

# CONTENTS

Preface	v
Light-Cone Quantized QCD and Novel <b>Hadron</b> Phenomenology <b>S. J. Brodsky</b>	1
Two Topics in QCD: The ‘Short Range’ Deuteron and Beyond Deep Inelastic Scattering <b>C. E. Carlson</b>	65
Zero-Mode Problem on the Light Front <b>K. Yamawaki</b>	116
Much Ado About Nothing: Vacuum and Renormalization on the Light-Front <b>M. Burkardt</b>	170
Electroweak Transitions in Baryons <b>N. C. Mukhopadhyay</b>	200
Quark Model, Nonperturbative Wave Functions, the QCD Sum Rules and Instantons <b>A. Zhitnitsky</b>	220
Sign Convention of Residues in QCD Sum Rules <b>S. Choe</b>	250
Relations Among the Light-Cone Quark Models with the Invariant Meson Mass Scheme and Their Model Predictions on the Radiative Meson Decays <b>H.-M. Choi and C.-R. Ji</b>	255
Leptonic and Hadronic Decays of <b>B</b> Meson <b>D. S. Hwang</b>	260
One and Two Loop Anomalous Dimensions for the Chiral-Odd Structure Function $h_1$ S. Kumano and <b>M. Miyama</b>	266
List of Participants	271
