Volume 516 December 28, 1987

BLOOD IN CONTACT WITH NATURAL AND ARTIFICIAL SURFACES^a

Honorary Conference Chair

THEODORE H. SPAET

Editors and Conference Organizers

EDWARD F. LEONARD. VINCENT T. TURITTO, AND LEO VROMAN

CONTENTS	
Blood in Contact with Artificial Surfaces: Where Have We Been and Where Are We Going? A Modest Proposal. By THEODORE H. SPAET	1
Theme 1. Surfaces That Contact Blood Part I. Endothelium and Subendothelium	
Vascular Endothelium: Nature's Blood-Compatible Container. By MICHAEL A. GIMBRONE, JR.	5
Thrombogenic and Nonthrombogenic Biological Surfaces. By J. F. Mustard, H. M. Groves, R. L. Kinlough-Rathbone, and M. A. Packham	12
Activation of Endothelial Cells. By UNA SI RYAN.	22
Adhesion of Blood Platelets to the Extracellular Matrix of Cultured Human Endothelial Cells. By Jan J. Sixma Patricia F. E. M. Nievelstein, Jaap-Jan Zwaginga, and Philip G. de Groot	39
Role of Platelet Membrane Glycoproteins and Von Willebrand Factor in Adhesion of Platelets to Subendothelium and Collagen. By Kjell S. Sakariassen, Edith Fressinaud, Jean-Pierre Girma, Dominique Meyer, and Hans R. Baumgartner.	52
Summary. By James M. Anderson	66
PART II. ARTIFICIAL SURFACES	
Selected Methods of Investigation for Blood-Contact Surfaces. By R. E. BAIER	68
Influence of Endogenous Albumin Binding on Blood-Material Interactions. By R. C. EBERHART, M. S. MUNRO, J. R. FRAUTSCHI, M. LUBIN, F. J. CLUBB, JR., C. W. MILLER, and V. IJ SEVASTIANOV	<i>78</i>
Modification of Material Surfaces to Affect How They Interact with Blood. By	96

[&]quot;This volume is the result of a conference entitled Blood in Contact with Natural and Artificial Surfaces, which was held by the New York Academy of Sciences on November 12-14, 1986, in New York, NY.

