## CHAPTER I

### Elementary Differential Geometry

1. Manifolds . . . . .	2
2. Tensor Fields . . . . .	8
1. <i>Vector Fields and 1-Forms</i> . . . . .	8
2. <i>Tensor Algebra</i> . . . . .	13
3. <i>The Grassman Algebra</i> . . . . .	17
4. <i>Exterior Differentiation</i> . . . . .	19
3. Mappings . . . . .	22
1. <i>The Interpretation of the Jacobian</i> . . . . .	22
2. <i>Transformation of Vector Fields</i> . . . . .	24
3. <i>Effect on Differential Forms</i> . . . . .	25
4. Affine Connections . . . . .	26
5. Parallelism . . . . .	28
6. The Exponential Mapping . . . . .	32
7. Covariant Differentiation . . . . .	40
8. The Structural Equations . . . . .	43
9. The Riemannian Connection . . . . .	47
10. Complete Riemannian Manifolds . . . . .	55
11. Isometries . . . . .	60
12. Sectional Curvature . . . . .	64
13. Riemannian Manifolds of Negative Curvature . . . . .	70
14. Totally Geodesic Submanifolds . . . . .	78
15. Appendix . . . . .	82
1. <i>Topology</i> . . . . .	82
2. <i>Mapping of Constant Rank</i> . . . . .	86
Exercises and Further Results . . . . .	88
Notes . . . . .	95

## CHAPTER II

### Lie Groups and Lie Algebras

1. The Exponential Mapping . . . . .	98
1. <i>The Lie Algebra of a Lie Group</i> . . . . .	98

451044

2. The Universal Enveloping Algebra . . . . .	100
3. Left Invariant Affine Connections . . . . .	102
4. Taylor's Formula and the Differential of the Exponential Mapping . . . . .	104
2. Lie Subgroups and Subalgebras . . . . .	112
3. Lie Transformation Groups . . . . .	120
4. Coset Spaces and Homogeneous Spaces . . . . .	123
5. The Adjoint Group . . . . .	126
6. Semisimple Lie Groups . . . . .	131
7. Invariant Differential Forms . . . . .	135
8. Perspectives . . . . .	144
Exercises and Further Results . . . . .	147
Notes . . . . .	153

### CHAPTER III

#### Structure of Semisimple Lie Algebras

1. Preliminaries . . . . .	155
2. Theorems of Lie and Engel . . . . .	158
3. Cartan Subalgebras . . . . .	162
4. Root Space Decomposition . . . . .	165
5. Significance of the Root Pattern . . . . .	171
6. Real Forms . . . . .	178
7. Cartan Decompositions . . . . .	182
8. Examples. The Complex Classical Lie Algebras . . . . .	186
Exercises and Further Results . . . . .	191
Notes . . . . .	196

### CHAPTER IV

#### Symmetric Spaces

1. Affine Locally Symmetric Spaces . . . . .	198
2. Groups of Isometries . . . . .	201
3. Riemannian Globally Symmetric Spaces . . . . .	205
4. The Exponential Mapping and the Curvature . . . . .	214
5. Locally and Globally Symmetric Spaces . . . . .	218
6. Compact Lie Groups . . . . .	223
7. Totally Geodesic Submanifolds. Lie Triple Systems . . . . .	224
Exercises and Further Results . . . . .	226
Notes . . . . .	227

### CHAPTER V

#### Decomposition of Symmetric Spaces

1. Orthogonal Symmetric Lie Algebras . . . . .	229
2. The Duality . . . . .	235
3. Sectional Curvature of Symmetric Spaces . . . . .	241
4. Symmetric Spaces with Semisimple Groups of Isometries . . . . .	243

5. Notational Conventions . . . . .	244
6. Rank of Symmetric Spaces . . . . .	245
Exercises and Further Results . . . . .	249
Notes . . . . .	251

**CHAPTER VI**

Symmetric Spaces of the Noncompact Type

1. Decomposition of a Semisimple Lie Group . . . . .	252
2. Maximal Compact Subgroups and Their Conjugacy . . . . .	256
3. The Iwasawa Decomposition . . . . .	257
4. Nilpotent Lie Groups . . . . .	264
5. Global Decompositions . . . . .	270
6. The Complex Case . . . . .	273
Exercises and Further Results . . . . .	275
Notes . . . . .	279

