

## INDEX

### Fluid Flow

**V. B. Bertram, W. Schultz**

A Comparison of Transient and Steady BEM Computations for Free-Surface Flows .....17

**V. Cortínez, D. Bambill De Rossit**

Laminar Flow in Conduits of Corrugated Annular Cross Section ..... 21

**M. H. Hamdan, R. M. Barron**

The Numerical von Mises Transformation in the Study of Solitary Wave Distribution .....27

**E. Hytopoulos, J. A. Schetz**

Numerical Solution of the Unsteady Boundary Layer Equations by the Finite Element Method ..... 33

**P. K. Kythe, P. Puri**

Unsteady Free-Convection MHD Flows Past a Flat Plate in a Rotating Medium ..... 37

**J. A. Masad**

Linear Stability Theory for Transition Prediction ..... 42

**P. A. de Oliveira Soviero, M. P. Brandão**

A Vortex Lattice Method for Aerodynamic Analysis of Lifting Surfaces in Supersonic Flight ..... 48

**C. Rodríguez, H. L. Moses, W. F. O'Brien**

Viscous-Inviscid Interaction for Incompressible Flows over Airfoils ..... 54

**A. Srivastava, D. T. Mook**

A Note on the Redundancy in the Discrete-Vortex Method for Closed Bodies ..... 59

**M. Storti, N. Nigro, S. Idelsohn**

Numerical Solution of Compressible and Incompressible Flows with Equal Interpolations and Explicit Integration ..... 65

## **Turbulence**

### **V. Berdichevsky**

Exact Averaged Equations of 2-D Hydrodynamics ..... 73

### **R. D. W. Bowersox, J. A. Schetz**

Measurements of Mean Flow and Favre Averaged Fluctuation  
Properties in a Supersonic High Reynolds Number Turbulent Mixing  
Layer ..... 77

### **A. J. Cura Hochbaum**

Computation of Turbulent Ship Flows with a Finite-Volume Method . . . . . 83

### **M. Goldschmit, M. A. Cavaliere**

Numerical Solution of Turbulent Recirculating Flows with an Iterative  
( $k - l$ ) Predictor / ( $\epsilon$ ) - Corrector Scheme ..... 89

### **M. A. Ortega, J. L. F. Azevedo**

Large Eddy Simulation of an Open Flow along a Backward-Facing Step  
.... 95

### **M. A. Ortega, J. L. F. Azevedo**

A New Explicit Finite Volume Algorithm for Euler Solutions ..... 101

## **Heat Transfer**

### **F. Avila, J. Rojas**

On the Dynamics of Two Fluid Layers of Different Density in a Heated  
Inclined Wall Cavity ..... 109

### **R. Enrique, G. Buscaglia**

Diffusion Problems with Phase-Change: Macroscopic Consequences of  
Hysteresis ..... 114

### **S. D. Felicelli**

An Implicit Enthalpy-Based Solidification Algorithm for the Prediction  
of Macrosegregation ..... 120

### **H. González, B. Cernuschi Frías, N. Barraza, F. Cernuschi**

Low Frequency Motions in Liquids: Study by Computer Simulations . . . . . 125

### **D. N. Riahi**

Thermocapillary Convection in a Liquid Cylinder at Moderate or Large  
Prandtl Number ..... 129

### **M. A. Salehi, M. Di Marzo, K. Almenas**

Primary System Transient Heating in a Severe Accident Scenario ..... 135

## **Thermal Effects in Solids**

**A. Acosta Fabelo**

Temperatura en el Corte de Metales ..... 143

**C. K. Chao, M. H. Shen**

Thermoelastic Problem of Bonded Dissimilar Materials with a Rigid  
Circular-Arc Inclusion .....147

**R. S. Dhaliwal, J. Wang**

One-Dimensional Transient Waves in Generalized Thermoelasticity . . . . . 153

**L. G. Hector Jr., R. B. Hetnarski**

Thermal Stress in an Elastic Layer Due to a Repetitively Pulsed Laser .... 157

**R. B. Hetnarski, J. Ignaczak**

Soliton-Like Waves in a Low-Temperature Nonlinear Rigid Heat  
Conductor .....163

**G. H. Kaufmann, F. V. Diaz**

Thermoelastic Evaluation of Defects By TV Holography ..... 168

**Y. Kin, L. Garret, A. Mayer, R. Mccarty**

Effect of Temperature on Fatigue Life of Polycarbonate Specimens . . . . . 173

**M. Ostoja-Starzewski**

Spring-Networks in Thermomechanics: Effective Properties and  
Fracture Phenomena .....179