The Search for Thromboresistance Using Immobilized Heparin. By R. LARSSON, O. LARM, and P. OLSSON Nonthrombogenic Bioactive Surfaces. By S. W. KIM, H. JACOBS J. Y. LIN, C. NOJORI, and T. OKANO Endothelial Linings in Prosthetic Vascular Grafts. By William E. Burkel, LINDA M. GRAHAM, and JAMES C. STANLEY Thrombosis om Endothelializable Prostheses. By STUART K. WILLIAMS and BRUCE E. JARRELL. Plasma Protein Adsorption: The Big Twelve. By J. D. ANDRADE and V. HLADY Spectroscopic Approaches to the Investigation of Interactions between Artificial Surfaces and Proteins. By ROBERT I. LEININGER, TIMOTHY B. HUTSON, and ROBERT J. JAKOBSEN Role of Fibrinogen in Activation of Platelets by Artificial Surfaces. By EDWIN W. SALZMAN, JACK LINDON] GERALD MCMANAMA, and J. ANTHONY WARE Distinctions and Correspondences among Surfaces Contacting Blood. By EDWARD W. MERRILL Summary. By S. A. BREBERG Theme II. Blood Elements at Surfaces PART IJ PLASMA SYSTEMS The Fateof Fibrinogen following Adsorption at the Blood-Biomaterial Interface. By JOHN L. BRASH The Effects of Surface Chemistry and Coagulation Factors on Fibrinogen Adsorption from Plasma. By STEVEN M. SLACK, JANICE L. BOHNERT, and THOMAS A. HORBETT Adsorption Kinetics of Protein Mixtures: A Tentative Explanation of the Vroman Effect. By Peter A. Cuypers, George M. WILLEMS, H. COENRAAD HEMKER, and Wim Th. HEBBERS Initiation of Blood Coagulation at Artificial Surfaces. By ROBERT W. COLMAN, CHERYL F. SCOTT, ALVIN H. SCHMAIER, YANINA T. WACHTFOGEL ROBIN A. PIXLEY, and L. HENRY EDMUNDS, JR. The Activation of the Contact System of Human Plasma by Polysaccharide Sulfaces. By MICHAEL SUVERBERG and SUSAN VEST DIEHL. Fibronectin Adsorption on Material Surfaces. By REBERICK GRINNELL A Preliminary Comparison of the Thrombogenic Activity of Vitronectin and Other RGD-containing Protein Swhen Bound to Surfaces. By WILLIAM E. COLLINS, Dearke F. MOSHER, BIANCA R. TOMASINI, and STUART L. COOPER Methods of Investigating Protein Interactions on Artificial and Natural Surfaces. By		
Endothelial Linings in Prosthetic Vascular Grafts. By WILLIAM E. BURKEL, LINDA M. GRAHAM, and JAMES C. STANLEY Thrombosis on Endothelializable Prostheses. By STUART K. WILLIAMS and BRUCE E. JARRELL. Plasma Protein Adsorption: The Big Twelve. By J. D. Andrade and V. Hladdy Spectroscopic Approaches to the Investigation of Interactions between Artificial Surfaces and Proteins. By Robert I. Leininger, Timothy B. Hutson, and Robert J. Jakobsen Role of Fibrinogen in Activation of Platelets by Artificial Surfaces. By Edwin W. Salzman, Jack Lindon, Gerald McManama, and J. Anthony Ware Distinctions and Correspondences among Surfaces Contacting Blood. By Edward W. Merrill Summary. By S. A. Barberg Theme II. Blood Elements at Surfaces Part Il Plasma Systems The Effects of Surface Chemistry and Coagulation Factors on Fibrinogen Adsorption from Plasma. By Steven M. Slack, Janice L. Bohnert, and Thomas A. Horbett Adsorption Kinetics of Protein Mixtures: A Tentative Explanation of the Vroman Effect. By Peter A. Cuypers, George M. Willems, H. Coenraad Hemker, and Wim Th. Hermes Initiation of Blood Coagulation at Artificial Surfaces. By Robert W. Colman, Cheryl F. Scott, Alvin H. Schmaler, Yanina T. Wachtfogel, Robin A. Pixley, and L. Henry Edmunds, Jr. The Activation of the Contact System of Human Plasma by Polysaccharide Sulfates. By Michaell Silverberg and Susan Vest Diebl. Fibronectin Adsorption on Material Surfaces. By Frederick Grinnell A Preliminary Comparison of the Thrombogenic Activity of Vitronectin and Other RGD-containing Proteins When Bound to Surfaces. By William E. Collins, Deane F. Mosher, Bianca R. Tomasini, and Stuart L. Cooper Methods of Investigating Protein Interactions on Artificial and Natural Surfaces. By Leo Vroman. Complement Activation in Extracorporeal Circuits! By Dennis E. Chenoweth	The Search for Thromboresistance Using Immobilized Heparin. <i>By</i> R. LARSSON, O. LARM, and P. OLSSON	10
LINDA M. GRAHAM, and JAMES C. STANLEY Thrombosis on Endothelializable Prostheses. By STUART K. WILLIAMS and BRUCE E. JARRELL. Plasma Protein Adsorption: The Big Twelve. By J. D. Andrade and V. HLADY. Spectroscopic Approaches to the Investigation of Interactions between Artificial Surfaces and Proteins. By Robert I. Leininger, Timothy B. Hutson, and Robert J. Jakobsen Role of Fibrinogen in Activation of Platelets by Artificial Surfaces. By Edwin W. Salzman, Jack Lindon, Gerald McManama, and J. Anthony Ware Distinctions and Correspondences among Surfaces! Contacting Blood. By Edward W. Merrill. Summary. By S. A. Breneng. Theme II. Blood Elements at Surfaces Part IJ Plasma Systems The Effects of Surface Chemistry and Coagulation Factors on Fibrinogen Adsorption from Plasma. By Steven M. Slack, Janice L. Bohnert, and Thomas A. Horbett. Adsorption Kinetics of Protein Mixtures: A Tentative Explanation of the Vroman Effect. By Peter A. Cuypers, George M. Willems, H. Coenraad Hemker, and Wim Th. Hemens Initiation of Blood Coagulation at Artificial Surfaces. By Robert W. Colman, Cheryl F. Scott, Alvin H. Schmaier, Yanina T. Wachtfogel, Robin A. Pixley, and L. Henry Edmunds, Jr. The Activation of the Contact System of Human Plasma by Polysaccharide Sulfates. By Michaell Suverberg and Susan Vest Diehl. Fibronectin Adsorption on Material Surfaces. By Frederick Grinnell. A Preliminary Comparison of the Thrombogenic Activity of Vitronectin and Other RGD-containing Proteins When Bound to Surfaces. By William E. Collins, Deane F. Mosher, Bianca R. Tomasini, and Stuart L. Cooper. Methods of Investigating Protein Interactions on Artificial and Natural Surfaces. By Leo Vroman. Complement Activation in Extracorporeal Circuits By Dennis E. Chenoweth	Nonthrombogenic Bioactive Surfaces. <i>By S. W. Kim, H. Jacobs, J. Y. Lin, C. Nojori, and T. Okano</i>	11
BRUCE E. JARRELL Plasma Protein Adsorption: The Big Twelve. By J. D. Andrade and V. Hlady Spectroscopic Approaches to the Investigation of Interactions between Artificial Surfaces and Proteins. By Robert I. Leininger, Timothy B. Hutson, and Robert J. Jakobsen Role of Fibrinogen in Activation of Platelets by Artificial Surfaces. By Edwin W. Salzman, Jack Lindon, Gerald McManama, and J. Anthony Ware Distinctions and Correspondences among Surfaces Contacting Blood. By Edward W. Merrill Summary. By S. A. Barder Theme II. Blood Elements at Surfaces Part IJ Plasma Systems The Fateof Fibrinogen following Adsorption at the Blood-Biomaterial Interface. By John L. Brash The Effects of Surface Chemistry and Coagulation Factors on Fibrinogen Adsorption from Plasma. By Steven M. Slack, Janice L. Bohnert, and Thomas A. Horbett. Adsorption Kinetics of Protein Mixtures: A Tentative Explanation of the Vroman Effect. By Peter A. Cuypers, George M. Willems, H. Coenraad Hemker, and Wim Th. Hemes Initiation of Blood Coagulation at Artificial Surfaces. By Robert W. Colman, Cheryl F. Scott, Alvin H. Schmaire, Yanina T. Wachtfogel, Robin A. Pixley, and L. Henry Edmunds, Jr. The Activation of the Contact System of Human Plasma by Polysaccharide Sulfates. By Michael Silverberg and Susan Vest Diehl. Fibronectin Adsorption on Material Surfaces. By Frederick Grinnell. A Preliminary Comparison of the Thrombogenic Activity of Vitronectin and Other RGD-containing Proteins When Bound to Surfaces. By William E. Collins, Deane F. Mosher, Bianca R. Tomasini, and Stuart L. Cooper Methods of Investigating Protein Interactions on Artificial and Natural Surfaces. By Leo Vroman Complement Activation in Extracorporeal Circuits By Dennis E. Chenoweth		13
Artificial Surfaces and Proteins. By Robert I. Leininger, Timothy B. Hutson, and Robert J. Jakobsen Role of Fibrinogen in Activation of Platelets by Artificial Surfaces. By Edwin W. Salzman, Jack Lindon, Gerald McManama, and J. Anthony Ware Distinctions and Correspondences among Surfaces! Contacting Blood. By Edward W. Merrill. Summary. By S. A. Barrend. Theme II. PART II. CELLULAR SYSTEMS

