

# Contents

List of Examples .....	xxv
List of Tables .....	xxxiii
Preface .....	xxxvii
<b>I Tcl Basics .....</b>	<b>1</b>
<b>1. Tcl Fundamentals .....</b>	<b>3</b>
Tcl Commands .....	3
Hello, World! .....	4
Variables .....	4
Command Substitution .....	5
Math Expressions .....	6
Backslash Substitution .....	6
Grouping with Braces and Double Quotes .....	7
Square Brackets Do Not Group .....	8
Grouping before Substitution .....	9
Procedures .....	10
A Factorial Example .....	11
More about Variables .....	12
Funny Variable Names .....	13
The <b>unset</b> Command .....	13
Using <b>info</b> to Find Out about Variables .....	14
More about Math Expressions .....	14
Comments .....	15
Substitution and Grouping Summary .....	15
Fine Points .....	16
Reference .....	18
Backslash Sequences .....	18
Arithmetic Operators .....	18
Built-in Math Functions .....	19
Core Tcl Commands .....	20
<b>2. Getting Started .....</b>	<b>23</b>
The <b>source</b> Command .....	24
UNIX Tcl Scripts .....	24
Windows 95 Start Menu .....	25

The Macintosh and ResEdit .....	26
The <b>console</b> Command .....	26
Command-Line Arguments .....	26
Command-Line Options to Wish .....	27
Predefined Variables .....	28
<b>3. The Guestbook CGI Application .....</b>	<b>29</b>
A Quick Introduction to HTML .....	30
CGI for Dynamic Pages .....	31
The <b>guestbook.cgi</b> Script .....	32
Beginning the HTML Page .....	33
Simple Tags and Hypertext Links .....	34
Using a Tcl Array for the Database .....	35
Sample Output .....	36
Defining Forms and Processing Form Data .....	37
The <b>newguest.html</b> Form .....	37
The <b>newguest.cgi</b> Script .....	39
Next Steps .....	41
<b>4. String Processing in Tcl .....</b>	<b>43</b>
The <b>string</b> Command .....	43
Strings and Expressions .....	45
The <b>append</b> Command .....	45
The <b>format</b> Command .....	46
The <b>scan</b> Command .....	48
String Matching .....	48
The <b>binary</b> Command .....	49
Format Templates .....	50
Examples .....	51
Related Chapters .....	52
<b>5. Tcl Lists .....</b>	<b>53</b>
Tcl Lists .....	53
Constructing Lists .....	55
The <b>list</b> command .....	55
The <b>lappend</b> Command .....	56
The <b>concat</b> Command .....	56
Getting List Elements: <b>llength</b> , <b>lindex</b> , and <b>lrange</b> .....	57
Modifying Lists: <b>linsert</b> and <b>lreplace</b> .....	57
Searching Lists: <b>lsearch</b> .....	58
Sorting Lists: <b>lsort</b> .....	58
The <b>split</b> Command .....	59

The <b>join</b> Command .....	60
Related Chapters .....	61
6. Control Structure Commands .....	63
<b>If Then Else</b> .....	64
<b>Switch</b> .....	65
Comments in <b>switch</b> Commands .....	66
<b>While</b> .....	67
<b>Foreach</b> .....	67
Multiple Loop Variables .....	69
Multiple Value Lists .....	70
<b>For</b> .....	70
<b>Break and Continue</b> .....	71
<b>Catch</b> .....	71
Catching More Than Errors .....	72
<b>Error</b> .....	73
<b>Return</b> .....	74
7. Procedures and Scope .....	75
The <b>proc</b> Command .....	75
Changing Command Names with <b>rename</b> .....	77
Scope .....	77
The <b>global</b> Command .....	78
Call by Name Using <b>upvar</b> .....	79
Variable Aliases with <b>upvar</b> .....	80
Associating State with Data .....	80
Commands That Take Variable Names .....	81
8. Tcl Arrays .....	83
Array Syntax .....	83
Complex Indices .....	84
Array Variables .....	84
The <b>array</b> Command .....	85
Converting Arrays to Lists .....	86
Passing Arrays by Name .....	86
Building Data Structures with Arrays .....	87
Simple Records .....	87
A Stack .....	88
A List of Arrays .....	89
9. Working with Files and Programs .....	91
Running Programs with <b>exec</b> .....	91

