

CONTENTS

| | |
|---|-----|
| Preface | vii |
| Basics of Plasma and Fusion Research | |
| Basic Physics of Tokamak Device and It's Steady-State Operation <i>Y. X. Wan</i> | 3 |
| Helical Systems <i>M. Fujiwara</i> | 29 |
| Plasma Heating and Current Drive <i>T. Watari</i> | 83 |
| An Introduction into Plasma-Surface-Interactions and Wall Conditioning in Fusion Devices <i>J. Winter</i> | 125 |
| Spherical Torus Physics, Fusion Applications, and Energy Development <i>M. Peng</i> | 141 |
| Theory of Fusion Plasmas | |
| MHD Theory <i>Z. Yoshida</i> | 157 |
| D T Burning Plasma Physics in Tokamak Reactors <i>B. R. Shi</i> | 179 |
| Studies on Wave Analysis and Electric Field in Plasmas <i>H. Sanuki</i> | 199 |
| Some Aspects on Tearing Mode Instability in Tokamaks <i>G. Y. Yd</i> | 241 |

| | |
|--|-----|
| Physics of Energetic Ion Transport in a Tokamak Reactor C. S. Chang | 275 |
| Plasma Turbulence in a Currentless Toroidal Device R . Singh | 301 |
| Simulation of Nonlinear Phenomena in Plasmas T. Q. Chang | 323 |
| Forefront of Recent Fusion Experiments | |
| Recent Results of JT-60U and Progress in ITER Physics R&D T. Hirayama | 347 |
| TFTR D-T Experiments J. D. Strachan | 369 |
| Experiments of the Basic Process in Plasma Y. Amagishi | 385 |
| Study of Magnetic Reconnection in Controlled Laboratory Plasmas M. Yamada | 405 |
| Probe Technics for Plasma Experiments E. Y Wang | 417 |
| Coherent Thomson Scattering Diagnostic for Plasma Wave and Turbulence Studies W D. Liu and C. X. Yu | 439 |
