| List of Figures | xi |
| List of Tables | xvii |
| Preface | xix |
| Acknowledgments | xxiii |
| Prolegomena | xxv |
| Introduction | xxxiii |
| | |
| 1 MAXENT-NEOM IN EQUILIBRIUM CONDITIONS | 1 |
| 2. MAXENT-NEOM FOR DISSIPATIVE PROCESSES IN OPEN SYSTEMS | 5 |
| 1 The Choice of the Basic Variables | 7 |
| 2 The Variational Method | 12 |
| 3 Entropy Optimization Principles | 34 |
| 3. NONEQUILIBRIUM GENERALIZED GRAND-CANONICAL ENSEMBLE | 43 |
| 1 The Basic Variables Revisited | 43 |
| 2 The Grand-Canonical Nonequilibrium Ensemble | 50 |
| 2.1 Individual Quasi-Particle Systems | 51 |
| 3 Kinetic Theory in Terms of the Fluxes: A Nonclassical Hydrodynamics | 57 |
| 4 The Lagrange Multipliers | 58 |
| 5 Equivalence of the Two Complete Descriptions | 63 |
| 6 Systems with Two-particle Correlations | 65 |
| 7 Further Considerations on the Truncation Procedure | 67 |

| | |
|--|-----|
| 4. MAXENT-NESOM-BASED KINETIC THEORY | 75 |
| 1 The Collision Operators | 79 |
| 2 The Markovian Limit | 85 |
| 3 Higher-Order Collision Operators (Non-Markovian Equations) | 87 |
| 5. RESPONSE FUNCTION THEORY | 91 |
| 1 Response function theory for systems arbitrarily away from equilibrium | 92 |
| 2 Fluctuation-Dissipation Theorem | 101 |
| 3 Formal Theory of Scattering for Far-From-Equilibrium Systems | 107 |
| 4 Nonequilibrium Thermodynamic Green Functions | 116 |
| 4.1 Retarded and Advanced Green Functions | 117 |
| 4.2 Green Functions and the Fluctuation-Dissipation Theorem | 118 |
| 4.3 Transition Probabilities and Response Function | 119 |
| 5 Summary and Conclusions | 121 |
| 6. THEORY AND EXPERIMENT | 123 |
| 1 Dissipative Processes in Semiconductors | 124 |
| 1.1 The initial stage | 127 |
| 1.2 First kinetic stage | 128 |
| 1.3 The second kinetic stage | 129 |
| 1.4 Third kinetic stage | 136 |
| 1.5 Relaxation to final thermodynamic equilibrium | 138 |
| 2 The Inhomogeneous Plasma in Semiconductors | 139 |
| 3 HEPS and Contraction of Description | 143 |
| 4 A Full Analysis of Optical Response Functions | 145 |
| 5 Reflectivity in Pump-Probe Experiments | 148 |
| 6 Polar Semiconductors in Intense Electric Fields | 154 |
| 7 Steady States and Fröhlich-Bose-Einstein Condensation | 173 |
| 8 Final Considerations | 176 |
| 7. INFORMATIONAL STATISTICAL THERMODYNAMICS | 179 |
| 1 Properties of the Informational Statistical Entropy | 184 |
| 2 The MaxEnt-NESOM-Informational entropy | 185 |
| 3 The Nonequilibrium Equations of State | 191 |
| 4 The Quasitemperature | 193 |

| | | |
|----|--|-----|
| 5 | First Truncated description | 196 |
| 6 | Second Truncated Description | 197 |
| 7 | A Generalized α -Theorem | 199 |
| 8 | Evolution and (In)Stability Criteria | 201 |
| 9 | Generalized Clausius- $\not\leq$ Relation | 208 |
| 10 | Fluctuations, Maxwell-like Relations, and Nonequilibrium Boltzmann Entropy | 211 |
| 11 | Summary of Chapter 7 | 216 |
| 8. | FINAL REMARKS | 219 |
| | Appendices | 229 |
| | The variational procedure | 229 |
| | The weight function $w(t', t)$ | 231 |
| | Average values of observables in MaxEnt-NESOM | 235 |
| | Calculation of Eq. (4.15) | 241 |
| | The Partial Collision Operators of Eq. (4.24) | 243 |
| | Calculation of Eq. (4.49) | 245 |
| | An illustration of the use of Markovian equations | 247 |
| | Calculation of Eq. (4.63) | 251 |
| | The Dielectric Function | 255 |
| | Bibliography | 259 |
| | Index | 289 |
| | Name Index | 299 |
