INDEX

Elasticity and Visco-elasticity

N. Achcar
Materials Possessing Rotational Symmetry 17

W. Altman, A. Marmo de Oliveira
Nonlinear Elasticity Equations of Motion referred to Anholonomic Coordinates . . . . . .

S. X. Gong
A Unified Analysis of the Elliptical Inclusion Problem in Antiplane Elastostatics . . . . . .

Y. M. Haddad, P. Yu
A Dynamic System Method for the Identification of the Linear Viscoelastic Response of Materials . . . . . .

I. Jasiuk, M. Ostoja-Starzewski
New Results in Cosserat Elasticity . . . . . .

P. A. A. Laura, R. Gelos, R.E. Rossi, D.V. Bambill
A Note on some Educational Points when Teaching Undergraduate Applied Mechanics Courses 43

N. B. Romalis, J. Dundurs
Interaction between Loading and Geometric Singularities in the Problem of the Wedge . . . . . -I-

E. Romanelli
Generalización del Concepto de Energía Complementaria 53

B. Sensale, G. J. Creus
Aplicación del Método de Reciprocidad Dual a la Resolución de Problemas Viscoelásticos mediante Elementos de Contorno ***59***

Plasticity, Visco-Plasticity and Damage

R. C. Batra, C. Adulla
Effect of Defect Shape and Size on the Initiation and Growth of Adiabatic Shear Bands 67

Z. Chen, H. L. Schreyer
Implications of Jump Conditions on Bifurcation ***73***

G. Etse
A Fracture Energy-Based Plasticity Theory for Plain Concrete 79

G. Etse, R. Danesi
Localized Failure Assessment in Plain Concrete 85

R. Garcia, M. Cerrolaza
On the Coupling of Damage Theory and the Boundary Element Method Applied to Tunnel Excavation Analysis 91

C. Garcia Garino, J. Rojek, E. Oñate
Sirnulation of Sheet Metal Stamping Processes using a Solid Finite Strain Model 97

R. Hamilton, D. Mackenzie, J. Shi, J. T. Boyle
Limit Load Bounds for a Plane Stress Problem by the Elastic Compensation Method 103

R. M. Haythornthwaite
Yield Surfaces for Granular Media with High Friction 198

A. E. Huespe, N. Zouain
Grandes Deformaciones Elasto-Plásticas con Daño: Aspectos sobre la Solución Numérica del Problema 112

A. I. Leonov
On a Kinetic Formulation and the Stability of Constitutive Equations for Elasto-Viscoplasticity 118

B. Luccioni, S. Oller, R. Danesi
Plastic Damaged Model for Anisotropic Materials 124

F. Marotti de Sciarra, L. Rosati
On a Specialization of the Generalized Standard Material 130

D. N. Singh, P. Basudhar
Lower Bound Bearing Capacity of a Strip Footing over Underground Openings 136

M. A. Zikry, M. Kao
Microstructural Ductile and Brittle Material Failure Modes in Crystalline Materials 142

Fracture and Fracture *Mechanics*

B. Abersek, J. Flasker
New Model for Calculating of Service Life of Gears 151

S. N. Atluri
Computational Methodologies for Evaluating the Structural Integrity of Aging Aircraft 157

A. Chudnovsky, M. Gorelik
Statistical Fracture Mechanics-Basic Concepts and Numerical Realization 161

H. Deng, M. E. Fourney, J. W. Ju
Experimental Investigation of Crack Interaction and Coalescence 167

G. Díaz, V. Martinez, P. Kittl
On the Unicity of Weibull's Distribution Function 173

G. Díaz, V. Martinez, *P. Kittl*
On Contradictory Formulas of Local Probability of Fracture 179

B. Farahmand
A New Analytical Approach to obtain the Plane Stress Fracture Toughness Value by FMDM Theory 185

J. Flasker, S. Pehan, R. Kogler, B. Plemenitas
The Influence of Different Load Distribution on the Crack Propagation in Tooth Root 191

R. A. Heller, S. Thangjitham
Fatigue Life Under Random Loading 197

P. Kittl, V. Martínez, G.* Díaz, J. *Bolcich L. Fernández, R. A.* Stuke, J. Pérez Ipiña, *C. Berejnoi
The Statistics Distribution of the Mechanical Properties in the ASTM 516 Steel 202

P. Kittl, G.* Díaz, V. *Martínez
On the Eigenfunctions of the Integral Equation of the Probabilistic Strength of Materials 208

J. D. Lee, H. Liebowitz, F. C. M. Menandro
Knowledge-Based Fracture of Materials and Structures 214

C. T. Liu
Crack Growth Behavior in a Solid Propellant 220

C. C. Ma, Y. S. Ing
Transient Analysis of Dynamic Crack Propagation with Boundary Effect 227

V. Martinez, G. Díaz, P. Kittl
On the Parallel Systems of Brittle Materials 233

A. Reguly, T. R. Strohaecker, D. K. Matlock, G. Krauss
Tenxidade a Fractura de Camadas de Aços Cementados 239

C. A. Sciammarella
An Elaato-Plastic Analysis of the Crack Tip Field in a Compact Tension Specimen 244

E. Taroco
Crack Growth in Elastic Slab with Variable Thickness 249

L. Xing
Solution for Circular Arc Cracked Plate subject to Arbitrary Model Loading 255

F. G. Yuan, S. Yang
Fully Plastic Crack Singularities and Crack-Tip Fields under Antiplane Shear 258

Contact Problems

A. Cisilino, H. López Montenegro, J. Otegui
An Improved Weight Function for the Finite Width Cracked Strip in Bending 267

