

CONTENTS

Introduction	5
Grouping of countries and areas.	9
Table 1. Nuclear power reactors in the world (end of 2003)	12
Figure 1. Nuclear share of total electricity generation in 2003	14
Table 2. Number of countries with nuclear power reactors in operation or under construction (end of 2003)	15
Table 3. Estimates of total and nuclear electrical generating capacity	17
Figure 2. Total and nuclear electrical generating capacity	18
Table 4. Estimates of total electricity generation and contribution by nuclear power	21
Figure 3. Percentage of electricity supplied by nuclear power.	22
Table 5. Estimates of total energy consumption (EJ), percentage used for electricity generation, and percentage supplied by nuclear energy	25
Figure 4. Energy consumption estimates.	26
Table 6. Total energy consumption (EJ) by type of fuel in 2003	29
Figure 5. Total energy consumption by fuel type in 2003	30
Figure 6. Breakdown of world total energy consumption during the period 1970-2003	32
Table 7. Fuel shares (%) of energy consumption in 2003	35
Table 8. Energy consumption (EJ) for electricity generation by type of fuel in 2003	36
Table 9. Percentage contribution of each fuel type to electricity generation in 2003	37
Table 10. Estimates of population growth by region.	39
Figure 7. Population estimates.	40
Table 11. Estimates of total energy and electricity consumption per capita.	43

Figure 6. Per capita energy consumption	44
Figure 9. Per capita electricity consumption	46
Table 12. Average annual growth rates during the period 1993-2003 (per cent)	49
Figure 10. Average annual growth rates during the period 1993-2003 (per cent)	50
Table 13. Estimates of average annual growth rates during the period 2003-2030 (per cent)	53
