Functions of the Diffuse Modulatory Systems /513	REVIEW QUESTIONS /546
The Noradrenergic Locus Coeruleus / <b>513</b>	Chapter 17
Box 15.2 <i>Path of Discovery</i> : Illuminating the Catecholamines of the Brain, by Kjell Fuxe / <b>514</b>	Sex and the Brain
The Serotonergic Raphe Nuclei /515	<hr/>
The Dopaminergic Substantia Nigra and Ventral Tegmental Area / <b>516</b>	INTRODUCTION /548
The Cholinergic Basal Forebrain and Brain Stem Complexes /517	SEX AND GENDER /548
Drugs and the Diffuse Modulatory Systems /517	The Genetics of Sex / 549
Hallucinogens /518	Sexual Reproduction /550
Stimulants /519	Sexual Development and Differentiation / <b>551</b>
CONCLUDING REMARKS /520	THE HORMONAL CONTROL OF SEX /552
KEY TERMS /521	The Principal Male and Female Hormones /553
REVIEW QUESTIONS /521	The Control of Steroid Sex Hormones by the Pituitary and Hypothalamus /554
Chapter 16	Hormonal Cycles and Feedback to the Brain /554
Motivation	THE NEURAL BASIS OF SEX-RELATED BEHAVIORS /556
<hr/>	Reproductive Organs and Their Control /557
INTRODUCTION /523	Mammalian Mating Strategies /559
THE HYPOTHALAMUS, HOMEOSTASIS, AND MOTIVATED BEHAVIOR /523	The Neurochemistry of Reproductive Behavior /560
THE LONG-TERM REGULATION OF FEEDING BEHAVIOR /524	WHY AND HOW MALE AND FEMALE BRAINS DIFFER /562
Energy Balance / 524	Sexual Dimorphisms of the Central Nervous System /563
Hormonal and Hypothalamic Regulation of Body Fat and Feeding /526	Sexual Dimorphisms of Cognition /566
Body Fat and Food Consumption /526	Sex Hormones, the Brain, and Behavior /567
Box 16.1 <i>Path of Discovery</i> : Fat Chance, by Jeffrey Friedman /528	■ Box 17.1 Of <i>Special Interest</i> : Bird Songs and Bird Brains /570
The Hypothalamus and Feeding /527	■ Box 17.2 Of <i>Special Interest</i> : John/Joan and the Basis of Gender Identity / 572
The Effects of Elevated Leptin Levels on the Hypothalamus /527	The Activational Effects of Estrogens on Dendritic Spines /571
	SEXUAL ORIENTATION /574
	Hypothalamic Nuclei in Heterosexuals and Homosexuals 575
	Box 17.3 <i>Path of Discovery</i> : Queer Science, by Simon LeVay /576

A Genetic Basis for Sexual Orientation? / 575  
 CONCLUDING REMARKS / 577  
 KEY TERMS / 578  
 REVIEW QUESTIONS / 579

## Chapter 18

### Brain Mechanisms of Emotion

INTRODUCTION / 581

WHAT IS EMOTION? / 581

Theories of Emotion / 581

The James-Lange Theory / 581

The Cannon-Bard Theory / 582

From Theory to Experimental Studies / 584

THE LIMBIC SYSTEM CONCEPT / 584

Broca's Limbic Lobe / 584

The Papez Circuit / 585

■ **Box 18.1 Of Special Interest: The Amazing Case of Phineas Gage / 586**

Difficulties With the Single Emotion System

Concept / 588

FEAR AND ANXIETY / 588

The Klüver-Bucy Syndrome / 588

The Amygdala / 589

Anatomy of the Amygdala / 590

The Effects of Amygdala Destruction and Stimulation / 591

A Neural Circuit for Learned Fear / 591

■ **Box 18.2 Path of Discovery: Startling Memories, by Michael Davis / 593**

ANGER AND AGGRESSION / 592

The Hypothalamus and Aggression / 594

Sham Rage / 595

Electrical Stimulation of the Hypothalamus / 595

The Midbrain and Aggression / 597

The Amygdala and Aggression / 597

Surgery to Reduce Human Aggression / 598

■ **Box 18.3 Of Special Interest: The Frontal Lobotomy / 599**

Serotonin and Aggression / 598

Serotonin Receptor Knockout Mice / 600

REINFORCEMENT AND REWARD / 600

Electrical Self-Stimulation and Reinforcement / 601

Brain Stimulation in Humans / 602

Dopamine and Reinforcement / 603

CONCLUDING REMARKS / 604

KEY TERMS / 605

REVIEW QUESTIONS / 605

## Chapter 19

### Rhythms of the Brain

INTRODUCTION / 607

THE ELECTROENCEPHALOGRAM / 607

Recording Brain Waves / 607

EEG Rhythms / 608

Mechanisms and Meanings of Brain Rhythms / 609

The Generation of Synchronous Rhythms / 611

Functions of Brain Rhythms / 611

The Seizures of Epilepsy / 613

SLEEP / 614

The Functional States of the Brain / 614

The Sleep Cycle / 616

■ **Box 19.1 Of Special Interest: Walking, Talking, and Screaming in Your Sleep / 617**

