	<b>Editor's Foreword</b>	ix
	<b>Preface</b>	xi
<b>CHAPTER 1</b>	<b>INTRODUCTION</b>	1
<b>CHAPTER 2</b>	<b>A TOY SUPERSPACE</b>	8
	2.1. Notation and conventions	8
	2.2. Supersymmetry and superfields	10
	2.3. Scalar multiplet	16
	2.4. Vector multiplet	19
	2.5. Other global gauge multiplets	29
	2.6. Supergravity	35
	2.7. Quantum superspace	47
<b>CHAPTER 3</b>	<b>REPRESENTATIONS OF SUPERSYMMETRY</b>	55
	3.1. Notation	55
	3.2. The supersymmetry groups	62
	3.3. Representations of supersymmetry	69
	3.4. Covariant derivatives	83
	3.5. Constrained superfields	89
	3.6. Component expansions	92
	3.7. Superintegration	97
	3.8. Superfunctional differentiation and integration	101
	3.9. Physical, auxiliary, and gauge components	107
	3.10. Compensators	111
	3.11. Projection operators	119
	3.12. On-shell representations and superfields	137
	3.13. Off-shell field strengths and prepotentials	146
<b>CHAPTER 4</b>	<b>CLASSICAL, GLOBAL, SIMPLE (<math>N = 1</math>) SUPERFIELDS</b>	148
	4.1. The scalar multiplet	148
	4.2. Yang-Mills gauge theories	158
	4.3. Gauge-invariant models	178
	4.4. Superforms	181
	4.5. Other gauge multiplets	198
	4.6. $N$ -extended multiplets	216

<b>CHAPTER 5</b>	<b>CLASSICAL <math>N = 1</math> SUPERGRAVITY</b>	232
	5.1. Review of gravity	232
	5.2. Prepotentials	245
	5.3. Covariant approach to supergravity	268
	5.4. Solution to Bianchi identities	293
	5.5. Actions	300
	5.6. From superspace to components	316
	5.7. DeSitter supersymmetry	335
<b>CHAPTER 6</b>	<b>QUANTUM GLOBAL SUPERFIELDS</b>	337
	6.1. Introduction to supergraphs	337
	6.2. Gauge fixing and ghosts	340
	6.3. Supergraph rules	348
	6.4. Examples	364
	6.5. The background field method	372
	6.6. Regularization	392
	6.7. Anomalies in Yang-Mills currents	400
<b>CHAPTER 7</b>	<b>QUANTUM <math>N = 1</math> SUPERGRAVITY</b>	407
	7.1. Introduction	407
	7.2. Background-quantum splitting	409
	7.3. Ghosts	419
	7.4. Quantization	430
	7.5. Supergravity supergraphs	437
	7.6. Covariant Feynman rules	445
	7.7. General properties of the effective action	451
	7.8. Examples	460
	7.9. Locally supersymmetric dimensional regularization	469
	7.10. Anomalies	473
<b>CHAPTER 8</b>	<b>BREAKDOWN</b>	496
	8.1. Introduction	496
	8.2. Explicit breaking of global supersymmetry	500
	8.3. Spontaneous breaking of global supersymmetry	506
	8.4. Trace formulae from superspace	518
	8.5. Nonlinear realizations	522
	8.6. SuperHiggs mechanism	527
	8.7. Supergravity and symmetry breaking	529
<b>Index</b>		542