**T. R. Tauchert, G. A. Webster, A. Ezeilo**

Residual Stresses in a Surface-Heat-Treated Steel Specimen . . . . . 185

**W. Wang, I. Jasiuk**

Effective Thermal Properties of Particulate Composites with  
Inhomogeneous Interphase ..... 190

## **Combustion**

**L. A. Kennedy, R. J. Driscoll**

A Fluid Element for Turbulent Combustion ..... 199

**K. Parvez, S. R. Gollahalli**

Stability of a Burning Liquid Spray Jet ..... 203

**C. Treviño, E. Luna**

Numerical Study of the Ignition of Hydrogen in a Mixing Layer ..... 209

## **Mechanics of Composite Materials**

### **E. Barbero**

Compression Strength of Pultruded Fiber Reinforced Composites . . . . . **217**

### **V. Birman**

Generalization of Hoff's Method to design of Composite Columns  
Subjected to Creep . . . . . **223**

### **C. E. S. Cesnik, D. H. Hodges**

Stiffness Constants for Composite Beams Including Large Initial Twist  
and Curvature Effects . . . . . **229**

### **Y. A. Dzenis, D. H. Reneker**

Mechanics of Fiber Composites with Fractal Interfaces . . . . . **233**

### **J. W. Eischen, S. Torquato**

Determining Elastic Behaviour of Composites by the Boundary  
Element Method . . . . . **239**

### **R. M. Hackett, W. Uddin, S. E. Adefe, F. Fernández**

Analysis of the Time Dependent Response of FRP Prestressed  
Concrete . . . . . **245**

### **A. L. Kalamkarov**

Modeling of the Periodic Composite Materials and Structures . . . . . **251**

### **L. B. Lessard, M. M. Shokrieh**

Overview of Failure in Composite Materials . . . . . **255**

### **A. Mosallam**

Semi-Rigid Behaviour of Beam to Column Connections for Polymer  
Composite Frame Structures . . . . . **261**

### **J. M. Plecnik, O. E. Henriquez, V. F. Sanchez**

Fiber Reinforced Plastic Bridge Decks . . . . . **267**

### **A. A. Rubinstein**

Micromechanical Analysis of Strength of Fiber Reinforced Brittle  
Matrix Composites . . . . . **273**

### **G. S. Springer, L. P. Kollár**

Damage Detection in Composites Using Embedded Sensors . . . . . **279**

### **E. Suhir**

Mechanics of Optical Glass Fibers - Review . . . . . **283**

### **Y. J. Weitsman, H. Zhu**

The Progression of Failure Mechanisms in Uni-Directionally Reinforced  
Ceramic Composites . . . . . **287**

## Mechanics of Polymer Materials

<b>F. A. Da Silva, L. Medina, O. Pérez-Martín, A. J. Muller, A. E. Sáez</b>	
Flow of Polymer Solutions Through a Bidimensional Porous Medium . . . . .	295
<b>J. González, C. Rosales, R. Perera, B. Rojas</b>	
The Grafting of Diethylmaleate on Linear Low Density Polyethylenes in a Twin Screw Extruder . . . . .	301
<b>H. H. Kausch, T. Q. Nguyen, C. J. G. Plummer</b>	
Stress Transmission through Molecular Chains . . . . .	306
<b>W. G. Knauss</b>	
Time Dependent Processes in The Fracture of Polymers . . . . .	314
<b>A. J. Muller, A. E. Sáez, J. P. Tatham, J. A. Odell</b>	
Transition to Turbulence in Opposed Jets: Effect of Polymeric Additives . . . . .	320
<b>M. C. Payares de A., C. Rosales, H. A. Rojas</b>	
Residence Time Distribution in a Twin Screw Extruder . . . . .	325
<b>C. Rosales, R. Parera, A. Gamboa</b>	
Extensional Viscosity of Polyethylenes in Converging Dies . . . . .	331

## Mechanics of Wood Materials

<b>N. T. Mascia</b>	
A Study of the Homogeneity in the Mechanics of Wood Deformation . . . . .	339
<b>G. Schlosman, G. Zurdo</b>	
Variación del Modulo de Elasticidad a Flexión en Muestras de Alamo . . . . .	345

## Geomechanics and Granular Materials

<b>I. Assali, B. B. Budkowska</b>	
Analysis of Annual Thawing / Freezing Changes Around Piles in Nonhomogeneous Soils . . . . .	351
<b>M. Forcinito, M. Epstein</b>	
Geometrical Automata for Granular Media . . . . .	357
<b>M. H. Hamdan, K. D. Sawalha</b>	
Some Flow Patterns in Granular Porous Media . . . . .	363
<b>A. Medina, E. Luna, R. Alvarado, C. Zrevino</b>	
Theoretical Analysis of Axi-Symmetrical Rotation of a Sand Heap . . . . .	369

