<i>Preface (of the first edition)</i>	IX
<i>Preface (of the second edition)</i>	XI
<b>1 Introduction and overview</b>	1
1.1 Some history	1
1.2 Examples of chaotic behavior	2
1.3 Dynamical systems	6
1.4 Attractors	10
1.5 Sensitive dependence on initial conditions	15
1.6 Delay coordinates	19
Problems	21
Notes	22
<b>2 One-dimensional maps</b>	24
2.1 Piecewise linear one-dimensional maps	24
2.2 The logistic map	32
2.3 General discussion of smooth one-dimensional maps	45
2.4 Examples of applications of one-dimensional maps to chaotic systems of higher dimensionality	57
Appendix: Some elementary definitions and theorems concerning sets	65
Problems	66
Notes	69
<b>3 Strange attractors and fractal dimension</b>	71
3.1 The box-counting dimension	71

3.2	The generalized baker's map	77
3.3	Measure and the spectrum of $Dq$ dimensions	80
3.4	Dimension spectrum for the generalized baker's map	84
3.5	Character of the natural measure for the generalized baker's map	85
3.6	The pointwise dimension	89
3.7	Implications and determination of fractal dimension in experiments	91
3.8	A direct experimental observation of fractal attractors	96
3.9	Embedding	98
3.10	Fat fractals	102
	Appendix: Hausdorff dimension	105
	Problems	107
	Notes	113
<b>4</b>	<b>Dynamical properties of chaotic systems</b>	<b>115</b>
4.1	The horseshoe map and symbolic dynamics	115
4.2	Linear stability of steady states and periodic orbits	122
4.3	Stable and unstable manifolds	129
4.4	Lyapunov exponents	137
4.5	Entropies	145
4.6	Chaotic flows and magnetic dynamos: the origin of magnetic fields in the Universe	152
	Appendix: Gram-Schmidt orthogonalization	161
	Problems	162
	Notes	166
<b>5</b>	<b>Nonattracting chaotic sets</b>	<b>168</b>
5.1	Fractal basin boundaries	169
5.2	Final state sensitivity	175
5.3	Structure of fractal basin boundaries	178
5.4	Chaotic scattering	185
5.5	The dynamics of chaotic scattering	189
5.6	The dimensions of nonattracting chaotic sets and their stable and unstable manifolds	196
5.7	Riddled basins of attraction	201
	Appendix: Derivation of Eqs. (5.3)	207
	Problems	207
	Notes	210
<b>6</b>	<b>Quasiperiodicity</b>	<b>212</b>
6.1	Frequency spectrum and attractors	212
6.2	The circle map	218
6.3	$N$ frequency quasiperiodicity with $N > 2$	228

6.4	Strange nonchaotic attractors of quasiperiodically forced systems	233
6.5	Phase locking of a population of globally coupled oscillators	236
	Problems	244
	Notes	245
<b>7</b>	<b>Chaos in Hamiltonian systems</b>	246
7.1	Hamiltonian systems	246
7.2	Perturbation of integrable systems	263
7.3	Chaos and KAM tori in systems describable by two-dimensional Hamiltonian maps	273
7.4	Higher-dimensional systems	295
7.5	Strongly chaotic systems	296
7.6	The succession of increasingly random systems	299
	Problems	301
	Notes	302
<b>8</b>	<b>Chaotic transitions</b>	304
8.1	The period doubling cascade route to chaotic attractors	305
8.2	The intermittency transition to a chaotic attractor	310
8.3	Crises	315
8.4	The Lorenz system: An example of the creation of a chaotic transient	330
8.5	Basin boundary metamorphoses	334
8.6	Bifurcations to chaotic scattering	338
	Problems	342
	Notes	344
<b>9</b>	<b>Multifractals</b>	345
9.1	The singularity spectrum $f(\alpha)$	345
9.2	The partition function formalism	353
9.3	Lyapunov partition functions	356
9.4	Distribution of infinite time Lyapunov exponents	363
9.5	Unstable periodic orbits and the natural measure	367
9.6	Validity of the Lyapunov and periodic orbits partition functions for nonhyperbolic attractors	371
9.7	Fractal aspects of fluid advection by Lagrangian chaotic flows	373
	Problems	377
	Notes	377
<b>10</b>	<b>Control and synchronization of chaos</b>	379
10.1	Control of chaos	379
10.2	Controlling a steadily running chaotic process (Goal 1)	381
10.3	Control Goal 2: targeting	390

10.4 Synchronization of chaotic systems	393
10.5 Stability of a chaotic set on an invariant manifold	402
10.6 Generalized synchronization of coupled chaotic systems	409
10.7 Phase synchronization of chaos	411
Problems	419
Notes	420
<b>11 Quantum chaos</b>	<b>421</b>
11.1 The energy level spectra of chaotic, bounded, time-independent systems	423
11.2 Wavefunctions for classically chaotic, bounded, time-independent systems	439
11.3 Temporally periodic systems	442
11.4 Quantum chaotic scattering	449
Problems	450
Notes	450
<i>References</i>	452
<i>Index</i>	475