Why Do We Sleep? / 618

■ **Box 19.2 Of Special Interest: The Longest All-Nighter / 619**

Functions of Dreaming and REM Sleep / 619

Neural Mechanisms of Sleep / 621

Wakefulness and the Ascending Reticular Activating System / 621

Falling Asleep and the Non-REM State / 622

Mechanisms of REM Sleep / 622

■ **Box 19.3 Of Special Interest: Narcolepsy / 625**  
 Sleep-Promoting Factors / 624

Gene Expression During Sleeping and Waking / 626

CIRCADIAN RHYTHMS / 626

Biological Clocks / 627

The Suprachiasmatic Nucleus: A Brain Clock / 629

■ **Box 19.4 Of Special Interest: Mutant Hamster Clocks / 632**

SCN Mechanisms / 631

■ **Box 19.5 Path of Discovery: Clock Genes, by Joseph Takahashi / 634**

CONCLUDING REMARKS / 633

KEY TERMS / 636

REVIEW QUESTIONS / 636

## Chapter 20

### Language and Attention

INTRODUCTION / 638

LANGUAGE AND THE BRAIN / 639

■ **Box 20.1 Of Special Interest: Is Language Unique to Humans? / 638**

The Discovery of Specialized Language Areas in the Brain / 640

Broca's Area and Wernicke's Area / 640

■ **Box 20.2 Of Special Interest: The Wada Procedure / 641**

Types of Aphasia and Their Causes / 642

■ **Box 20.3 Path of Discovery: Foreign Accents and Native Tongues, by Sheila E. Blumstein / 644**

Broca's Aphasia / 642

Wernicke's Aphasia / 645

Aphasia and the Wernicke-Geschwind Model / 647

Conduction Aphasia / 648

Aphasia in Bilinguals and the Deaf / 649

Lessons Learned From Split-Brain Studies / 650

Language Processing in Split-Brain Humans / 651

Anatomical Asymmetry and Language / 655

Language Studies Using Brain Stimulation and PET Imaging / 656

The Effects of Brain Stimulation on Language / 656  
 PET Imaging of Language Processing / 657  
 ■ **Box 20.4 Of Special Interest: Hearing Sight and Seeing Touch / 660**

#### ATTENTION / 659

■ **Box 20.5 Of Special Interest: Attention-Deficit/Hyperactivity Disorder / 662**

Behavioral Consequences of Attention / 661  
 Attention Enhances Detection / 661  
 Attention Speeds Reaction Times / 664  
 Neglect Syndrome as an Attentional Disorder / 664  
 Physiological Effects of Attention / 666  
 Functional MRI Imaging of Attention to Location / 666  
 PET Imaging of Attention to Features / 666  
 Enhanced Neuronal Responses in Parietal Cortex / 669  
 Receptive Field Changes in Area V4 / 670  
 How Is Attention Directed? / 672

CONCLUDING REMARKS / 673

KEY TERMS / 674

REVIEW QUESTIONS / 674

#### Chapter 21

#### Mental Illness

INTRODUCTION / 676

MENTAL ILLNESS AND THE BRAIN / 676

Psychosocial Approaches to Mental Illness / 676  
 Biological Approaches to Mental Illness / 678

Panic Disorder / 679  
 / 680

■ **Box 21.1 Of Special Interest: Agoraphobia With Panic Attacks / 681**

Hippocampus / 682  
 / 684

A Description of Mood Disorders / 686

Depression / 686

Bipolar Disorder / 687

■ **Box 21.2 Of Special Interest: A Magical Orange Grove in a Nightmare / 688**

Biological Bases of Mood Disorders / 687

The Monoamine Hypothesis / 687

The Diathesis-Stress Hypothesis / 689

■ **Box 21.3 Path of Discovery: Stress and Mood, by Charles Nemeroff / 691**

Treatments for Mood Disorders / 692

Electroconvulsive Therapy / 692

Psychotherapy / 692

Antidepressants / 693

Lithium / 693

SCHIZOPHRENIA / 694

A Description of Schizophrenia / 695

Biological Bases of Schizophrenia / 695

Genes and the Environment / 695

The Dopamine Hypothesis / 696

The Glutamate Hypothesis / 698

Treatments for Schizophrenia / 700

CONCLUDING REMARKS / 700

KEY TERMS / 701

REVIEW QUESTIONS / 701

## PART IV THE CHANGING BRAIN

### Chapter 22

#### Wiring the Brain

INTRODUCTION / 705

THE GENESIS OF NEURONS / 706

Cell Proliferation / 706

■ **Box 22.1 Of Special Interest: Neurogenesis in the Adult Neocortex / 708**

Cell Migration / 709

Cell Differentiation / 710

Differentiation of Cortical Areas / 710

THE GENESIS OF CONNECTIONS / 712

The Growing Axon / 713

Axon Guidance / 715

Guidance Cues / 715

Establishing Topographic Maps / 715

■ **Box 22.2 Of Special Interest: Why Don't Axons Regenerate in Our CNS? / 718**

Synapse Formation / 717

THE ELIMINATION OF CELLS AND SYNAPSES / 719

Cell Death / 720

Changes in Synaptic Capacity / 721

ACTIVITY-DEPENDENT SYNAPTIC REARRANGEMENT / 722

Synaptic Segregation / 723

Segregation of Retinal Axons in the LGN / 723

Segregation of LGN Inputs in the Striate Cortex / 725

Cortex / 725

■ **Box 22.3 Path of Discovery: Exploring Visual Cortical Plasticity, by Torsten Wiesel / 726**