## **Earthquake Engineering**

### **A. H. S. Ang, D. De León**

Optimal Acceptable Risks for **Aseismic** Design of R/C Buildings . . . . . **377**

### **M. R. Ehsani**

Seismic Retrofitting of Masonry Structures with Composite Materials:  
Research and Field Application . . . . . **383**

### **S. F. Masri, A. G. Chassiakos**

On-Line Identification of Hysteretic System . . . . . **391**

### **R. Villaverde**

Modal Superposition Method for Seismic Analysis of Nonlinear **Multi-**  
Degree-of-Freedom Structures . . . . . **397**

### **F. Waisman, M. Grigoriu, A. Reinhorn**

Bridges with Base Isolators subject to Seismic Events with Strong  
Vertical Components . . . . . **403**

## **Applications in Biomechanics**

### **K. K. Firoozbakhsh, T. A. Decoster, M. S. Moneim**

Effect of Cyclical Loading on the Holding Power of Surgical Screws . . . . . **411**

### **K. K. Firoozbakhsh, T. A. Decoster, M. S. Moneim**

Mechanics of Staple Fixation in Bone . . . . . **413**

### **K. K. Firoozbakhsh, G. G. Wang, M. S. Moneim**

Impulsive Loading of Metacarpal Fracture Fixation Constructs . . . . . **415**

### **E. Guerra, D. Pamplona, A. Leirner, A. Jatene**

Experimental and Theoretical Analysis for Inflated Fixed  
Bov Pericardium . . . . . **417**

### **M. Letelier, R. Soumastre, N. O. Moraga**

Non-Newtonian Effects in Small Stenosed Arteries . . . . . **422**

## **Mathematical Methods used in Applied Mechanics**

### **C. A. Andersen**

A Comparison of Computer Algebra Systems . . . . . **431**

### **J. Fillo, Y. Zeng, J. Geer**

The Hybrid Perturbation - Galerkin Technique applied to a Class of  
Manufacturing Process Equations . . . . . **437**

**J. Geer**

Improving the Usefulness of Fourier Series with Fourier-Pade Approximations . . . . . **444**

**M. Wester**

A Review of CAS Mathematical Capabilities . . . . . **450**

**Numerical Methods used in Applied Mechanics**

**J. L. Almará**

An Object Based Data Structure for 3D Modelling . . . . . **459**

**J. L. Almará**

An Implementation of the Finite Element Method Using Virtual Memory . . . . . **464**

**G. Buscaglia, E. Fancello, R. Feijoo, C. Padra, E. Taroco**

Error Estimators for a Class of Problems in Computational Mechanics . . . . **469**

**S. I. Chou**

Complex Variable Boundary Element Method in Unknown Derivatives . . . . **475**

**E. Dari, G. Buscaglia**

Improving the Quality of Three-Dimensional Unstructured Finite Element Meshes: An Optimization-Based Method . . . . . **481**

**E. Dufeu, P. Becker**

Estimacion De Error en 3D Basada en Campos de Esfuerzos Continuos . . . . **487**

**H. L. Schreyer, S. J. Zhou, D. Sulsky**

Applications of the Material Particle-in-Cell Method to Large Deformations of Solids . . . . . **493**

**M. Storti, J. D'Elia, S. Idelsohn**

A CVBEM Formulation for Multiple Profiles and Cascades . . . . . **499**

**Applications in Technological Problems**

**R. Azcueta, V. Bertram, G. Jensen**

Power Prediction Based on Model Tests for High Speed Craft . . . . . **507**

**V. Bertram, J. Meyer**

Hybrid Hydrofoil Technology Applications . . . . . **513**

**M. C. Ferraz de Mello, H. Rozenfeld**

Development of an Object Oriented System to Visual Production Scheduling and Control . . . . . **518**

**A. R. Marchegiani**

Analysis of the Trend in Selecting and Design of Small Francis  
Turbines ..... **520**

**M. Mazurkiewicz**

Tool/Chip Friction Reduction for Modern Manufacturing ..... **526**

**R. Prado**

Efecto de la **Distribución** de Angulos de **Pala** sobre el Comportamiento  
**Aerodinámico** de una Turbina **Eólica** de Eje Horizontal ..... **532**

**H. Rozenfeld, H. De Araujo Vega**

Aspects of the Work of a Numerical Control Programming System  
Prototype in an Integrated Manufacturing Environment ..... **538**

**AUTHOR INDEX** ..... **544**