The <b>auto_noexec</b> Variable .....	93
Limitations of <b>exec</b> on Windows .....	93
Limitations of <b>exec</b> on Macintosh .....	93
The <b>file</b> Command .....	94
Cross-Platform File Naming .....	95
Building up Pathnames: <b>file join</b> .....	96
Chopping Pathnames: <b>split</b> , <b>dirname</b> , <b>tail</b> .....	97
Manipulating Files and Directories .....	97
Copying Files .....	98
Creating Directories .....	98
Deleting Files .....	98
Renaming Files and Directories .....	98
File Attributes .....	99
Input/Output Command Summary .....	101
Opening Files for I/O .....	101
Opening a Process Pipeline .....	103
Reading and Writing .....	104
The <b>puts</b> and <b>gets</b> Commands .....	104
The <b>read</b> Command .....	105
Platform-Specific End of Line Characters .....	105
Random Access I/O .....	106
Closing I/O channels .....	106
The Current Directory — <b>cd</b> and <b>pwd</b> .....	106
Matching File Names with <b>glob</b> .....	106
Expanding Tilde in File Names .....	107
The <b>exit</b> and <b>pid</b> Commands .....	108
Environment Variables .....	108
<b>II Advanced Tcl .....</b>	<b>111</b>
<b>10. Eval .....</b>	<b>113</b>
Construct Commands with <b>list</b> .....	113
Exploiting the <b>concat</b> inside <b>eval</b> .....	115
Double Quotes and <b>eval</b> .....	117
More Examples .....	118
The <b>uplevel</b> Command .....	118
Commands That Concatenate Their Arguments .....	119
The <b>subst</b> Command .....	120
String Processing with <b>subst</b> .....	120
<b>11. Regular Expressions .....</b>	<b>121</b>
Regular Expression Syntax .....	122

A Pattern to Match URLs .....	123
The <b>regexp</b> Command .....	124
Useful Regular Expressions .....	126
The <b>regsub</b> Command .....	127
Transforming Data to Tcl with <b>regsub</b> .....	127
URL Decoding .....	128
CGI Argument Parsing .....	128
Decoding HTML Entities .....	129
A Simple HTML Parser .....	131
Stripping HTML Comments .....	132
Other Commands That Use Regular Expressions .....	133
12. Script Libraries and Packages .....	135
Locating Packages: The <b>auto_path</b> Variable .....	136
Using Packages .....	136
Loading Packages Automatically .....	137
Packages Implemented in C Code .....	137
The <b>package</b> Command .....	138
Libraries Based on the <b>tclIndex</b> File .....	139
The <b>unknown</b> Command .....	141
How Auto Loading Works .....	141
Disabling the Library Facility: <b>auto_noload</b> .....	142
Interactive Conveniences .....	142
Auto Execute .....	142
History .....	142
Abbreviations .....	142
Tcl Shell Library Environment .....	142
Coding Style .....	143
A Module Prefix for Procedure Names .....	144
A Global Array for State Variables .....	144
13. Reflection and Debugging .....	145
The <b>clock</b> Command .....	145
The <b>info</b> Command .....	148
Variables .....	149
Procedures .....	150
The Call Stack .....	151
Command Evaluation .....	151
Scripts and the Library .....	152
Version Numbers .....	152
Execution Environment .....	152
Cross-Platform Support .....	153

Tracing Variable Values .....	153
Interactive Command History .....	155
History Syntax .....	156
A Comparison to C Shell History Syntax .....	157
Debugging .....	157
Don Libes' Debugger .....	158
Breakpoints by Pattern Matching .....	160
Deleting Break Points .....	161
Debugging Tk Scripts .....	161
The tkinspect Program .....	161
The tdebug Program .....	161
The <b>bgerror</b> Command .....	162
The <b>tkerror</b> Command .....	162
Performance Tuning .....	162
Time stamps in a Log .....	162
Tcl 8.0 .....	163
<b>14. Namespaces .....</b>	<b>165</b>
Using Namespaces .....	165
Namespace Variables .....	167
Qualified Names .....	167
Command Lookup .....	168
Nested Namespaces .....	168
Importing Procedures .....	169
Other Namespaces .....	170
Callbacks and Namespaces .....	170
Introspection .....	171
The <b>namespace</b> Command .....	172
Wrapping Existing Packages .....	173
[incr Tcl] Object System .....	173
Notes .....	174
Auto Loading .....	174
Namespaces and <b>uplevel</b> .....	174
Naming Quirks .....	174
Miscellaneous .....	175
<b>15. Event-Driven Programming .....</b>	<b>177</b>
The Tcl Event Loop .....	177
The <b>after</b> Command .....	178
The <b>fileevent</b> Command .....	179
The <b>vwait</b> Command .....	180
The <b>fconfigure</b> Command .....	181

