

CHAPTER ONE

ASTRONOMICAL ISSUES

Synthesized by K. Hurley

I.	Introduction.....	3
II.	Temporal Structure (K. Wood, U. Desai , B. Schaefer, G. Pizzichini, J. Norris, and S. Woosley)	
	A. Introductory Remarks	4
	B. Instrumental Considerations	5
	C. Burst Subclasses	6
	D. Temporal Characterization Schemes.....	6
	E. Periodicities	16
	1) Formal Difficulties in Establishment of Periods.....	17
	2) Implications of the Scarcity of Periods	21
	F. Single Peaked Events	21
	G. Prospects	22
III.	The $\log N(\geq S)$ - $\log S$ Relation (J. Higdon, C. Meegan and T. Cline)	
	A. Introductory Remarks	23
	B. Review of the $\log N(\geq S)$ - $\log S$ Relation.....	24
IV.	Error Boxes and Spatial Distribution (K. Hurley, T. Cline, R. Epstein)	
	A. Introductory Remarks	33
	B. Spatial Distribution	36
	C. Distances	38
V.	Deep Searches for Burster Counterparts (H. Pedersen , G. Pizzichini, B. Schaefer, and K. Hurley)	
	A. Introduction.....	35
	B. Optical Studies.....	39
	C. X-Ray Searches	44
	D. Radio and IR Searches	44
VI.	Optical Flashes (B. Schaefer)	
	A. Introduction	44
	B. Techniques.....	41
	C. The Searches.....	41
	D. Implications	50
	E. Future Observations	51
VII.	Burster Recurrence Timescales (K. Hurley, M. Jennings, G. Pizzichini, B. Schaefer, and S. Woosley)	
	A. Introduction	51
	B. The Two Known Repeaters.....	51
	C. Recurrence Timescales from Optical Observations	51
	D. Recurrence Timescales from Gamma-Ray Observations	51
	E. Recurrence Timescales from Other Data.....	51
VIII.	Future Observations and Missions (K. Hurley, R. Kaipa, T. M. K. Marar, C. Meegan, J. Nishimura, H. Pedersen, G. Pizzichini, G. Ricker , B. Teegarden)	51
