

CONTENTS

Preface	v
Monday morning session: Gribov Horizons in QCD	
Organizer and Session Chairman: B. Zwanziger	
The Unreliability of the Perturbative Method in Non-Abelian Models <i>E. Seiler</i>	3
Importance of Full Gauge-Fixing for IR Dynamics (paper presented, not submitted) <i>P. van Baal</i>	
Horizon Condition Holds Pointwise on Finite Lattice with Free Boundary Conditions <i>M. Schaden and D. Zwanziger</i>	10
Can an Infrared-Vanishing Gluon Propagator Confine Quarks? <i>C. D. Roberts</i>	18
Monday afternoon session: IR Models and QCD	
Organizer and Session Chairman: <i>J. Polonyi</i>	
Matrix Models (presented, not submitted) <i>J. Zinn-Justin</i>	
Renormalization of Scale Invariant Field Theories <i>V. Branchina</i>	31
Dependence of Holomorphicity of the Gauge Coupling Constant on the Mass Matrix in Susy Theories <i>K. T. Mahanthappa</i>	41
Infrared Technology in Perturbative QCD Calculations <i>D. A. Kosower</i>	51
Subtleties and Fancies in Gauge Theory Non-Trivial Vacuum <i>A. R. Levi</i>	56

QED Bound State Methods D. A. Owen	244
New Developments in the Theory of Muonium Hyperfine Splitting M. I. Eides	262
Status of the Theory of the Hydrogen Lamb Shift H. Crotch	281
Wednesday afternoon session: Eikonal Scattering Phenomenology	
Organizer and Session Chairman: J. Soffer	
Behavior of Total and Elastic Cross Sections at Very High Energies T. T. Wu	291
Do We Understand Total Cross-Sections? A. Martin	303
High Energy Hadronic Collision as Diffusion Process and Heterotic Pomeron C.-I. Tan	313
Screening Corrections in High Energy Hadron and Photoproduction Reactions U. Maor	321
Sudakov Corrections in Hard Exclusive Processes T. Gousset and B. Pire	331
Thursday morning session: Semiclassical QCD	
Organizer and Session Chairman: H. Reinhardt	
Yang Millsian Field Theory and Riemannian Geometry K. Johnson	341
Effective Lagrangian for Constituent Quarks M. Baker	351
Dual QCD and the Determination of Quarkonium Masses J. S. Ball	363

Instanton-Liquid Model of the QCD Vacuum (presented, not submitted)
E. Shuryak

Thursday afternoon session: Effective Lagrangians and QCD

Line		375
	A. Abada	
Non		383
	D. Kalafatis	
Gen		393
	M. Knecht	
	Gauged Linear σ -Model and Nucleon Structure	401
	M. M. Islam	
	Microscopic Description of Chiral Solitons?	411
	H. Reinhardt	
	Abelian Action for Quark Confinement	421
	K. Yee	
	Thursday evening session: Chairman: H. M. Fried	
	Finite Temperature Effective Potential for Spontaneously Broken $\lambda\Phi^4$ Theory	428
	H. Nachbagauer	
	Tetraquark as Quasimolecule (presented, not submitted)	
	P. Leval	
	The Infrared Sector of QCD from Lattice Simulations	433
	H. Markum	
	Exact $m_{\text{quark}} \neq 0$ Condensates in QCD_{d+1} ($N_c \rightarrow \infty$)	438
	M. Burkardt	
	The Free Energy of Hot QED at Three and a Half Loops	443
	R. R. Parwani	

New Truths About Old Friends <i>H. M. Fried</i>	446
Friday morning session: Chairman: <i>K. Kang</i>	
A Quantum Gravitational Mechanism for Exiting Inflation <i>R. P. Woodard</i>	450
Strange Particles and Quark-Gluon Plasma <i>J. Rafelski</i>	460
On the Self-Coherence of the Hadron High-Energy total Cross-Section Data <i>B. Nicolescu</i>	475
The Odderon Intercept in Perturbative QCD P. Gauron	484
Friday afternoon session: Chairman: <i>J. E. Shrauner</i>	
Generalized Theory of Gravitation <i>J. Moffat</i>	489
Electroweak Physics at LEP <i>K. Kang</i>	500
Chaos in Nonabelian Gauge Theories <i>B. Miiller</i>	509
Soft Photon Production in Quark-Gluon Plasma <i>E. Petitgirard</i>	519
Many-Body Structure in Hamiltonian QCD <i>D. Schütte</i>	525
Field Theory of Neural Processes (presented, not submitted) <i>L. Cooper</i>	
List of Participants	533