Non-Blocking I/O .....	181
The <b>fblocked</b> Command .....	182
Buffering .....	182
End of Line Translations .....	183
End of File Character .....	183
Serial Devices .....	183
Configuring Read-Write Channels .....	184
<b>16. Socket Programming .....</b>	<b>185</b>
Client Sockets .....	186
Client Socket Options .....	186
Server Sockets .....	187
Server Socket Options .....	187
The Echo Service .....	188
Fetching a URL with HTTP .....	189
Proxy Servers .....	190
The <b>HEAD</b> Request .....	192
The <b>GET</b> and <b>POST</b> Requests .....	193
The <b>unsupported0</b> Command .....	196
The <b>fcopy</b> Command .....	197
The <b>http</b> Package .....	197
<b>http_config</b> .....	198
<b>http_get</b> .....	198
<b>http_formatQuery</b> .....	201
<b>http_reset</b> .....	201
<b>17. Multiple Interpreters and</b>	
<b>Safe-Tcl .....</b>	<b>203</b>
The <b>interp</b> Command .....	204
Creating Interpreters .....	205
The Interpreter Hierarchy .....	205
The Interpreter Name as a Command .....	206
Use <b>list</b> with <b>interp eval</b> .....	206
Safe Interpreters .....	207
Command Aliases .....	208
Alias Introspection .....	208
Hidden Commands .....	209
Substitutions .....	210
I/O from Safe Interpreters .....	211
The Safe Base .....	212
Security Policies .....	213
Limited Socket Access .....	214

Limited Temporary Files .....	216
Safe <b>after</b> Command .....	219
III Tk Basics.....	223
18. Tk Fundamentals .....	225
Hello, World! in Tk .....	226
Naming Tk Widgets .....	228
Configuring Tk Widgets .....	228
Tk Widget Attributes and the Resource Database .....	229
The Tk Manual Pages .....	230
Summary of the Tk Commands .....	230
19. Tk by Example .....	233
ExecLog .....	233
Window Title .....	235
A Frame for Buttons .....	236
Command Buttons .....	236
A Label and an Entry .....	236
Key Bindings and Focus .....	236
A Resizable Text and Scrollbar .....	237
The <b>Run</b> Procedure .....	237
The <b>Log</b> Procedure .....	238
The <b>Stop</b> Procedure .....	239
Cross-Platform Issues .....	239
The Example Browser .....	240
More about Resizing Windows .....	243
Managing Global State .....	243
Searching through Files .....	243
Cascaded Menus .....	244
A Read-Only Text Widget .....	245
A Tcl Shell .....	245
Text Marks, Tags, and Bindings .....	248
Multiple Interpreters .....	248
Native Look and Feel .....	248
20. The Pack Geometry Manager .....	251
Packing toward a Side .....	252
Shrinking Frames and <b>pack propagate</b> .....	252
Horizontal and Vertical Stacking .....	253
The Cavity Model .....	254
Packing Space and Display Space .....	255

The <b>-fill</b> Option .....	255
Internal Padding with <b>-ipadx</b> and <b>-ipady</b> .....	256
External Padding with <b>-padx</b> and <b>-pady</b> .....	258
Resizing and <b>-expand</b> .....	258
Anchoring .....	260
Packing Order .....	261
Introspection .....	262
Pack the Scrollbar First .....	262
Choosing the Parent for Packing .....	263
Unpacking a Widget .....	263
Packer Summary .....	264
The <b>pack</b> Command .....	264
Window Stacking Order .....	265
<b>21. The Grid Geometry Manager</b> .....	<b>267</b>
A Basic Grid .....	267
The <b>-sticky</b> Setting .....	268
External Padding with <b>-padx</b> and <b>-pady</b> .....	269
Internal Padding with <b>-ipadx</b> and <b>-ipady</b> .....	270
Multiple Widgets in a Cell .....	270
Spanning Rows and Columns .....	271
Row and Column Constraints .....	272
Row and Column Padding .....	272
Minimum Size .....	273
Managing Resize Behavior .....	273
The <b>grid</b> Command .....	274
<b>22. The Place Geometry Manager</b> .....	<b>277</b>
<b>place</b> Basics .....	277
The Pane Manager .....	279
Parsing Arguments and Maintaining State .....	280
Sticky Geometry Settings .....	280
Event Bindings .....	281
Managing the Layout .....	281
The <b>place</b> Command .....	283
<b>23. Binding Commands to Events</b> .....	<b>285</b>
The <b>bind</b> Command .....	285
The <b>bindtags</b> Command .....	287
Focus and Key Events .....	288
Using <b>break</b> and <b>continue</b> in Bindings .....	288
Defining New Binding Tags .....	289

