

CONTENTS

OPENING SESSION

Opening Statements.....	1
<i>W. Burkart, W.E.H. Blum, C. Hera, P.M. Chalk</i>	

EVALUATION AND MANAGEMENT OF NATURAL AND MANUFACTURED NUTRIENT SOURCES (Session 1)

Innovations in isotope techniques to enhance the evaluation and management of nutrient sources (IAEA-SM-363/83).....	9
<i>G. Blair, R. Till</i>	
Dissimilatory nitrate reduction to ammonium and responsible microflora in two contrasting paddy-rice soils (IAEA-SM-363/1).....	17
<i>S.X. Yin, D. Chen, L. Chen, R. Edis</i>	
Green-manure (<i>Gliricidia sepium</i>) effects on growth and yield of coffee and quantification of nitrogen recovery using ¹⁵ N dilution (IAEA-SM-363/7).....	26
<i>W.D.L. Gunaratne, A.P. Heenkenda</i>	
Nitrogen recovery by maize from a combination of mucuna residues and inorganic N in the derived savannah of southern Benin using ¹⁵ N (IAEA-SM-363/4).....	32
<i>P. Houngnandan, N. Sanginga, B. Vanlauwe, O. Van Cleemput</i>	
Evaluation of agronomic effects of rock phosphate using radioisotope techniques (IAEA-SM-363/3).....	39
<i>I. Bogdevitch, S. Tarasiuk, Y. Putyatin, G. Pirogovskaya, V. Soroka, F. Zapata</i>	
Using ³² P methodology to elucidate root distribution and competition for nutrients in intercropped plant communities (IAEA-SM-363/5).....	47
<i>H. Hauggaard-Nielsen, P. Ambus, E.S. Jensen</i>	
Transfer of phosphorus in soil-plant and soil-solution systems using isotopic labeling and dilution methods (IAEA-SM-363/6).....	49
<i>C. Morel, A. Schneider, D. Plenet, J.C. Fardeau</i>	
Isotopic studies on the fertilizer value of sewage sludge for increased crop yield and to preserve the environment (IAEA-SM-363/2).....	57
<i>S. Ahmed, S.M. Rahman, M.B. Hossain</i>	
Nitrogen and phosphorus fertilization of rice (<i>Oryza sativa</i> L.) grown in an acid-sulphate soil of the Mekong delta, Viet Nam (IAEA-SM-363/9).....	64
<i>Thu Tra. Luong, Le Dac Lieu, Van Tam Hoang, An Cuong Pham</i>	

SOIL ORGANIC MATTER DYNAMICS AND NUTRIENT CYCLING (Session 2)

C and N cycling in soil: Advances in the application of ¹³ C and ¹⁵ N techniques (IAEA-SM-363/88).....	71
<i>S. Recous, B. Mary, B. Nicolardot</i>	
Effect of tillage system on gross mineralization rate of a Typic Argiudoll soil (Argentina) (IAEA-SM-363/10).....	80
<i>A. Pazos, C. Videla, H. Echeverria, G. Studdert, P.C. Trivelin</i>	
Use of natural abundance measurements of ¹⁵ N in residual nitrate assessing denitrification in buffer strips (IAEA-SM-363/11).....	85
<i>K. Dhondt, P. Boeckx, O. Van Cleemput, G. Hofman</i>	
Soybean benefit to a subsequent wheat crop in a cropping system under zero tillage (IAEA-SM-363/12).....	87
<i>B.J.R. Alves, L. Zotarelli, R.M. Boddey, S. Urquiaga</i>	
A ¹⁵ N pool-dilution approach to measure gross N-transformations following applications of domestic sludge and compost to a field soil (IAEA-SM-363/13).....	94
<i>P. Ambus, L.K. Kure, E.S. Jensen</i>	

Microbial assimilation of organic N from decomposing crop residues determined using ^{15}N pool dilution and mirror imaging (IAEA-SM-363/14).....	96
<i>E.S. Jensen</i>	
Effects of tillage and cropping on the dynamics of soil organic matter (IAEA-SM363/15).....	101
<i>K.M. Manjaiah, R. P. Voroney</i>	
Below ground nitrogen in fababean and chickpea (IAEA-SM-363/16).....	113
<i>D.F. Khan, D. Chen, D.F. Herridge, G.D. Schwenke, MB, Peoples</i>	
Seasonal variability of soil CO_2 flux and its isotopic composition ($\delta^{13}\text{C}$, $\delta^{14}\text{C}$, $\delta^{18}\text{O}$) (IAEA-SM-363/17).....	119
<i>Z. Gorczyca, . Kuc, K. Rozanski</i>	
Can the ^{13}C natural abundance technique be applied to quantify the soil organic matter in crop rotations with mixed C_3 and C_4 plants? (IAEA-SM-363/18)	127
<i>S. D. Wanniarachchi, R. P. Voroney</i>	
Production of labelled plant materials to trace the fate of residue-derived carbon, nitrogen, and sulphur (IAEA-SM-363/19).....	133
<i>P. Basilio-Sanchez, G. Blair, R. Till, M. Faint</i>	
Nitrogen dynamics and balance in a lowland rice cropping system (IAEA-SM-363/20)	141
<i>S. Phongpan, A.R. Mosier</i>	

