

CONTENTS

| | | |
|--|---|------------|
| Section I | <i>The Standard Model and Beyond</i> | II |
| | (Electroweak, Grand Unification, Supersymmetry) | |
| G.Altarelli | <i>Status Of Precision Tests OfThe Electroweak Theory</i> | 3 |
| J-P.Revoll | <i>Future Neutrino Oscillations And Proton Decay Experiments</i> | 27 |
| A.J.Buras | <i>CP Violation: Present And Future</i> | 41 |
| A.I.Studenikin and G.G.Likhachev | <i>Neutrino Oscillations In Strong Magnetic Field Of Neutron Star</i> | 67 |
| P.Huet | <i>Electroweak Baryogenesis And The Standard Model</i> | 77 |
| F.Pauss | <i>Physics At The LHC</i> | 93 |
| Section II | <i>Future Accelerators</i> | 115 |
| | (Linear Accelerators, New Methods, LHC) | |
| G.Brianti | <i>LHC Status</i> | 117 |
| B.H.Wiik | <i>Linear Colliders</i> | 131 |
| C.Pellegrini | <i>High Energy Particle Accelerators: Present And Future</i> | 147 |
| Section III | <i>Theory Of Full Unification And Quantum Gravity</i> | 161 |
| | (String Theory, Quantum Gravity, Cosmology And Quantum Mechanics) | |
| F.Zwimer | <i>Beyond The MSSM</i> | 163 |
| A.E.Faraggi | <i>Deriving The Standard Model From Superstring Theory</i> | 177 |
| J.Ellis, N.E.Mavromatos and D.V.Nanopoulos | <i>Some Physical Aspects Of Liouville String Dynamics</i> | 187 |
| G.Veneziano | <i>Facts (Present) And Fantasy (Future) In String Cosmology</i> | 225 |

| | |
|--|-----|
| P.Huet | |
| <i>Testing Violation Of CPT And Quantum Mechanics In The $K_0-\bar{K}_0$ System</i> | 239 |
| B.Melchiorri and F.Melchiorri | |
| <i>Observational Tests For Inflation</i> | 253 |
| E. Aubourg | |
| <i>Survey On Gravitational Microlensing Experiments</i> | 257 |
| Y. Srivastava et al. | |
| <i>Past, Future And Elsewhere In Quantum Mechanics</i> | 265 |
| Section IV Macroscopic Quantum States | 277 |
| (Test Of Quantum Mechanics At The Macroscopic Level) | |
| A.Barone and R.Cristiano | |
| <i>Josephson Junction As A Probe Of Classical And Quantum Decay Of Metastable States:</i> | |
| <i>An Introduction</i> | 279 |
| A.J.Leggett | |
| <i>Present And Future Of Macroscopic Quantum Coherence</i> | 293 |
| G.C.Ghirardi | |
| <i>Testing Quantum Behaviour At The Macroscopic Level</i> | 303 |
| R.De Bruyn Ouboter | |
| <i>Macroscopic; Quantum Phenomena Of The First Kind In Superconductivity</i> | 317 |
| T.D.Clark et al. | |
| <i>Resolution of Energy Level Structure In Quantum Mechanical SQUID Rings By</i> | |
| <i>Reactive Probing</i> | 343 |
| Section V Classical And Quantum Gravitational Radiation | 357 |
| (Gravitational Waves, Production And Detection) | |
| A.Brillet | |
| <i>Laser Interferometric Gravitational Wave Detection</i> | 359 |
| G.Pizzella | |
| <i>Progress On Resonant Detectors For Gravitational Waves</i> | 367 |
| P.Chen | |
| <i>Resonant Photon-Graviton Conversion in EM Fields: From Earth To Heaven</i> | 379 |
| M.P.Haugan | |
| <i>Experimental Gravitation Physics And The Binary Star 1913+16</i> | 397 |
| R.Matzner | |
| <i>Computing Gravitational Radiation From The Collision Of Black Holes: Status Report</i> | 405 |
| I. Ciufolini | |
| <i>Testing General Relativity And Gravitational Waves In Space</i> | 419 |

| | |
|---|-----|
| Round Table Perspectives Of Fundamental Physics | 433 |
| G.Salvini <i>The Future Of High Energy</i> | 435 |
| G.C.Ghirardi <i>Perspectives Of Research On The Foundations Of Quantum Mechanics</i> | 439 |
| G.Pizzella <i>Gravitational Waves</i> | 447 |
| G.Diambrini-Palazzi <i>Perspectives On The Experimental Tests Of Quantum Gravity</i> | 453 |
| Summary Talk | 461 |
| J.Ellis <i>Phenomenology Of Unification From Present To Future</i> | 463 |
| Conference Programme | 493 |
| List of Participants | 495 |
