

Table of Contents

<i>Preface</i>	<i>ix</i>
1: <i>bash Basics</i>	1
What Is a Shell?	2
Scope of This Book	2
History of UNIX Shells	3
Getting bash	5
Interactive Shell Use	6
Files	7
Input and Output	14
Background Jobs	18
Special Characters and Quoting	21
Help	27
2: <i>Command-Line Editing</i>	28
The History File	30
emacs Editing Mode	30
vi Editing Mode	38
The fc Command	47
History Expansion	50
readline	51
Keyboard Habits	55

3:	<i>Customizing Your Environment</i>	57
	The .bash_profile, .bash_logout, and .bashrc Files	58
	Aliases	60
	Options	63
	Shell Variables	65
	Customization and Subprocesses	76
	Customization Hints	81
4:	<i>Basic Shell Programming</i>	83
	Shell Scripts and Functions	83
	Shell Variables	88
	String Operators	94
	Command Substitution	103
	Advanced Examples: pushd and popd	107
5:	<i>Flow Control</i>	111
	if/else	112
	for	126
	case	133
	select	136
	while and until	139
6:	<i>Command-Line Options and Typed Variables</i>	141
	Command-Line Options	141
	Typed Variables	150
	Integer Variables and Arithmetic	151
	Arrays	160
7:	<i>Input/Output and Command-Line Processing</i>	163
	I/O Redirectors	163
	String I/O	169
	Command-Line Processing	177
8:	<i>Process Handling</i>	195
	Process IDs and Job Numbers	196
	Job Control	197
	Signals	200
	trap	207
	Coroutines	213

Subshells	217
Process Substitution	219
9: <i>Debugging Shell Programs</i>	220
Basic Debugging Aids	221
A bash Debugger	226
10: <i>bash Administration</i>	247
Installing bash as the Standard Shell	247
Environment Customization	250
System Security Features	254
11: <i>bash for Your System</i>	257
Obtaining bash	257
Unpacking the Archive	259
What's in the Archive	259
Who Do I Turn to?	264
A: <i>Related Shells</i>	267
B: <i>Reference Lists</i>	277
C: <i>Loadable Built-Ins</i>	293
D: <i>Syntax</i>	298
E: <i>Obtaining Sample Programs</i>	302
<i>Index</i>	305
