

CONTENTS

Introduction

- Historical Overview: Search for inhibitory neurons and their function 1
Masao Ito

I. Synapses

1. The organization and integrative function of the post-synaptic proteome 13
Seth Grant
2. Dynamism of postsynaptic proteins as the mechanism of synaptic plasticity 45
Kenny Futai and Yasunori Hayashi
3. Construction, stability and dynamics of the inhibitory postsynaptic membrane 59
Christian Vannier and Antoine Triller
4. Long-term modification at visual cortical inhibitory synapses 75
Yukio Komatsu and Yumiko Yoshimura
5. Activity-dependent modification of cation-chloride co-transporters underlying plasticity of GABAergic transmission 89
Melanie Woodin and Mu-ming Poo
6. Endocannabinoid-mediated modulation of excitatory and inhibitory synaptic transmission 99
Masanobu Kano, Takako Ohno-Shosaku, Takashi Maejima and Takayuki Yoshida

II. Circuits

7. Balanced recurrent excitation and inhibition in local cortical networks 113
David A. McCormick, You-Sheng Shu and Andrea Hasenstaub

8. Local circuit neurons in the frontal cortico-striatal system <i>Yasuo Kawaguchi</i>	125
9. Interneuron heterogeneity in neocortex <i>Anirudh Gupta, Maria Toledo-Rodriguez, Gilad Silberberg and Henry Markram</i>	149
10. Fast spiking cells and the balance of excitation and inhibition in the neocortex <i>Mario Galarreta and Shaul Hestrin</i>	173
11. Homeostatic regulation of excitatory-inhibitory balance <i>Gina Turrigiano</i>	187
12. Adult neurogenesis controls excitatory-inhibitory balance in the olfactory bulb <i>Pierre-Marie Lledo, Armen Saghatelian and Gilles Gheusi</i>	197
III. Systems	
13. GABA _A receptor subtypes: memory function and neurological disorders <i>Jean-Marc Fritschy, Uwe Rudolph, Florence Crestani and Hanns Mohler</i>	215
14. LTD, spike timing and somatosensory barrel cortex plasticity <i>Daniel E. Feldman, Cara B. Allen and Tansu Celikel</i>	229
15. Maintaining stability and promoting plasticity: context-dependent functions of inhibition <i>Weimin Zheng</i>	241
16. Spike timing and visual cortical plasticity <i>Yu-Xi Fu and Yang Dan</i>	255
17. Excitatory-inhibitory balance controls critical period plasticity <i>Michela Fagiolini and Takao K. Hensch</i>	269
