

## CONTENTS

Preface	
The Intrinsic Shape of Galaxies <i>F Bertola</i>	1
Theoretical Considerations on the Rotation Curves of Galactic Halos <i>A Malagozi &amp; R Ruffini</i>	11
Rotation and Vorticity in Galactic Models <i>F Pacheco, G Puglisi &amp; R Ruffini</i>	25
Galactic Globular Clusters as Star Systems and Satellites of the Galaxy <i>P Giannone</i>	29
Black Hole Models for Quasar-like Objects: Some Selected Topics <i>S. Tsuruta</i>	61
The Infrared Background Radiation: New Observational Approaches. I -The Noise of Microwave Background <i>P de Bernardis &amp; S Masi</i>	95
The Infrared Background Radiation: New Observational Approaches. II -Search for Extragalactic Backgrounds <i>S Masi &amp; P de Bernardis</i>	103
Production of $\mu$ ons in the Big Bang <i>E.W. Kolb</i>	117
Hawking's Theory of Quantum Cosmology <i>L Z Fang &amp; Z C Wu</i>	147
Inflationary Cosmology from a Classical Gauge Field <i>A Aurilia, G Denardo, F Legovini &amp; E Spallucci</i>	181
Ancient Sunspot Observations in China and Solar Variability <i>Z T Xu</i>	201
