

CONTENTS

Preface	v
The Curvature Criterion and the Dynamics of a Rolling Elastic Cylinder	1
<i>C. M. Arizmendi, R. Carretero-González, H.N. Núñez-Yépez</i> and <i>A. L. Salas-Brito</i>	
Hamiltonian System Governed by a Finite-Difference Equation: The Relativistic Oscillator in an External Field	15
<i>N. M. Atakishiyev, S. M. Nagiyev and K. B. Wolf</i>	
Capture Orbits in a Newtonian n-Body Problem	25
<i>S. F. Blundell</i>	
Suhamonid Solutions of Hamiltonian Systems in the Plane	45
<i>H. E. Cabral</i>	
Bifurcations of Links of Periodic Orbits on Integrable Hamiltonian Systems on S^3	51
<i>B. Campos, J. Martinez-Alfaro and P. Vindel</i>	
Poincaré Melnikov Method for Parabolic Points	61
<i>J. Casasayas, E. Fontich and A. Nunes</i>	
Integrable Hamiltonians on Simple, Irreducible, 3-Manifolds	73
<i>J. Casasayas and A. Nunes</i>	
Geometric Properties of Some Sets of Stable Polynomials and Entire Functions	81
<i>H. Cendra and A. M. L. Torresi</i>	
The Spring-Pendulum System and the Riemann Equation	97
<i>R. C. Churchill, J. Delgado and D. L. Rod</i>	
Stability of Almost Circular Periodic Orbits in Hill's Problem	105
<i>J. Delgado and E. A. Lacomba</i>	

On the Mückett-Treder Gravitational Law	127
F. N. Diacu	
Resonant Quasimodes of a S-Dimensional Anharmonic Oscillator, Localized in the Neighborhood of Closed Trajectories and Complex Bundles on Them	141
S. Y. Dobrokhotov, V. Martinez-Olive' and A. I. Shafarevich	
Numerical Continuation of Periodic Orbits for the j_2, j_3, j_4 Harmonics in Satellite Theory	151
A. Elipe and M. Lara	
Fast Rotations of the Rigid Body	163
F. Fassb	
On Perturbed 3D Elliptic Oscillators: A Case of Critical Inclination in Galactic Dynamics	179
S. Ferrer and J. Garate	
Billiards that Share a Triangular Caustic	199
E. Gutkin and O'Knil	
Equilibria of Spherical Charge Distributions	215
R. C. Howison and C. K. McCord	
A Geometric Framework for Billiards with Time-Dependent Boundaries	225
J. Koiller, R. Markarian, S. P. de Carvalho and Sylvie Oliffson Kamphorst	
Annulus and Billiard Maps with Asymptotic Entropy	237
J. Kwapisz and R. Swanson	
Polygonal Vortex Configurations	249
Debra Lewis and Tudor Ratiu	
Parallel Escapes in the Restricted Coulombian Isosceles 3-Body Problem	263
E. A. Lacomba and J. G. Reyes	

Qualitative Behaviour of the Flow of the n -Body Problem in Zero Energy Level	275
<i>J. Llibre and J. Waldvogel</i>	
Equivariant Generating Functions and Periodic Points	289
<i>K. R. Meyer</i>	
The Motion of Two Dimensional Vortices with Mass as a Singular Perturbation Hamiltonian Problem	301
<i>W. M. Oliva</i>	
Postulates of Hamiltonian Geometrical Optics in Isotropic and Anisotropic Media	311
<i>A. L. Rivera, S. M. Chumakov and K. B. Wolf</i>	
Spectral stability of Relative Equilibria in the $n + 1$ Body Problem	321
<i>D. S. Schmidt</i>	
Analytic Continuation of Circular Kepler Motion to the General Three-Dimensional Three-Body Problem	343
<i>J. Soler</i>	
On Perturbations of Hamiltonian Systems Generated by Contractions of Lie Algebras	357
<i>Y. Vorobjev and R. Flores-Espinoza</i>	
The Horseshoe Map in the Collinear Three-Body Problem	375
<i>Q. Wang</i>