Binding Precedence in Tk 3.6 .....	289
Event Syntax .....	289
Keyboard Events .....	290
Detecting Modifiers in Tk 3.6 .....	291
Mouse Events .....	292
Other Events .....	292
Bindings on Top-level Windows .....	293
Modifiers .....	293
Modifiers in Tk 3.6 .....	295
Event Sequences .....	295
Virtual Events .....	297
Event Keywords .....	298
<b>IV Tk Widgets.....</b>	<b>301</b>
<b>24. Buttons and Menus .....</b>	<b>303</b>
Button Commands and Scope Issues .....	304
Buttons Associated with Tcl Variables .....	308
Button Attributes .....	309
Button Operations .....	311
Menus and Menubuttons .....	312
A Menu Bar .....	313
System Menu .....	314
Pop-Up Menu .....	314
Option Menu .....	314
Multicolumn Palette Menus .....	315
Keyboard Traversal .....	315
Manipulating Menus and Menu Entries .....	315
Menu Attributes .....	317
A Menu by Name Package .....	318
Menu Accelerators .....	321
<b>25. The Resource Database .....</b>	<b>323</b>
An Introduction to Resources .....	323
Resource Patterns .....	324
Loading Option Database Files .....	325
Adding Individual Database Entries .....	326
Accessing the Database .....	327
User-Defined Buttons .....	327
User-Defined Menus .....	329
Application and User Resources .....	331
Expanding Variables .....	332

26. Simple Tk Widgets .....	333
Frames and Toplevel Windows .....	333
Attributes for Frames and Toplevels .....	334
Embedding Other Applications .....	335
Toplevel Window Styles .....	335
The Label Widget .....	336
Label Width and Wrap Length .....	337
Label Attributes .....	337
The Message Widget .....	338
Message Attributes .....	340
Arranging Labels and Messages .....	340
The Scale Widget .....	341
Scale Bindings .....	341
Scale Attributes .....	342
Programming Scales .....	343
The <b>bell</b> Command .....	344
27. Scrollbars .....	345
Using Scrollbars .....	345
The Scrollbar Protocol .....	347
The Scrollbar <b>set</b> Operation .....	347
The <b>xview</b> and <b>yview</b> Operations .....	349
The Tk 3.6 Protocol .....	349
The Scrollbar Widget .....	350
Scrollbar Bindings .....	350
Scrollbar Attributes .....	350
Programming Scrollbars .....	351
28. The Entry Widget .....	353
Using Entry Widgets .....	353
Tips for Using Entry Widgets .....	354
The Entry Widget .....	355
Entry Attributes .....	356
Programming Entry Widgets .....	357
29. The Listbox Widget .....	359
Using Listboxes .....	359
Programming Listboxes .....	361
Listbox Bindings .....	363
Browse Select Mode .....	364
Single Select Mode .....	364
Extended Select Mode .....	365

Multiple Select Mode .....	366
Scroll Bindings .....	366
Listbox Attributes .....	367
Geometry Gridding .....	367
<b>30. The Text Widget .....</b>	<b>369</b>
Text Indices .....	369
Inserting and Deleting Text .....	370
Index Arithmetic .....	371
Comparing Indices .....	371
Text Marks .....	372
Mark Gravity .....	372
Text Tags .....	373
Tag Attributes .....	373
Mixing Attributes from Different Tags .....	375
Line Spacing and Justification .....	375
Tab Stops .....	377
The Selection .....	378
Tag Bindings .....	378
Searching Text .....	379
Embedded Widgets .....	380
Embedded Images .....	382
Looking inside the Text Widget .....	383
Looking at Tags .....	383
Looking at Marks .....	384
Dumping the Contents .....	384
Text Bindings .....	385
Text Operations .....	387
Text Attributes .....	389
<b>31. The Canvas Widget .....</b>	<b>391</b>
Canvas Coordinates .....	391
Hello, World! .....	392
Canvas Tags .....	393
The Min Max Scale Example .....	395
Canvas Objects .....	399
Arc Items .....	399
Bitmap Items .....	400
Image Items .....	401
Line Items .....	402
Oval Items .....	404
Polygon Items .....	404

