

CONTENTS

Preface	ix
The Publications of John R. Klauder	xiii
Dirichlet Operators and Gibbs Measures	
S.I. Albeverio, Yu.G. Kondratiev and M. Röckner	1
A Remark on a Connection of Return to Equilibrium and Multiple Ground States in some Perturbed XY-Model	
H.I. Araki	11
The Characteristic Functional for a Wick Square	
K.I. Baumann	15
Covariance Sub-algebras Connected with Symmetry Groups of C*- algebras	
H. J. Borchers	25
Affine Coherent States and Wavelets	
I. Daubechies	35
Coherent-state path-integrals and their relations to wavelets	
B. De Facio	43
Particle and Wave Descriptions are not Equivalent	
H. Ezawa	55
Brownian motion and its conditional descendants	
P. Garbaczewski	63
On complex Langevin	
H. Gausterer	71
Path integrals and Network quantum numbers	
R. Gihmore and M. Jeffery	77
Symmetry and symmetry breaking in statistical physics	
H. Grosse	91
Reckoning of the Besselian Path Integral	
A. Inomata	99
Thermodynamics of Quarks and Gluons	
H. Leutwyler	107
On Q-Analogs of Coherent States	
M.A. Lohé and L.C. Biedenharn	115
Dynamical Entropy of Quantum Systems and their Abelian Counterpart	
H. Narnhofer and W. Thirring	127
Coherent states and squeezed states, supercoherent states and supersqueezed states	
M.M. Nieto	147

Mass and Mixing Angle Patterns in the Standard Model and its Minimal Supersymmetric Extension P. Ramond, J.	157
Hamiltonians with Contact Interaction H. Reeh,	171
Beyond Coherent States: Higher Order Representations G. Reents and S.J. Summers,	179
Yet Another Proof of Blattner's Theorem P.L. Robinson,	189
How to generate Thermal Photons – On the Computer M.R. Schroeder,	197
A model for phase transitions akin to the Ising model L. Shepp,	203
Localization of massless spinning particles and the Berry phase B.-S. Skagerstam,	209
A Local Quantum Theory Without Positive Energy Representations R.F. Streater,	223
Stabilization of bottomless systems based on stochastic quantization with a field-dependent kerneled Langevin equation S. Tanaka and M.Namiki,	227
Dynamical symmetry of the X-X chain in a magnetic field T.T. Truong,	247
Quantum noise and thermal noise H. Umezawa,	253