**CHAPTER VII**

Symmetric Spaces of the Compact Type

1. The Contrast between the Compact Type and the Noncompact Type . . . . .	281
2. The Weyl Group and the Restricted Roots . . . . .	283
3. Conjugate Points. Singular Points. The Diagram . . . . .	293
4. Applications to Compact Groups . . . . .	297
5. Control over the Singular Set . . . . .	303
6. The Fundamental Group and the Center . . . . .	307
7. The Affine Weyl Group . . . . .	314
8. Application to the Symmetric Space $U/K$ . . . . .	318
9. Classification of Locally Isometric Spaces . . . . .	325
10. Geometry of $U/K$ . Symmetric Spaces of Rank One . . . . .	327
11. Shortest Geodesics and Minimal Totally Geodesic Spheres . . . . .	334
12. Appendix. Results from Dimension Theory . . . . .	344
Exercises and Further Results . . . . .	347
Notes . . . . .	350

**CHAPTER VIII**

Hermitian Symmetric Spaces

1. Almost Complex Manifolds . . . . .	352
2. Complex Tensor Fields. The Ricci Curvature . . . . .	356
3. Bounded Domains. The Kernel Function . . . . .	364
4. Hermitian Symmetric Spaces of the Compact Type and the Noncompact Type . . . . .	372
5. Irreducible Orthogonal Symmetric Lie Algebras . . . . .	377
6. Irreducible Hermitian Symmetric Spaces . . . . .	381
7. Bounded Symmetric Domains . . . . .	382
Exercises and Further Results . . . . .	396
Notes . . . . .	400

## CHAPTER IX

## Structure of Semisimple Lie Groups

1. Cartan, Iwasawa, and Bruhat Decompositions . . . . .	401
2. The Rank-One Reduction . . . . .	407
3. The $SU(2, 1)$ Reduction . . . . .	409
4. Cartan Subalgebras . . . . .	418
5. Automorphisms . . . . .	421
6. The Multiplicities . . . . .	428
7. Jordan Decompositions . . . . .	430
Exercises and Further Results . . . . .	434
Notes . . . . .	436

## CHAPTER X

The Classification of Simple Lie Algebras  
and of Symmetric Spaces

1. Reduction of the Problem . . . . .	438
2. The Classical Groups and Their Cartan Involutions . . . . .	444
1. Some Matrix Groups and Their Lie Algebras . . . . .	444
2. Connectivity Properties . . . . .	447
3. The Involutive Automorphisms of the Classical Compact Lie Algebras . . . . .	451
3. Root Systems . . . . .	455
1. Generalities . . . . .	455
2. Reduced Root Systems . . . . .	459
3. Classification of Reduced Root Systems. Coxeter Graphs and Dynkin Diagrams . . . . .	461
4. The Nonreduced Root Systems . . . . .	474
5. The Highest Root . . . . .	475
6. Outer Automorphisms and the Covering Index . . . . .	478
4. The Classification of Simple Lie Algebras over $\mathbb{C}$ . . . . .	481
5. Automorphisms of Finite Order of Semisimple Lie Algebras . . . . .	490
6. The Classifications . . . . .	515
1. The Simple Lie Algebras over $\mathbb{C}$ and Their Compact Real Forms. The Irreducible Riemannian Globally Symmetric Spaces of Type II and Type IV . . . . .	515
2. The Real Forms of Simple Lie Algebras over $\mathbb{C}$ . Irreducible Riemannian Globally Symmetric Spaces of Type I and Type IV . . . . .	517
3. Irreducible Hermitian Symmetric Spaces . . . . .	518
4. Coincidences between Different Classes. Special Isomorphisms . . . . .	518
Exercises and Further Results . . . . .	520
Notes . . . . .	535
SOLUTIONS TO EXERCISES . . . . .	538
BIBLIOGRAPHY . . . . .	587
LIST OF NOTATIONAL CONVENTIONS . . . . .	617
SYMBOLS FREQUENTLY USED . . . . .	620
INDEX . . . . .	623