Rectangle Items .....	405
Text Items .....	406
Window Items .....	410
Canvas Operations .....	412
Generating Postscript .....	414
Canvas Attributes .....	416
Hints .....	418
Screen Coordinates vs. Canvas Coordinates .....	418
Large Coordinate Spaces .....	418
Scaling and Rotation .....	418
Resources .....	418
Objects with Many Points .....	419
Selecting Canvas Items .....	419
<b>V Tk Details .....</b>	<b>421</b>
<b>32. Selections and the Clipboard .....</b>	<b>423</b>
The Selection Model .....	423
The <b>selection</b> Command .....	425
The <b>clipboard</b> Command .....	426
Selection Handlers .....	426
A Canvas Selection Handler .....	427
<b>33. Focus, Grabs, and Dialogs .....</b>	<b>431</b>
Standard Dialogs .....	431
Message Box .....	432
File Dialogs .....	432
Color Dialog .....	433
Custom Dialogs .....	434
Input Focus .....	434
The <b>focus</b> Command .....	435
Keyboard Focus Traversal .....	435
Grabbing the Focus .....	436
The <b>tkwait</b> Command .....	436
Destroying Widgets .....	437
The <b>focus</b> , <b>grab</b> , <b>tkwait</b> sequence .....	437
Prompter Dialog .....	439
Keyboard Shortcuts and Focus .....	440
Animation with the <b>update</b> Command .....	440
<b>34. Tk Widget Attributes .....</b>	<b>443</b>
Configuring Attributes .....	443

Size .....	444
Borders and Relief .....	446
The Focus Highlight .....	447
Padding and Anchors .....	448
Putting It All Together .....	449
<b>35. Color, Images, and Cursors .....</b>	<b>451</b>
Colors .....	452
Color Palettes .....	453
Color Values .....	453
Colormaps and Visuals .....	456
Bitmaps and Images .....	457
The image Command .....	458
Bitmap Images .....	458
The <code>bitmap</code> Attribute .....	459
Photo Images .....	460
The Text Insert Cursor .....	462
The Mouse Cursor .....	463
<b>36. Fonts and Text Attributes .....</b>	<b>465</b>
Naming a Font .....	466
Named Fonts .....	467
System Fonts .....	467
X Font Names .....	467
Font Failures before Tk 8.0 .....	469
Font Metrics .....	470
The <code>font</code> Command .....	471
Text Attributes .....	471
Layout .....	471
Selection Attributes .....	472
Gridding, Resizing, and Geometry .....	472
A Font Selection Application .....	473
<b>37. Send .....</b>	<b>477</b>
The <code>send</code> Command .....	478
Send and X Authority .....	478
The Sender Script .....	479
Communicating Processes .....	481
Remote <code>eval</code> through Sockets .....	482
<b>38. Window Managers and Window Information .....</b>	<b>487</b>
The <code>wm</code> Command .....	487

Size, Placement, and Decoration .....	488
Icons .....	489
Session State .....	490
Miscellaneous .....	491
The <b>winfo</b> Command .....	492
Sending Commands between Applications .....	492
Family Relationships .....	493
Size .....	494
Location .....	495
Virtual Root Window .....	496
Atoms and IDs .....	496
Colormaps and Visuals .....	497
The <b>tk</b> Command .....	498
<b>39. Managing User Preferences .....</b>	<b>499</b>
App-Defaults Files .....	499
Defining Preferences .....	501
The Preferences User Interface .....	503
Managing the Preferences File .....	506
Tracing Changes to Preference Variables .....	508
Improving the Package .....	508
<b>40. A User Interface to Bindings .....</b>	<b>511</b>
A Pair of Listboxes Working Together .....	513
The Editing Interface .....	515
Saving and Loading Bindings .....	516
<b>VI C Programming .....</b>	<b>519</b>
<b>41. C Programming and Tcl .....</b>	<b>521</b>
Using the Tcl C Library .....	522
Application Structure .....	522
Creating a Loadable Package .....	523
The <b>load</b> Command .....	524
Using <b>Tcl_PkgProvide</b> .....	525
A C Command Procedure .....	525
The String Command Interface .....	525
Managing String Result .....	527
The Object Command Interface .....	528
Managing Object Reference Counts .....	529
<b>Tcl_Main</b> and <b>Tcl_AppInit</b> .....	532
<b>Tk_Main</b> .....	534