SOIL AND WATER MANAGEMENT AND CONSERVATION (Session 3)

Exploits and endeavours in soil water management and conservation using nuclear techniques (IAEA-SM-363/84).....	151
<i>S.R. Evett</i>	
Water use of cereal-canola-luceme rotations in southeastern Australia (IAEA-SM-363/21).....	178
<i>C. J. Smith, W. J. Bond, K. Verburg, F. X. Dunin</i>	
Fate of nitrogen from mineral fertilizer and liquid manure over a two-year crop rotation (IAEA-SM-363/22).....	185
<i>P. Cepuder</i>	
Effect of nutrient and soil management on the efficiency of nitrogen and water use in rain fed wheat in China (IAEA-SM-363/123).....	196
<i>Guixin Cai, Tinghui Dang, Shengli Guo, Mingde Hao</i>	
Fate of fertilizer nitrogen applied to wheat in the Mediterranean region (IAEA-SM-363/79) 	203
<i>C. Kirda, R. Derici</i>	
Nitrogen balance in irrigated potatoes in sandy-textured soils (IAEA-SM-363/25).	209
<i>MB. Halitligil, A. Akin, A. Ilbeyi</i>	
Overview of the IAEA programme on fertigation studies in the Mediterranean region (IAEA-SM-363/26)	217
<i>P. Moutonnet, L.K. Heng</i>	

PLANT TOLERANCE TO ENVIRONMENTAL STRESS (Session 4)

Genetic diversity of plants and its exploitation for stress environments (IAEA-SM-363/90).....	237
<i>S.H. M. Naqvi, R. Bilal</i>	
Are plants in the Chinese Takkumakan Desert water limited? A stable-isotope approach (IAEA-SM-363/27)	239
<i>S.K. Arndt, A. Foetzki, F.M Thomas, . Popp</i>	
Carbon isotope signatures of leaf carbon fractions: A new approach for studying short term water deficits of plants (IAEA/SM-363/28).....	243
<i>S. Heintel, W. Wanek, A. Richter</i>	
Impact of soil moisture on nodulation, biological nitrogen fixation and yields of selected tropical legumes (IAEA-SM-363/29)	245
<i>U.R. Sangakkara, A.D.A. Ratnayake, K.S. Kumarasinghe</i>	

ENVIRONMENTAL AND POLLUTION STUDIES (Session 5)

Use of nuclear techniques in environmental and pollution studies (IAEA-SM-363187).....	253
<i>M.H. Gerzabek, G. Haberhauer, A. Krenn, T. Shinonaga</i>	
Radioecological assessment of environmental pollution by naturally occurring radionuclides in the region of an ex-uranium mine and plant (IAEA-SM-363/30).....	268
<i>R.M. Kamenova-Totzeva, N.I. Shopov, R.B. Karaivanova</i>	
Iodine-131 uptake and transfer from soil to rice following factitious contaminations (IAEA-SM-363/32).....	272
<i>J. Balamurugan, A.R. Rajan</i>	

ASSESSMENT OF SOIL EROSION AND SEDIMENTATION (Session 6)

Recent advances in the use of environmental radionuclides in soil erosion investigations (IAEA-SM-363189).....	279
<i>D. E. Walling</i>	
Comparison of ¹³⁷ Cs fallout redistribution analysis and conventional erosion prediction models (WEPP/USLE) (IAEA-SM-363/33).....	302
<i>G. Sparovek, O.O.S. Bacchi, S.B.L. Ranieri, E. Schnug, I.C. De-Maria</i>	
Use of the ¹³⁷ Cs technique in soil-erosion investigations: A case study in the Zitouna Basin in the north of Morocco (IAEA-SM-363/34).....	308
<i>M. Benmansour, M. Ibn Majah, H. Marah, T. Marfak, D.E. Walling</i>	
Variability of ¹³⁷ Cs inventories in undisturbed soils across the territory of Viet Nam (IAEA-SM-363/82).....	316
<i>P.D. Hien, H.T. Hiep, N.H. Quang, N.Q. Huy, N.T. Binh, P.S. Hai, N.Q. Long, V.T. Bac</i>	