■ **Box 22.4 Brain Food: The Critical Period Concept / 728**

Synaptic Convergence / 726

Synaptic Competition / 729

Modulatory Influences / 730

ELEMENTARY MECHANISMS OF CORTICAL SYNAPTIC PLASTICITY / 731

Excitatory Synaptic Transmission in the Immature Visual System / 732

Long-Term Synaptic Potentiation / 734

Long-Term Synaptic Depression / 734

WHY DO CRITICAL PERIODS END? / 736

CONCLUDING REMARKS / 737

KEY TERMS / 738

REVIEW QUESTIONS / 738

## Chapter 23

Memory Systems

INTRODUCTION / 740

TYPES OF MEMORY AND AMNESIA / 740

Declarative and Nondeclarative Memory / 740

- Box 23.1 Of *Special Interest*: An Extraordinary Memory / 742

Long-Term and Short-Term Memory / 741

Amnesia / 743

- Box 23.2 Of *Special Interest*: Forgettable Fish / 745

THE SEARCH FOR THE ENGRAM / 745

Lashley's Studies of Maze Learning in Rats / 745

Hebb and the Cell Assembly / 747

- Box 23.3 *Brain Food*: A Model of a Distributed Memory / 749

Localization of Declarative Memories in the Neocortex / 748

Studies in Monkeys / 750

Studies in Humans / 751

Electrical Stimulation of the Human Temporal Lobes / 751

THE TEMPORAL LOBES AND DECLARATIVE MEMORY / 752

The Effects of Temporal Lobectomy / 752

A Human Case Study: H. M. / 753

- Box 23.4 *Path of Discovery*: Discovering Memory in the Medial Temporal Lobe With H. M., by Brenda Milner / 755

The Medial Temporal Lobes and Memory Processing / 754

An Animal Model of Human Amnesia / 756

The Diencephalon and Memory Processing / 758

A Human Case Study: N. A. / 759

Korsakoff's Syndrome / 760

Memory Functions of the Hippocampus / 760

The Effects of Hippocampal Lesions in Rats / 760

Place Cells / 762

Spatial Memory, Working Memory, and Relational Memory / 763

THE STRIATUM AND PROCEDURAL MEMORY / 766

Rodent Recordings and Lesions in the Striatum / 766

Habit Learning in Humans and Nonhuman

Primates / 767

THE NEOCORTEX AND WORKING MEMORY / 768

The Prefrontal Cortex and Working Memory / 769

Lateral Intraparietal Cortex (Area LIP) and Working Memory / 771

CONCLUDING REMARKS / 773

KEY TERMS / 773

REVIEW QUESTIONS / 774

## Chapter 24

Molecular Mechanisms of Learning and Memory

INTRODUCTION / 776

PROCEDURAL LEARNING / 776

Nonassociative Learning / 777

Habituation / 777

Sensitization / 777

Associative Learning / 777

Classical Conditioning / 777

Instrumental Conditioning / 778

SIMPLE SYSTEMS: INVERTEBRATE MODELS OF LEARNING / 779

Nonassociative Learning in *Aplysia* / 779

Habituation of the Gill Withdrawal Reflex / 779

Sensitization of the Gill Withdrawal Reflex / 781

Associative Learning in *Aplysia* / 783

VERTEBRATE MODELS OF LEARNING / 786

Synaptic Plasticity in the Cerebellar Cortex / 786

Anatomy of the Cerebellar Cortex / 786

Long-Term Depression in the Cerebellar Cortex / 788

Mechanisms of Cerebellar LTD / 788

Synaptic Plasticity in the Hippocampus and Neocortex / 791

Anatomy of the Hippocampus / 791

Properties of LTP in CA1 / 792

Mechanisms of LTP in CA1 / 793

- Box 24.1 *Brain Food*: Synaptic Plasticity: Timing Is Everything / 795

Long-Term Depression in CA1 / 796

LTP, LTD, and Memory / 797

- Box 24.2 Of *Special Interest*: Memory Mutants / 800

- Box 24.3 *Path of Discovery*: Of Mice and Memories, by Susumu Tonegawa / 802

THE MOLECULAR BASIS OF LONG-TERM MEMORY / 801

Persistently Active Protein Kinases / 801

CaMKII and LTP / 803

Protein Synthesis / 803

Protein Synthesis and Memory

Consolidation / 803

Cyclic AMP Response Element Binding Protein and Memory / 804

Structural Plasticity and Memory / 805

CONCLUDING REMARKS / 806

KEY TERMS / 806

REVIEW QUESTIONS / 807
