

# CONTENTS

Preface	ix
<b>Introductory Talk</b>	
The Challenge of High Phase Space Density	3
<i>I. Hofmann</i>	
<b>I. SPACE CHARGE EFFECTS</b>	
Lattices with Minimal Space Charge Effects for Crystalline Beams	13
<i>P. J. Chanel and F.R. Neri</i>	
Anomalous Behavior of Schottky Noise for Cooled Beams	33
<i>V.A. Lebedev, J.S. Hangst, J.S. Nielsen and N. Madsen</i>	
Longitudinal Instabilities and Crystallization	51
<i>A. Burov and V.G. Vaccaro</i>	
Transverse Coherent Oscillations of Intense Coasting Beams	61
<i>R. W. Hasse and I. Hofmann</i>	
Beam Instabilities and Their Cures	71
<i>M. Chanel</i>	
<b>II. COOLING TECHNIQUES</b>	
Methods of Beam Cooling	93
<i>A. M. Sessler</i>	
Stochastic Cooling	111
<i>F. Caspers</i>	
Electron Cooling	129
<i>I. N. Meshkov</i>	

Spectroscopy of Trapped Ions <i>H. Walther</i>	149
Three-Dimensional Laser Cooling by Synchrobetatron Coupling <i>H. Okamoto, S. Machida and A. M. Sessler</i>	173
Ions in Electron Plasmas at Strong Coupling: Stopping Power and Electron-Ion Recombinations <i>G. Zwicknagel, Q. Spreiter, M. Miller, C. Toepffer and P. G. Reinhard</i>	185
Electron Cooler Impedances <i>A. V. Burov</i>	205
<b>III. CRYSTALLINE BEAMS</b>	
The Physics of Crystalline Beams <i>J. P. Schiffer</i>	217
Diverse Topics in Crystalline Beams <i>J. Wei, A. Draeseke, A. M. Sessler and X. I? Li</i>	229
Analytical Studies of Crystalline Beams <i>A. F. Haffmans, D. Maletic and A. G. Ruggiero</i>	253
Schottky Spectra and Crystalline Beams <i>D. V. Pestrikov</i>	275
Studies of Crystalline Beams at Legnaro <i>A. Pisent and A. Burov</i>	295
<sup>1</sup> Intrabeam Scattering in Dense and Cold Beams <i>M. Seurer, Q. Spreiter and C. Toepffer</i>	311
Crystalline Beams in the CRYSTAL Storage Ring at Legnaro <i>A. F. Haffmans, D. Maletic and A. G. Ruggiero</i>	329 .

Space Charge Instability in Storage Rings with Circular Closed Orbits <i>D. V. Pestrikov</i>	343
Particle Trapping with an RF Cavity <i>A. Chao</i>	347
<b>IV. EXPERIMENTS</b>	
Working Group on Experiments and Special Session on Electron Cooling <i>D. Reistad</i>	355
The Legnaro CRYSTAL Proposal <i>L. Tecchio et al.</i>	365
A Thermal Wave Model for Electromagnetic Traps <i>R. Fedele, R. Poggiani and G. Torelli</i>	393
The Status of Laser Cooling Experiments in ASTRID <i>J. S. Hangst et al.</i>	403
Review of Electron Cooling Investigation at the Novosibirsk INP <i>V. Parkhomchuk</i>	409
Measurements of the Nonlinear Electron Cooling Force at the IUCF Cooler Ring <i>S. Y. Lee et al.</i>	421
Review of Recent Work on Electron Cooling at LEAR <i>J. Bosser</i>	435
Cooling Experiments at CRYRING <i>H. Danared, G. Andler and A. Källberg</i>	453
Electron Cooling at the ESR <i>M. Steck et al.</i>	459

<b>Conclusive Talk</b>	
<b>Are We Approaching the Ultimate Limit of Particle Accelerators?</b>	473
<i>G. H. Rees</i>	
<i>Theoretical Cooling by Acceleration Coupling</i>	173
<i>Time Dependence of Beam Parameters in the CERN NA3 Experiment</i>	173
<i>Particle Losses With an RF Gun</i>	173
<b>List of Participants</b>	485
<i>Ionization in Strongly Coupled Plasmas at Strong Coupling: Stopping Power and Electron-Ion Recombination</i>	101
<i>G. Zeilinger, Q. Spreiter, M. Maletta, C. Tschigg, P. G. Reinhard and P. G. Reinhard</i>	101
<i>Wolffson Group on Experiments and Simulations of Electron Cooling</i>	123
<i>Electron Cooler Impedances</i>	123
<i>A. V. Burov</i>	
<i>323</i>	323
<i>The Léman CRYSTAL Project</i>	323
<i>A. Lechner et al.</i>	323
<b>II. CRYSTALLINE BEAMS</b>	
<b>126 Physics of Crystalline Beams</b>	
<i>All-particle Wave Model for Electromagnetic Fields</i>	126
<i>J. P. Schiffer</i>	
<i>126</i>	126
<i>The Structure of Fast Cooling Experiments in CERN NA3</i>	126
<i>J. Wu, A. Drascic, A. M. Sessler and K. F. Johnson</i>	
<i>126</i>	126
<i>A. Z. Hirshfield et al.</i>	126
<i>Diverse Topics in Crystalline Beams</i>	126
<i>J. Wu, A. Drascic, A. M. Sessler and K. F. Johnson</i>	
<i>126</i>	126
<i>The Structure of Electron Cooling Investigations With Heavy Ions</i>	126
<i>A. F. Hoffmann, D. Mafet and A. G. Ruggiotti</i>	
<i>126</i>	126
<i>K. Nagayoshi</i>	126
<i>126</i>	126
<i>Mechanisms of the Coulomb Effect During Cooling of Ion Beams</i>	126
<i>D. V. Petrakov</i>	
<i>126</i>	126
<i>Cooler Rule</i>	126
<i>Z. X. Lin et al.</i>	126
<i>Studies of Crystalline Beams at Fermilab</i>	295
<i>Z. A. Piram and A. G. Ruggiotti</i>	295
<i>295</i>	295
<i>Revising the Fermi Wave on Electron Cooling in LEP90</i>	295
<i>A. Gorini</i>	
<i>295</i>	295
<i>Inelastic Scattering in Dense and Cold Beams</i>	311
<i>M. Sessler, Q. Spreiter and C. Tschigg</i>	
<i>311</i>	311
<i>Cooling Functions in CRYSTAL</i>	311
<i>W. Brunner, G. Veltler and A. Röhlisch</i>	
<i>311</i>	311
<i>Crystalline Beams in the CRYSTAL Storage Ring at Legnaro</i>	329
<i>A. F. Hoffmann, D. Mafet and A. G. Ruggiotti</i>	
<i>329</i>	329
<i>Electron Cooling in the Fermilab</i>	329
<i>M. Sessler et al.</i>
