

# CONTENTS

Preface	xv
<b>I. Problems of Quantum Field Theory</b>	
Fluctuation Corrections to Instanton and Soliton Transitions <i>Jürgen Baacke</i>	3
The Concept of Potential in Quantum Field Theory <i>J. Sucher</i>	14
Quantization of the Robertson-Walker Universe <i>Marco Cavaglia, Vittorio de Alfaro, and Alexandre T. Filippov</i>	31
Strong Coupling Regime in QFT <i>G. V. Efimov</i>	47
Phase Structure of the Two-Dimensional Yukawa Type Field Theory <i>G.V. Efimov and S.N. Nedelko</i>	60
Non-Pauli States in Three-Body Systems <i>N.A. Sveshnikov</i>	70
SU(2) Quantum Skyrme Model <i>Egidijus Norvaisas</i>	78
Skyrmions in (2+1) Dimensions <i>R.J. Cova and W. J. Zakrzewski</i>	84
Analysis of One-Particle Excitations in Phenomenological Models in QCD <i>A.N. Valla, S.I. Korenblit, V.M. Leviant and A. V. Sinitskaya</i>	89
Feature of the Quantum Field Theories with Non-compact Group Symmetry <i>A.E. Margolin and V.I. Strazhev</i>	97

New Methods for Semiclassical Approximation in Quantum Mechanics	103
<i>V.G. Bagrov, A. Yu. Trifonov and V. V. Belov</i>	
Multipole Interactions of Dipole and Spin Systems with External Fields	117
<i>V.M. Dubovik and A.M. Kurbatov</i>	
Zitterbewegung in the Quantum Theory with Definite Evenness of Operators and Maximal Acceleration	125
<i>V.A. Bordovitsyn</i>	
Critical Equation of State of Two-Dimensional <b>Ising</b> Model	131
<i>S.B. Rutkevich</i>	
String Model in Minkowski <b>Space-Time</b> Spectral Problem, Singularities and Some Views on the Applications	136
<i>Sergei V. Talalov</i>	
Two-Level System in a One-Mode Quantum Field	147
<i>I.D. Feranchuk and L.X. Hai</i>	
Approximate Solution of the Three-Dimensional <b>Bloch</b> Equation in the Wigner-Weyl Representation	150
<i>Vladimir V. Kudryashov</i>	
Analytic Solutions of the Teukolsky Equation	154
<i>V.S. Otchik</i>	
<b>II. Geometrical and Topological Methods in Quantum Theory</b>	
What Did We Learn from the Aharonov-Bohm Effect? Is Spin $1/2$ Different?	163
<i>Murray Peshkin</i>	
The Dyon <b>Fermion</b> System	173
<i>S.K. Bose</i>	

QED Effects in the Dyon External Field <i>Ya. M. Shnir, E.A. Tolkachev and L.M. Tomilchik</i>	181
Exact Results in Anyon Quantum Mechanics <i>Stefan V. Mashkevich</i>	192
Distance-Dependent Statistics: A Generalization of Anyonic Statistics <i>Stefan V. Mashkevich</i>	198
Winding Number Density Operator and Fractional Quantum Hall Effect <i>Liasofu Luo</i>	203
Geometric Phases for Three-Level Non-Hermitian System <i>S.E. Korenblit, V.E. Kuznetsov and V.A. Naumov</i>	209
Geometric Phase and Dynamical Symmetries of Quantum Systems <i>E.A. Tolkachev and A. Ya. Tregubovich</i>	218
Dynamical Phases in Imperfect Crystals <i>Leonid M. Barkovsky and Viktoriia Shampaeva</i>	224
Comments on Origin of Berry's Phase from Quantum and Semi-classical Point of View <i>M.M. Radulović and V. M. Ristic</i>	229
Non-Euclidean Quantum Mechanics of Exciton in Semiconductor Quantum Dots <i>Yu. A. Kurochkin</i>	234
Quantum Dynamics on $U(1)$ Bundles <i>A.B. Ryzhov and A.G. Savinkov</i>	240
Kaluza-Klein or Fibre Bundles? <i>N. P. Konopleva</i>	248

### **III. Non-perturbative Methods in Quantum Theory**

- Magnetic Interaction at Short Distances and Particle Physics 255  
*A.O. Barut*
- Operator Method for Non-perturbative Description of the  
 Quantum Systems 263  
*I.D. Feranchuk and L.I. Komarov*
- Non-perturbative Solutions of Schwinger Equations 269  
*Vladimir E. Rochev*
- The Positronium Series of the Barut Model Atoms 274  
*G. V. Zhuvikin*

### **IV. Group Theoretical and Algebraic Methods in Field Theory**

- Squeezed States and Relativistic Quantum Mechanics 1994 281  
*Y.S. Kim*
- Deformation of Particle Distribution Functions Due to  
 Q-Nonlinearity and Nonstationary Casimir Effect 293  
*V.I. Manko*
- Standard and Non-standard Covariant Deformed Oscillator Algebras 299  
 C. Quesne
- Ultrarelativistic Limit for the Dirac Oscillator 307  
*L. M. Tomilchik*
- Grassmann Space, Gravity and Electrodynamics 312  
*Norma Mankoc Borstnik*
- Mapping of Discrete Spectral Data in Nonrelativistic  
 Quantum Mechanics 321  
*Axel Pelster, Arne Wunderlin and Karl Zeile*
- Generalised Quaternion Groups, Its Irreducible Representations  
 and Some of Its Properties 333  
*O.S. Kosmachev*

## V. Within the Standard Model and Beyond

Magnetic Monopoles and Some Obscure Astrophysical Observations <i>W. Peter Trower</i>	339
High Energy Neutrinos from the “Bright Phase” <i>V.S. Berezinsky and A.Z. Gazizov</i>	345
Mass Relations in the Standard Model: The Higgs Boson and the Top Quark Masses <i>Conrad Newton, Per Osland and Tai Tsun Wu</i>	351
The $\rho$ -Meson Contribution to Electromagnetic Nucleon Form Factors from the Low-Energy Unitarity <i>M.M. Giannini, E. Santopinto and M.I. Krivoruchenko</i>	361
Local Fluctuations and Intermittency in Hadronization Process <i>Sergey V. Chekanov</i>	367
SO(8) Group as Possible Origin of Generations <i>Z. K. Silagadze</i>	374
Intermittency in Ginzburg-Landau Model for First-Order Quark-Gluon Phase Transition in HEP <i>L.I. Babichev, D. V. Klenitsky and V.I. Kuvshinov</i>	385
Quantum Mechanics, Chaos and the Riemann Zeros ( <i>Closing Talk</i> ) <i>M.V. Berry</i>	387
Abstracts of Reports Not Included in the Volume	<b>394</b>
List of Participants	<b>397</b>