TART II. CELLULAR STSTEMS
Surface Abnormalities and Conduit Characteristics as a Cause of Blood Trauma in Artificial Internal Organs: The Interaction of Fluid-Dynamic, Physicochemical, and Cell Biological Reactions in Thrombus Formation. By L. J. Wurzinger and H. Schmid-Schönbein
Rheology of Leukocytes. By Shu Chien, Kuo-LI Paul Sung, Geert W. Schmid-Schönbein, Richard Skalak, Emily A. Schmalzer, and Shunichi Usami
The Interaction between Leukocytes and Endothelium <i>in Vivo. By</i> GEERT W. SCHMID-SCHÖNBEIN, RICHARD SKALAK, SCOTT [ISIMON] and ROBERT L. ENGLER
Blood Elements at Surfaces: Platelets. By BARRY S. COLLER
Regulation of Platelet-Fibrin Thrombi on Subendothelium. By HARVEY J. WEISS, HANS R. BAUMGARTNER, and VINCENT T. TURITIO
Insights into the Mechanism of Platelet Retention in Glass Bead Columns J By Marjorie B. Zucker, Sandra Brownlea, and Jean McPherson
Cell-Cell Interactions in the Eicosanoid Pathway. By A. J. MARCUS, L. B. SAFIER, H. L. ULLMAN, N. ISLAM, M. J. BROEKMAN, J. R. FALCK, S. FISCHER, AND C. v. SCHACKY
Endothelial Cell Perturbation and Low-Density Lipoprotein: Quantitative Autoradiography. By Eric M. Morrel, James A. Holland, Kirkwood A. Pritchard, Clark K. Colton, and Michael B. Stemerman
Endothelial Cell Modulation of Primary Platelet Hemostasis. By Eric F. Grabowski
Summary. By Eric F. Grabowski
Theme III. Transport Phenomena between Blood and Surfaces: Flow in Simple and Complex Shapes
Flow Patterns in Vessels of Simple and Complex Geometries. <i>By</i> Takeshi Karino, Harry L. Goldsmith, Mineo Motomiya, Shoji Mabuchi, and Yasunori Sohara
Transport of Platelets in Flowing Blood. By Eugene C. Eckstein, David L. Bilsker, Christopher M. Waters, J. Shane Kippenhan, and Arno W. Tilles
Cells and Aggregates at Surfaces. By Vincent T. Turitto, Harvey J. Weiss, Hans R. Baumgartner, Lina Badimon, and Valentin Fuster
Interactions of Human Blood Cells with the Vascular Endothelium. By Harry L. Goldsmith and Takeshi Karino
Video Microscopic and Immunochemical Evaluation of Cells at Surfaces. By IRWIN A. FEUERSTEIN
Interaction of Transport Phenomena and Surface Reactions. By Peter D. Richardson
The Closel Approach of Cells to Surfaces. By Edward F. Leonard, Iraj Rahmim, Jana K. Angarska, Christian S. Vassilieff, and Ivan B. Ivanov