RECENT ADVANCEMENTS IN ISOTOPE ANALYTICAL METHODOLOGIES AND RELATED INSTRUMENTATION (Session 7)

Advances and future trends in radioisotope analysis and applications (IAEA-SM-363/85).....	325
<i>M.F. L'Annunziata</i>	
Trends in stable isotopic analyses and applications (IAEA-SM-363/86).....	355
<i>J. Oesselmann, A. Hilker, C.B. Douthitt</i>	
Characterization and dynamics of particulate organic matter in a restored river floodplain system (IAEA-SM-363/36).....	365
<i>F. Aspetsberger, F. Huber, S. Kargl, B. Scharinger, P. Peduzzi, T. Hein</i>	
Application of a simple cleanup technique for O and N isotope analysis of nitrate in natural water samples (IAEA-SM-363/37).....	372
<i>G. Haberhauer, K. Blochberger, M.H. Gerzabek</i>	
Continuous flow pyrolysis techniques for the isotopic measurements of oxygen- deuterium in waters, organic and inorganic compounds (IAEA-SM-363/97).....	377
<i>J. Morrison, H. Hertle</i>	
Determination of iodine in cereal grains cultivated in Austria and standard reference materials by neutron activation analysis (IAEA-SM-363/38).....	379
<i>T. Shinonaga, M.H. Gerzabek, K. Mück, J. Casta</i>	
Measuring isotopic signatures in water-soluble organic carbon (IAEA-SM-363/39).....	384
<i>R. Hood, L. Mayr, K. McTiernan</i>	

POSTER SESSION

Use of nuclear techniques to evaluate management practices for common bean: A new P fertilizer based on partially solubilized rock phosphate (IAEA-SM-363/54P).....	393
<i>A. Garcia, G. Hernández, A. Nuviola, D. Montange, J.J. Drevon</i>	
Evaluation of the effects of irradiated sewage sludge on plant growth (IAEA-SM-363/40P).....	396
<i>S. Lopez, J.P. Bonetto, N. Barbaro</i>	

Additional advantages of irradiation of sewage sludge for agriculture use (IAEA-SM-363/41P).....	398
<i>C. Magnavacca, J.G. Graiño</i>	
Gross mineralization from plant residues using cross-labelling (IAEA-SM-363/42P).....	400
<i>C. C. Videla, R. C. Hood</i>	
Diviner 2000®: A new portable hand-held depth-recognizing soil-moisture capacitance probe (IAEA-SM-363/43P).....	402
<i>P. Buss, A. Fares, M. Dalton</i>	
Effects of perennial pasture species on clover N fixation assessed by the “N-dilution method (IAEA-SM-363/44P).....	404
<i>J.I. Evans, B.S. Dear, G. Sandra MB. Peoples</i>	
Importance of drought stress and nitrogen fixation in the desert legume <i>Alhagi sparsifolia</i> — results from ¹³ C and ¹⁵ N natural-abundance studies in the field (IAEA-SM-363/45P).....	406
<i>S.K. Amdt, A. Kähmen, C. Arampatsis, M. Popp</i>	
A new approach to nitrogen nutrition of robusta coffee in Cote d’Ivoire (IAEA-SM-363/52P).....	408
<i>K. Ngoran, N.J. Nguessan, A. Konan, G. Yoro</i>	
Nitrogen recycling in a potato-maize-potato sequence (IAEA-SM-363/53P).....	410
<i>G. Dueñas, O. Muñiz, T. Lopez, F. Zapata</i>	
Modification of phosphate-ion transfer in a cropped Colombian oxisol with P fertilization (IAEA-SM-363/56P).....	412
<i>C. Morel, P.G. Sabo, D. Friesen</i>	
Determination of uranium uptake by plants by means of inductively coupled plasma mass spectrometry (IAEA-SM-363/57P).....	414
<i>J. Fleckenstein, E. Schmug, M.C. Meyer, T. McLendon, D. Price</i>	
Utilization of nitrogen by two rice varieties at various NPK levels (IAEA-SM-363/58P).....	416
<i>M.B. Oncsik, F. Körösi</i>	
Evaluation and management of micronutrients for optimizing rice productivity in valley soils (IAEA-SM-363/59P).....	418
<i>P. Nongkynrih, A.K. Singh, G. Dkhar</i>	
Effect of agricultural countermeasures on the transfer factor of caesium-137 in onion (<i>Allium cepa</i> L.) (IAEA-SM-363/60P).....	420
<i>P.V. Jegadeeswari, M. Shanmugam, A.R. Rajan</i>	
Nitrogen contribution of green manure to corn on an ultisol using ¹⁵ N methodology (IAEA-SM-363/62P).....	422
<i>Nurhajati Hakim, M. Helal</i>	
The use of ³² P and ¹⁵ N to estimate fertilizer efficiency in oil palm (IAEA-SM-363/63P).....	424
<i>Elsie L. Sisworo, Widjang H. Sisworo, Havid Rasjid, Syamsul. Rizal, Z. Poeloengan, Kusnu Martoyo</i>	
The use of nuclear techniques for optimizing fertilizer application to irrigated wheat (IAEA-SM-363/95P).....	427
<i>L.K. Heng, P. Moutonnet</i>	
Aspects of fertilizer-N recovery and balance in fertigated potato in central Bekaa, Lebanon (IAEA-SM-363/65P).....	430
<i>T. Darwish, T. Atallah, S. Hajhasan, A. Chranek</i>	
Recycling of crop-residue N for sustainable production in a maize-groundnut rotation system (IAEA-SM-363/66P).....	432
<i>Rosenani Abu Bakar, Siti Zaayah Darus, Mubarak Abdelrahman Abdalla</i>	
Application of sewage sludge for corn cultivation on a tropical acid soil (IAEA-SM-363/67P).....	434
<i>Rosenani Abu Bakar, Che Fauziah Ishak</i>	
The potential of fresh leaves to improve acid-soil infertility (IAEA-SM-363/68P).....	436
<i>Zaharah A. Rahman, W.A.K. Wan Rashidah</i>	
Use of ¹⁵ N and the neutron probe in evaluating soil organic matter turnover and water management in wheat (IAEA-SM-363/70P).....	438
<i>M. Ismaili, A. Ichir</i>	
Effects of N and P and their interactive effects with rice genotypes on N ₂ fixation (IAEA-SM-363/71P).....	440
<i>R.K. Shrestha, J.K. Ladha</i>	

