

# CONTENTS

1.	INTRODUCTION . . . . .	1
1.1.	B a c k g r o u n d	1
1.2.	Objective . . . . .	2
1.3.	Scope . . . . .	3
1.4.	structure . . . . .	3
2.	RESPONSIBILITIES FOR NEAR SURFACE DISPOSAL ANDQA . . . . .	4
2.1.	Responsibilities for surveillance and monitoring	4
2.2.	QA programmes ..	4
3.	GENERAL CRITERIA FOR SURVEILLANCE AND MONITORING . . . . .	6
3.1.	General Objectives of Surveillance and Monitoring	6
3.2.	Relationship to safety assessment	7
3.3.	Application of the results of Surveillance and monitoring	8
3.3.1.	Demonstration of compliance with radiological standards . . . . .	8
3.3.2.	Prompting of investigations and corrective action	8
3.4.	Features of surveillance and monitoring programmes	9
3.4.1.	Surveillance to detect deterioration in the engineered structures and systems of the disposal facility	10
3.4.2.	Detection of radioactive contaminants of concern	11
3.4.3.	Sampling protocols that reflect radiological, physical and chemical characteristics of potential contaminants	12
3.4.4.	Monitoring of ambient radiation levels	13
3.4.5.	Monitoring for migration of contaminants in g r o u n d w a t e r	13
3.4.6.	Monitoring for migration of contaminants to the atmosphere . . . . .	17
3.4.7.	Monitoring for transport of contaminants in surface waters at the disposal facility	18
3.4.8.	General environmental monitoring	19
3.4.9.	D o c u m e n t e d procedures	19
3.4.10.	Retention and statistical analysis of monitoring data	19

4	PRE-OPERATIONAL SURVEILLANCE AND MONITORING .....	20
4.1.	Specific Objectives of pre-operational Surveillance and monitoring .....	20
4.2.	Support of the safety assessment .....	21
4.3.	Pathway Characterization .....	21
4.3.1.	General .....	21
4.3.2.	Groundwater pathways .....	21
4.3.3.	Atmospheric pathways .....	22
4.3.4.	General environment .....	22
4.4.	Baseline radiological conditions .....	22
4.5.	Design of the Surveillance and monitoring programme for the operational Phase .....	23
5	SURVEILLANCE AND MONITORING DURING OPERATIONS .....	24
5.1.	Objectives of surveillance and Monitoring during operations .....	24
5.2.	Support of the safety assessment and demonstration of compliance .....	25
5.3.	Design of The surveillance And Monitoring programme for the post-closure phase .....	26
6	SURVEILLANCE AND MONITORING AFTER CLOSURE OF THE DISPOSAL FACILITY .....	27
6.1.	Objectives of Surveillance and monitoring after closure of the disposal facility .....	27
6.2.	Demonstration of compliance .....	27
6.3.	Support for scheduling the withdrawal of active controls ....	28
7	MONITORING WHEN DISPOSAL FACILITY PERFORMANCE IS NOT CONSISTENT WITH THE ASSUMPTIONS OF A SAFETY ASSESSMENT .....	29
ANNEX I:	SPAIN: ENGINEERED DISPOSAL FACILITY AT EL CABRIL .....	35

ANNEX II: FRANCE: ENGINEERED DISPOSAL FACILITY AT CENTRE DE LA MANCHE	43
ANNEX III: CZECH REPUBLIC: ROCK CAVITY REPOSITORIES AT HOSTÍM, LITOMIŮICE AND BRATRSTVÍ .....	49
ANNEX IV: UNITED STATES OF AMERICA: TRENCHES, PITS AND VAULTS AT THE IDAHO NATIONAL ENGINEERING AND ENVIRONMENTAL L A B O R A T O R Y (INEEL)..	55
ANNEX V: CANADA: TRENCHES, PITS AND VAULTS AT THE CHALK RIVER LABORATORIES (CRL)..	65
CONTRIBUTORS TO DRAFTING AND REVIEW.	75