P. A. Engel, K. R. Wu
Encounter and Contact of Tall Asperities in Dendrite Electrical Connectors 271

M. J. Jaffar ,
Indentation Problems of Elastic Layers by a Frictionless Rigid Cone 277

H. López Montenegro, A. Cisilino, J. Otegui
A Weight Function Method to Assess Partially Closed Cracks in Residual Stress Fields 283

M. R. Raous, P. Chabrand, F. Dubois
Various Numerical Methods for Solving Frictional Contact Problems 287

Beams and Frames

M. L. Bucalem
On the Locking Behavior of Isoparametric Curved Beam Finite Elements 295

P. R. B. Devloo, F. A. Menezes
Formulacao Geometricamente Não Linear de Pórticos Planos 301

J. Moller, A. El-Zafrany
An N-Node Timoshenko Curved Beam Finite Element 306

W. D. Pilkey, U. Schramm, W. Kang
Consideration of Shear in Beams with Arbitrary Cross Sections 311

P. M. Pinsky, K. Grosh
Galerkin Generalized Least Squares Finite Element Methods for Timoshenko Beams 317

J. A. Ronda, C. A. Prato, L. A. Godoy
Geometric Non-Linear Analysis of Spatial Frames Accounting for Warping Constraints and Rotation-Dependency of Moments 323

Plates, Shells and Membranes

A. Benjeddou, M. A. Hamdi
Viscoelastic Damping of Sandwich Shells of Revolution: An Approximate Analysis 331

M. **N. Bismarck-Nasr, D. A. Holanda Silva**
Vibration of Laminated Doubly Curved Shallow Shells 337

C. N. Chen, C. H. Wang
An Inverse Solution of Structural Problems using Bernoulli and Euler Functions 343

V. C. M. De Souza, J. M. F. Saraiva
Analysis of Free Vibrations of Conical Shells using Donnell's Approximation 349

E. Dvorkin
On Finite Strain Elastc-Plastic Analysis of Shells 353

F. G. Flores
A 2-D Shell Element for Nonlinear Analysis 359

B. LaMattina, E. Klang
Study of the Fundamental Solution for Anisotropic Plate Bending 365

M. **Stanuszek, P. G. Glockner**
Response Characteristics of Spherical Inflatables Subjected to Axisymmetric Liquid Loads 371

C. R. Steele; K. ur-Rehman Shad
Asymptotic-Numeric Solution for Shells of Revolution 377

V. E. Verijenko, S. Adali
A Higher-Order Theory for the Nonlinear Analysis of Laminated Plates and Shells 383

W. E. Warren, J. A. Weese
The Deformation of O-Ring Compressed between Flat Rigid Plates 387

Stability of Structures (Buckling and Post-Buckling)

R.M.L.R.F. Brasil, M.A. Hawwa
Buckling Mode Localization in Trusses 393

B. B. Budkowska, C. Szymczak
Application of Sensitivity Analysis to Stability of Partially Embedded Piles 399

Y. C. Chen
Stability and Bifurcation of Inflated Cylindrical Elastic Membranes 404

J. G. A. Croll
Shell Buckling: A return to Basic Mechanics 410

R. G. Fierro, D. G. Karr
An Energy Approach to Determine the Dynamic Buckling Load for a System with Two Degrees of Freedom 418

L. A. Godoy, E. J. Barbero, I. Raftoyiannis
Post-Buckling Analysis of Composite FRP Structures 424

Ch. Hwu, J. S. Hu
Anisotropic Elasticity to the Buckling of Delaminated Composite Beams 430

G. J. Simitses
Buckling and Collapse of Suddenly-Loaded Structures 435

Electro- Magneto Solid Mechanics

A. Bossavit
Eddy-Currents and Forces in Part of a Tokamak Structure 441

M. A. Castro, H. A. Sosa
An Analysis of Two Electroelastic Boundary-Value Problems 445

I. Colominas, F. Navarrina, *M.* Casteleiro
Numerical Computation of Grounding Grids 449

Q. Jiang
A Lattice-Based Model for the Cubic-Tetragonal Transformation in Ferroelectric Crystals 455

N. *M.* Khutoryansky, H. A. Sosa
Fundamental Solutions for Time-Dependent Piezoelectricity 461

J. S. Lee
Fractogenic Electromagnetic Emission in Fiber Reinforced Composites . . . ,467

Y. *Shindo*, I. Ohnishi, S. Tohyama
The Scattering of Magnetic Flexural Waves of a Conducting Plate with a Crack 471

Y. Y. Yu
On Small Strains and Large Rotations in Nonlinear Elasticity and Piezoelectricity 477

***X. J.* Zheng, J. S. Lee**
Buckling of Superconducting Coils 483

Thin Film Problems

W. Fang, *J.* A. *Wickert*
Measurement of Thin Film Stress using Bi-Material Micromachined Beams 491

L. Fang, M. G. Sharma, S. K. Kurtz
Analysis of Residual Stresses in High Temperature Super Conductor Thin Films Multi-Layer Structures 497

V. Gupta, A. Pronin, *J. Yuan*
Design of Interfaces Through Control of Interfacial Microstructure with Applications to Composites, Tribology and Multilayer Devices . . . 503

Experimental Stress Analysis

H. R. *Dorfi*, H. R. Busby, *M.* Janssen
The GAR. Technique: A New Method for Ultrasonic Stress Measurement 511

W. Feng, G. Zhaoxiong, X. Huimin, Q. Weibo
Photoelastic Experimental Research on the Ship Lock of the Gezhouba Project and Gravity Dams of the Soft Base 517

S. Y. Keshavan
The Determination of the Secondary Principal Stress Differences and their Orientations in a Loaded Photoelastic Model using the Multi-Load Method 523

B. *Mena*, A. Morales, B. *Motta*, F. Serrania, A. von Ziegler
A New Kind of Shear-Elongational Rheometer 529

AUTHOR INDEX 535
