|  |     |   |            |
|--|-----|---|------------|
| Preface  | v   | L.J. Sham   |            |
| Y. Tokura and Y. Tomioka   |     | Theory of spin coherence in semiconductor hetero-structures   | <b>319</b> |
| Colossal magnetoresistive manganites   | 1   |   |            |
| A. Gupta and J.Z. Sun  |     | D.P. Landau   |            |
| Spin-polarized transport and magnetoresistance in magnetic oxides  | 24  | Computer simulation studies of magnetic phase transitions   | 231        |
| V.K. Pecharsky and K.A. Gschneidner Jr.  |     | J.S. Moodera and G. Mathon  |            |
| Magnetocaloric effect and magnetic refrigeration   | 44  | Spin polarized tunneling in ferromagnetic junctions   | 248        |
| G.A. Prinz   |     | J. Bass and W.P. Pratt Jr.  |            |
| Magneto-electronics applications   | 57  | Current-perpendicular (CPP) magnetoresistance in magnetic metallic multilayers                          | 274        |
| A.M. Goldman, V. Vas'ko, P. Kraus, K. Nikolaev and V.A. Larkin   |     | D.T. Pierce, J. Unguris, R.J. Celotta and M.D. Stiles   |            |
| Cuprate/manganite heterostructures   | 69  | Effect of roughness, frustration, and antiferromagnetic order on magnetic coupling of Fe/Cr multilayers | 290        |
| C.L. Chien and D.H. Reich  |     | M.D. Stiles   |            |
| Proximity effects in superconducting/magnetic multilayers  | 83  | Interlayer exchange coupling  | 322        |
| P. Walser, M. Hunziker and M. Landolt  |     | A. Fert and L. Piraux   |            |
| Heat-induced effective exchange coupling in magnetic multilayers with semiconductors                                   | 95  | Magnetic nanowires  | 338        |
| H. Ohno  |     | R.H. Kodama   |            |
| Properties of ferromagnetic III-V semiconductors   | 110 | Magnetic nanoparticles  | 359        |
| D.D. Awschalom and N. Samarth  |     | G.C. Hadjipanayis   |            |
| Spin dynamics and quantum transport in magnetic semiconductor quantum structures                                       | 130 | Nanophase hard magnets  | 373        |
| V.P. Antropov, B.N. Harmon and A.N. Smirnov  |     | E.E. Fullerton, J.S. Jiang and S.D. Bader   |            |
| Aspects of spin dynamics and magnetic interactions   | 148 | Hard/soft magnetic heterostructures: model exchange-spring magnets                                      | 392        |
| B. Barbara, L. Thomas, F. Lioni, I. Chiorescu and A. Sulpice   |     | J.M.D. Coey and P.A.I. Smith  |            |
| Macroscopic quantum tunneling in molecular magnets   | 167 | Magnetic nitrides   | <b>405</b> |
| A. Caneschi, D. Gatteschi, C. Sangregorio, R. Sessoli, L. Sorace, A. Cornia, M.A. Novak, C. Paulsen and W. Wernsdorfer |     | H. Szymczak   |            |
| The molecular approach to nanoscale magnetism  | 182 | From almost zero magnetostriction to giant magnetostrictive effects: recent results                     | 425        |
| D.P. DiVincenzo and D. Loss  |     | D. Sander, A. Enders and J. Kirschner   |            |
| Quantum computers and quantum coherence  | 202 | Stress and magnetic properties of surfaces and ultrathin films  | 439        |
|  |     | F.J. Himpsel, K.N. Altmann, G.J. Mankey, J.E. Ortega and D.Y. Petrovykh                                 |            |
|  |     | Electronic states in magnetic nanostructures  | 456        |

|  |            |  |            |
