

CONTENTS

1	INTRODUCTION	1
	1.1. Background	1
	1.2. Objective	2
	1.3. Scope	3
	1.4. Structure	5
2.	MODES OF POTENTIAL RELEASE OF CONTAMINANTS FROM MILL TAILINGS AND MINE WASTE	5
	2.1. Water and wind erosion	7
	2.2. Geotechnical instabilities	7
	2.3. Controlled release of contaminated water	8
	2.4. Spills during the transport of tailings or mine waste	8
	2.5. Unauthorized removal of tailings and mine waste	9
	2.6. Construction of buildings on tailings and mine waste	9
	2.7. Radon emission	9
	2.8. Dust emission	9
	2.9. Direct gamma radiation	10
	2.10. Seepage	10
	2.11. Diffusion processes	10
3.	INITIAL ENVIRONMENTAL SURVEYS	11
	3.1. Baseline surveys	11
	3.2. Characterization surveys	12
4.	MONITORING PROGRAMME	14
	4.1. Pathway analysis	15
	4.2. Monitored media	17
	4.2.1. Water monitoring	17
	4.2.2. Atmospheric monitoring	23
	4.2.3. Gamma radiation levels	27
	4.2.4. Food, drinking water and soil monitoring	28

5.	SURVEILLANCE PROGRAMME	28
5.1.	Introduction	28
5.2.	Type and frequency of inspections	29
5.2.1.	Routine inspections	29
5.2.2.	Detailed inspections	30
5.2.3.	Special purpose inspections	30
5.3.	Inspection procedures	31
5.3.1.	Erosion by water	33
5.3.2.	Integrity of embankment dams and associated structures ...	36
5.3.3.	Integrity of waste piles, ponds and covers	41
5.3.4.	Changes in environmental and human receptors	44
5.4.	Institutional control of areas	45
6.	REPORTING	45
7.	QUALITY ASSURANCE	46
8.	SUMMARY	47
ANNEX I	CONTENTS OF A TYPICAL LONG TERM SURVEILLANCE PLAN	51
ANNEX II:	TYPICAL SITE INSPECTION CHECKLIST	53
ANNEX III:	EXAMPLE SITE INSPECTION PHOTOGRAPH LOG	62
REFERENCES	63
BIBLIOGRAPHY	64
CONTRIBUTORS TO DRAFTING AND REVIEW	65