Efficiency of use of fertilizer nitrogen by grapevine cultivated on sands as influenced by time of application (IAEA-SM-363/72P).....	442
<i>G.E. Suteu, A. Serdinescu, M. Tircomnicu</i>	
Organic matter affects retention of applied fertilizer nitrogen (IAEA-SM-363/74P).....	445
<i>U.R. Sangakkara, C.S. Kandapola</i>	
Use of ¹⁴ C to assess the age of humic substances (IAEA-SM-363/73P).....	448
<i>M.A. Anisimova, O.A. Chichagova, E. Schnug</i>	
Movement of carbon to roots of food legumes as affected by soil moisture and fertilizer potassium (IAEA-SM-363/75P).....	450
<i>U.R. Sangakkara, M. Frehner, J. Nosberger</i>	
Assessment of phosphorus availability in long term field experiments testing P-input regimes (IAEA-SM-363/76P).....	452
<i>A. Gallet, S. Sinaj, E. Frossard, R. Flisch</i>	
Nitrogen fixation by vegetable and green-manure legumes as influenced by intercropping with maize (IAEA-SM-363/77P).....	454
<i>M.K. Schneider, W. Richner, P. Stamp, U.R. Sangakkara</i>	
Drip fertigation for improvement of cotton yield, nitrogen recovery and water use efficiency (IAEA-SM-363/78P).....	456
<i>M. Janat</i>	
Effects of phosphorus nutrition on growth and radiophosphorus uptake in <i>Sorghum bicolor</i> genotypes (IAEA-SM-363/81P).....	458
<i>R. Camacho, E. Malavolta</i>	
Use of labelled plant residues to study the impact of residue incorporation on soil carbon and aggregation (IAEA-SM-363/91P).....	460
<i>N. Blair, A.R. Till, R.D. Faulkner, K.E. Prince</i>	
Microcosms for evaluation of degradation of ¹⁴ C xenobiotics in soil (IAEA-SM-363/92P).....	462
<i>C. in der Wiesche, F. Zadrazil, R. Martens</i>	
The use of carbon-isotope discrimination to screen wheat cultivars for tolerance of salinity and drought (IAEA-SM-363/93P).....	464
<i>R. Shaheen, R.C. Hood</i>	
Labelling of sewage sludge with ¹³ C and ¹⁵ N isotopes (IAEA-SM-363/94P).....	466
<i>H. Kirchmann, Y. Cohen</i>	
Nitrogen transfer from legumes to non-legumes (IAEA-SM-363/96P).....	468
<i>G. Hardarson, M. Aigner</i>	
Change of ¹⁵ N natural abundance ($\delta^{15}\text{N}$) in a forest soil receiving elevated N deposition (IAEA-SM-363/98P).....	470
<i>H. Vervaet, P. Boeckx, O. Van Cleemput, G. Hofman</i>	
Closing statement and synthesis.....	473
<i>P.M. Chalk</i>	
Symposium Officials.....	477
List of Participants.....	479