The Event Loop .....	536
Invoking Scripts from C .....	537
Bypassing <code>Tcl_Eval</code> .....	537
Expect's Tcl Debugger .....	540
The Dbg C Interface .....	541
Handling <code>SIGINT</code> .....	542
Putting a Tcl Program Together .....	543
A Simple UNIX Example .....	544
Autoconf .....	544
Windows .....	548
Macintosh .....	548
42. C Library Overview .....	549
An Overview of the Tcl C Library .....	550
Application Initialization .....	550
Creating and Deleting Interpreters .....	550
Creating and Deleting Commands .....	550
Dynamic Loading and Packages .....	550
Managing the Result String .....	551
Memory Allocation .....	551
Lists and Command Parsing .....	551
Command Pipelines .....	551
Tracing the Actions of the Tcl Interpreter .....	552
Evaluating Tcl Commands .....	552
Reporting Script Errors .....	552
Manipulating Tcl Variables .....	553
Evaluating Expressions .....	553
Converting Numbers .....	553
Tcl Objects .....	553
Primitive Object Types .....	554
String Keys for Data Structures .....	554
Option Processing .....	554
Hash Tables .....	554
Dynamic Strings .....	556
Regular Expressions and String Matching .....	556
Event Loop Interface .....	556
Handling Window Events .....	556
File Handlers .....	557
Timer Events .....	557
Idle Callbacks .....	557
Sleeping .....	557
Event Loop Implementation .....	557

Input/Output .....	558
I/O Channel Drivers .....	558
Manipulating File Names .....	558
Working with Signals .....	559
Exit Handlers .....	559
An Overview of the Tk C Library .....	559
Parsing Command-Line Arguments .....	559
The Standard Application Setup .....	559
Creating Windows .....	559
Application Name for Send .....	560
Configuring Windows .....	560
Window Coordinates .....	560
Window Stacking Order .....	560
Window Information .....	560
Configuring Widget Attributes .....	561
Safe Handling of the Widget Data Structure .....	561
The Selection and Clipboard .....	561
Event Bindings .....	561
Handling Graphic Protocol Errors .....	562
Using the Resource Database .....	562
Managing Bitmaps .....	562
Creating New Image Types .....	562
Using an Image in a Widget .....	562
Photo Image Types .....	563
Canvas Object Support .....	563
Geometry Management .....	563
String Identifiers (UIDS) .....	564
Colors, Colormaps, and Visuals .....	564
3D Borders .....	564
Mouse Cursors .....	564
Fonts and Text Display .....	564
Graphics Contexts .....	565
Allocate a Pixmap .....	565
Screen Measurements .....	565
Relief Style .....	565
Text Anchor Positions .....	565
Line Cap Styles .....	565
Line Join Styles .....	566
Text Justification Styles .....	566
Atoms .....	566
X Resource ID Management .....	566

43. Writing a Tk Widget in C .....	567
The Widget Data Structure .....	568
The Widget Class Command .....	569
The Widget Instance Command .....	570
Configuring and Reconfiguring Attributes .....	572
Specifying Widget Attributes .....	573
Displaying the Clock .....	576
The Window Event Procedure .....	579
Final Cleanup .....	580
 VII Changes .....	 583
44. Tcl 7.4/Tk 4.0 .....	585
wish .....	585
Obsolete Features .....	585
The <b>cget</b> Operation .....	586
Input Focus Highlight .....	586
Bindings .....	586
Scrollbar Interface .....	587
<b>pack info</b> .....	587
Focus .....	587
The <b>send</b> Command .....	588
Internal Button Padding .....	588
Radiobutton Value .....	588
Entry Widget .....	588
Menus .....	589
Listboxes .....	589
No <b>geometry</b> Attribute .....	589
Text Widget .....	590
Color Attributes .....	590
Color Allocation and <b>tk colormap</b> .....	591
Canvas <b>scrollincrement</b> .....	591
The Selection .....	591
The <b>bell</b> Command .....	591
 45. Tcl 7.5/Tk 4.1 .....	 593
Cross-Platform Scripts .....	593
File Name Manipulation .....	593
Newline Translations .....	593
The <b>tcl_platform</b> Variable .....	594
The <b>console</b> Command .....	594

The <b>clock</b> Command .....	594
The <b>load</b> Command .....	594
The <b>package</b> Command .....	595
Multiple <b>foreach</b> loop variables .....	595
Event Loop Moves from Tk to Tcl .....	595
Network Sockets .....	595
