

# CONTENTS

## SECTION I

### Fundamental Concepts

CHAPTER		PAGE
<b>1.</b>	<b>NUMBERS AND POINTS</b>	
1.	Prerequisites . . . . .	1
2.	The Plane and Sphere of Complex Numbers. . . . .	2
3.	Point Sets and Sets of Numbers . . . . .	5
4.	Paths, Regions, Continua . . . . .	13
<b>2.</b>	<b>FUNCTIONS OF A COMPLEX VARIABLE</b>	
5.	The Concept of a Most General (Single-valued) Function of a Complex Variable . . . . .	21
6.	Continuity and Differentiability . . . . .	23
7.	The Cauchy-Riemann Differential Equations . . . . .	28

## SECTION II

### Integral Theorems

<b>3.</b>	<b>THE INTEGRAL OF A CONTINUOUS FUNCTION</b>	
8.	Definition of the Definite Integral . . . . .	32
9.	Existence Theorem for the Definite Integral . . . . .	34
10.	Evaluation of Definite Integrals . . . . .	38
11.	Elementary Integral Theorems . . . . .	44

<b>CHAPTER 4. CAUCHY'S INTEGRAL THEOREM</b>	<b>PAGE</b>
<b>12. Formulation</b> of the Theorem . . . . .	43
13. Proof of the Fundamental Theorem . . . . .	49
14. Simple Consequences and Extensions . . . . .	55

<b>CHAPTER 5. CAUCHY'S INTEGRAL FORMULAS</b>	
15. The Fundamental Formula . . . . .	61
16. Integral Formulas for the Derivatives . . . . .	62

### SECTION III

## Series and the Expansion of Analytic Functions in Series

<b>CHAPTER 6. SERIES WITH VARIABLE TERMS</b>	
17. Domain of Convergence . . . . .	67
18. Uniform Convergence . . . . .	71
19. Uniformly Convergent Series of Analytic Functions . . . . .	73

<b>CHAPTER 7. THE EXPANSION OF ANALYTIC FUNCTIONS IN POWER SERIES</b>	
<b>20. Expansion</b> and Identity Theorems for Power Series . . . . .	79
21. The Identity Theorem for Analytic Func- tions . . . . .	85

<b>CHAPTER 8. ANALYTIC CONTINUATION AND COMPLETE DEFINITION OF ANALYTIC FUNCTIONS</b>	
22. The Principle of Analytic Continuation . . . . .	92
23. The Elementary Functions . . . . .	96
24. Continuation by Means of Power Series and Complete Definition of Analytic Functions . . . . .	98
25. The Monodromy Theorem . . . . .	105
26. Examples of Multiple-valued Functions . . . . .	107

**CHAPTER 9. ENTIRE TRANSCENDENTAL FUNCTIONS**

<b>27. Definitions . . . . .</b>	<b>112</b>
<b>28. Behavior for Large <math> z </math> . . . . .</b>	<b>112</b>

**SECTION IV****Singularities****CHAPTER 10. THE LAURENT EXPANSION**

<b>29. The Expansion . . . . .</b>	<b>117</b>
30. Remarks and Examples . . . . .	119

**CHAPTER 11. THE VARIOUS TYPES OF SINGULARITIES**

31. Essential and Non-essential Singularities or Poles . . . . .	123
32. Behavior of Analytic Functions at Infinity	126
33. The Residue Theorem . . . . .	129
34. Inverses of Analytic Functions . . . . .	134
35. Rational Functions . . . . .	137

BIBLIOGRAPHY . . . . .	140
