SYMPOSIUM IN HONOUR OF PROFESSOR BRUNO BERTOTTI

The Problem of Time in Quantum Gravity and a Radical
Proposal for Solving it
(*J. B. Barbour*) 3

U-Duality, Solvable Lie Algebras and Extremal Black-Holes
(*P. Fré*) 7

Black Hole Thermodynamics, Mach's Principle and Eddington-Schrödinger
Unified Theory
(*M. Martellini and F. Belgiorno*) 45

Gravitational Waves: The Wager
(*B. F. Schutz*) 53

The Present Status of the Decaying Neutrino Theory
(*D. W. Sciama*) 75

12th ITALIAN CONFERENCE ON GENERAL RELATIVITY AND GRAVITATIONAL PHYSICS

INVITED TALKS

Advances in Resonant Gravitational Wave Detectors
(*M. Bassan*) 87

Type I Superstrings without D-branes
(*M. Bianchi*) 99

Recent Developments in 4D-Simplicial Quantum Gravity
(*M. Carfora, D. Gabrielli and G. Gionti*) 111

N-body Solutions of 2+1-Gravity
(*M. Ciafaloni*) 127

Bertotti-Robinson Geometry and Supersymmetry
(S.Ferrara) 135

Astrophysical Sources of Gravitational Waves
(V. Ferrari)..... 149

The VIRGO Interferometer for Gravitational Wave Detection
(F. Fidecaro and VIRGO collaboration) 163

First Order Non-Linear Actions for General Relativity and
2-Dimensional Gravity
(M. Francaviglia)..... 173

Relic Dilatons in String Cosmology
(M. Gasperini)..... 181

Still on the Way to Quantizing Gravity
(R. Loll)..... 193

Dark Matter and the Scale of SUSY Breaking
(S. Borgani and A. Masiero)..... 207

Black Hole Candidates and the Maximum Mass of Rotating
Compact Stars
(J. Miller)..... 219

“GALILEO GALILEI” (GG) a Small Satellite for a High
Accuracy Test of the Equivalence Principle
(A. M. Nobili, D. Bramanti and G. Catastini) 227

Limiting Sensitivity of Interferometric GW Antennas Using
Nonclassical Radiation
(S. Solimeno, M. Fiorenino, A. Porzio and F. Zaccaria)..... 239

CONTRIBUTED TALKS

General Relativity, Classical and Quantum Gravity

Chairman: **F. Fucito**

Singularities in Silent Universes: State of the Art
(M. Bruni, H. Van Elst and C. Ugge) 255

A 2-Spinor Approach to Einstein-Cartan-Maxwell-Dirac Fields (D. Canarutto and A. Jadczyk)	261
A Worldline Approach to Quantum Gravity (A. Carlini and J. Greensite)	267
Quantization of Constrained Systems: Application to Quantum String Cosmology (M. Cavaglià and V. de Alfaro)	273
On the Fourier Transform and the p-adic Momentum and Schrödinger Operators (R. Cianci and A. Khrennikov)	279
Interaction of Metric Gravitational Waves with a Spherical Antenna (C. N. Colacino)	287
On the Drinfeld Twist for $U_{\hbar}sl(2)$ (L. Dabrowski, F. Nesti and P. Siniscalco)	293
Axial Gauge in Quantum Supergravity (G. Esposito and A. Yu. Kamenshchik)	299
Why Metrics? Is the Metric the Most Fundamental Description for Gravity? (L. Fatibene, M. Ferraris and M. Francaviglia)	305
Combinatorial Tools for Regge Calculus (E. Fabri and R. Giannitrapani)	311
Kabat's Surface Terms in the Zeta-function Approach (D. Iellici and V. Moretti)	317
Bundles Over Noncommutative Lattices (G. Landi)	323
Gravitational Entropy and Topology (S. Liberati)	329
Dirac's Observables for Tetrad Gravity (L. Lusanna)	335

The Dynamical Structure of the A.D.M. Equations for
General Relativistic, Isotropic Elastic Media
(D. Iacoviello, J. Kijowski and G. Magli) **341**

Geometrical Construction of Type I Superstring Vacua
(G. Pradisi) 347

The Black Hole Entropy: A Spacetime Foam Approach
(F. Scardigli) **355**

Connections on Bimodules in Noncommutative Geometry
(P. Siniscalco) 363

Stochastic Background of Relic Gravitational Waves
in String Cosmology
(A. Buonanno, M. Maggiore and C. Ungarelli) **369**

Quantum Structures in General Relativistic Theories
(R. Vitolo) **375**

Zeta-Function Regularization in Topologically non Trivial Spaces
(A. A. Bytsenko, G. Cognola and S. Zerbini) 381

Relativistic Astrophysics and Cosmology
Chairman: F. Occhionero

On Relativistic Perturbations of Second and Higher Order
(M. Bruni, S. Matarrese, S. Mollerach and S. Sonego) **389**

Force Evaluation in Particle Methods for Self-Gravitating
Multi-Phase Systems
(R. Capuzzo – Dolcetta, R. Di Lisio and P. Miocchi) 395

Formation of Barred Galaxies: The Role of the Halo and
of Tidal Interaction
(A. Curir and P. Mazzei) 401

Dynamical Behaviour of Bianchi IX Models in a Finsler
Geometrical Approach to Chaos
(M. Di Bari and P. Cipriani) **407**

Reionization of the Universe Induced by Primordial Black Holes
(M. Gibilisco) 413

Properties of Iron Line Emission from Accretion Discs
 Around Spinning Black Holes
(A. Martocchia and G. Matt) 419

Inflation for Bianchi IX Models
(P. Verrocchio)** 425

Experimental and Observational Gravity

Chairman: **E. Cocciol**

Electromagnetic Test to Detect the Earth's General Relativistic
 Gravitomagnetic Fields Using Artificial Satellites
(M. Karim and B. Ahmedov) **433**

Low-Frequency Gravitational Wave Experiments
**(J. Armstrong, B. Bertotti, F. Estabrook, L. Iess
 and H. Wahlquist)** **439**

Search of Monochromatic Gravitational Waves Using
 Resonant Detectors
(P. Astone, S. Frasca, G. V. Pallottino and G. Pizzella)* 445

Planning to Measure G with a Pendulum
(A. De Marchi, M. Ortolano, F. Periale and E. Rubiola) **451**

Detection of Gravitational Waves from Precessing Galactic
 Neutron Stars
**(W. Velloso, F. Barone, E. Calloni, L. Di Fiore,
 F. Garufi, A. Grado and L. Milano)** **457**

A Digitally Controlled Suspended Michelson Interferometer
**(F. Barone, E. Calloni, L. Di Fiore, F. Garufi,
 A. Grado, L. Milano and A. Rocco)** **463**

Pulse Sources of Gravitational Radiation: Detectability by
 Resonant Gravitational Wave Antennas
(C. Palomba, S. Frasca and M. A. Papa) **469**

The New Data Acquisition and On-line Analysis System DAGA2-HF
 for the Gravitational Wave Antennas of the Rome Group
(S. Frasca, G. Mazzitelli and M. A. Papa) **475**

A Possible Strategy for Data Analysis in the VIRGO Experiment
Using the **APEmille** Computer

**(M. Beccaria, G. Cella, A. Ciampa, E. Cuoco,
G. Curci and A. Viceré)** 481

List of Participants. 487