The Effect of Fluid Mechanical Stress on Cellular Arachidonic Acid Metabolism. By L. V. McIntire, J. A. Frangos, B. G. Rhee, S. G. Eskin, and E. R. Hall
Summary. By J. David Hellums
Theme IV. The Study of Phenomena in Vivo and ex Vivo Part I. Methods of Assessing Thrombosis
Thrombosis: Studies under Flow Conditions. By Lina Badimon, Juan José Badimon, Vincent T. Turitto, and Valentin Fuster
Methods of Assessment of Thrombosis in Vivo. By Mrinal K. DEWANJEE
Methods of Assessment of Thrombosis ex <i>Vivo. By</i> Stuart L. Cooper, Donna J. Fabrizius, and Timothy G. Grasel
Evolution of Thrombosis. <i>By</i> J. Hirsh, M. R. Buchanan, F. A. Ofosu, and J. Weitz
Interactions of Platelets and Vessell Wall in the Development of Restenosis after Coronary Angioplasty. By Philip C. Adams Jules Y. T. Lam, Lina Badimon, James H. Chesebro, and Valentin Fusier
Blood Tests for the Detection of Thrombosis: Effects of Blood Flow and Location of the Sampling Sitel By John Owen and Karen L. Kaplan
Animal Models for the Evolution of Thrombotic Disease. By W. JEAN DODDS
Appropriate Animal Models for Research on Blood in Contact with Artificial Surfaces. By CHERYL F. SOUT
Thromboembolic and Infectious Complications of Total Artificial Heart Implantation. By Richard A. Ward, Samuel R. Wellhausen, Joanne J. Dobbins, George S. Johnson, and William C. Devres
Summary. By Lina Badimon
PART II. THROMBOGENESIS ON PROSTHETIC SURFACES
Vascular Graft Thrombus Formation. By Stephen R. Hanson and Laurence A. Harker
Thrombogenesis in and Contiguous with Pumping Chambers. <i>By G. L. Burns</i> and D. B. Olsen
Mechanisms of Arterial Graft Failure: The Role of Cellular Proliferation. By ALEXANDER W. CLOWES and MICHAEL A. REIDY
Thrombosis in Extracorporeal Devices. By Pierre M. Galletti
Summary. By Suzanne G. Eskin
Concluding Remarks: About Success and Failure. By Edward F. Leonard, VINCENT T. TURITTO, and Leo VROMAN
