CONTENTS

INVITED LECTURE

Run-Time Oriented Design Tools: A Contribution to the Standardization of Development Environments for Parallel and Distributed Programs

A. Bode 1

SESSION 1: SCHEDULING

Scheduling of Virtual Connections in Fast Networks

T. Erlebach, K. Jansen 13

Parallel and Distributed Algorithms of Dynamic Mapping and Scheduling

F. Seredynski 33

SESSION 2: ROUTING

Optimal Oblivious Permutation Routing in Small Hypercubes

Th. Seifert, E. Speckenmeyer 53

The Impact of Routing Decision Time on Network Latency

A. C. Döring, G. Lustig, W. Obelöer 67

A Static Wormhole Routing in Mesh-Connected Multicomputers, Exploiting Communication Characteristics of Applications

H. Song, H. Yoon, S. Eun **85**

SESSION 3: DISTRIBUTED SYSTEMS

Quorum-Based Solutions to the h-out of-k Mutual Exclusion Problem in Distributed Systems

R. Baldoni, ***Y. Manabe, S. Aoyagi, M. Raynal*** ***99***

Duration of Asynchronous Operations in Distributed Systems

M. Makhaniok, R. Männer 109

INVITED LECTURE

Complexity and Correctness of Computer Architectures
S. M. Müller 125

SESSION 4: ARCHITECTURE

Evaluating a Multithreaded Superscalar Microprocessor Versus a Multiprocessor Chip
T. Ungerer, U. Sigmund 147

SESSION 5: SCHEDULING AND LOAD BALANCING

A Concept for a Multithreaded Scheduling Environment
M. Leberecht 161

Precomputation Based Load Balancing
M. Böhm, E. Speckenmeyer 177

SESSION 6: INTERCONNECTION NETWORKS

Optimal Dynamic Edge-Disjoint Embeddings of Complete Binary 'Bees into Hypercubes
V. Heun, E. W. Mayr 195

Efficient Token Clustering on Hypercubes
V. Auletta, A. Negro, V. Scarano 211

Summation and Prefix Summation on LogP-Meshes
W. Zimmermann, W. Löwe ***229***

SESSION 7: DEPENDENCE GRAPHS

A Branching Linear Programming Approach for the Mapping of Systems of n-dimensional Affine Recurrences onto k-dimensional Systolic Arrays
W. Achtziger, K.-H. Zimmermann 247

A/D Graphs-A Data Structure for Data Dependence Analysis in Programs with Pointers
W. Amme, E. Zehendner **259**

INVITED LECTURE

Are MPP Systems Mature for Production Environments ?
W. Oed **279**

SESSION 8: TRAFFIC SYSTEMS

A Distributed Fault Tolerant Computer Architecture for the Traffic Control System IVMS
E. Duschnig, *R. WeiB* 287

Real-Time Traffic Simulation of the German Autobahn Network
M. Rickert, P. Wagner, Ch. Gawron 305

List of Participants 323

List of Authors 329
